#### STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

X Enhance Safety and Security
 X Deliver System Quality

X Serve Communities and Support the Economy Promote Environmental Stewardship

**EXPLANATION:** Extending the northbound Express Toll Lanes and associated improvements will provide congestion relief and address safety concerns.

<b>DESCRIPTION:</b> The two-lane Express Toll Lane extension to MD 24 includes I-95 safety improvements
from Cowantan Road to MD 24; the reconstruction of the MD 24 and MD 152 interchanges; the

PROJECT: I-95 John F. Kennedy Memorial Highway - Express Toll Lanes (ETL) Northern Extension

from Cowenton Road to MD 24; the reconstruction of the MD 24 and MD 152 interchanges; the replacement of four bridges over I-95 (Bradshaw Road, Old Joppa Road, Clayton Road, and Raphel Road); the construction of five noise walls; and environmental mitigation.

**PURPOSE & NEED SUMMARY STATEMENT:** Traffic operations on northbound I-95 beyond the current MD 43 Express Toll Lanes terminus experience routine congestion during peak hours. The improvements will address capacity concerns, improve safety, and allow for better incident management and maintenance activities. The construction of additional noise walls will address the community's requests about quality of life.

#### SIGNIFICANT CHANGE FROM FY 2023 - 28 CTP: Cost

decreased by \$20.0 million to reflect actual bid prices.

#### **STATE GOALS :** Maryland Transportation Plan (MTP) Goals/Selection Criteria:

Enhance Safety and Security Deliver System Quality X Serve Communities and Support the Economy Promote Environmental Stewardship

EXPLANATION: This project will support development by providing access to I-95 at Belvidere Road.

PROJECT: I-95 John F.	. Kennedv Memoria	l Highway - Construct	t Interchange at Belvidere Road
	. Itelineay memoria	ringiniay concaaci	t inter enange at Bernaere neat

**DESCRIPTION:** The project will construct a new interchange between I-95 John F. Kennedy Memorial Highway and Belvidere Road, including constructing a new bridge over I-95.

**PURPOSE & NEED SUMMARY STATEMENT:** Increased development in the vicinity of Belvidere Road in Cecil County necessitates an interchange at I-95 (JFK Highway) and Belvidere Road. The project cost will be shared with Stewart Properties contributing \$8.8 million for right-of-way, Cecil County contributing \$1 million for construction, and MDTA providing \$46.7 million, with the balance of \$20 million from a Federal BUILD Grant. The BUILD Grant was awarded in December 2018. At the time of the grant application in 2018, the project was estimated at \$54 million; however, the cost shown on this page reflects the low bid received from the selected Design-Build team.

increased by \$1.1 million for extra work added that was found to be needed during yearly inspections.

2509

PROJECT: I-95 John F. Kennedy Memorial Highway - I-95 Southbound Hard Shoulder Running

**DESCRIPTION:** This project will provide part-time left shoulder use for approximately 5.4 miles on I-95 southbound from Maryland House to MD 24 in Harford County. It involves restriping I-95 and repaving the left shoulder lane to accommodate part-time left shoulder use. Installation of Intelligent Transportation System (ITS) devices to dynamically open and close the left shoulder lane based on traffic conditions is included.

**<u>PURPOSE & NEED SUMMARY STATEMENT:</u>** This project will increase capacity along southbound I-95 between Maryland House and MD 24 and reduce congestion during high traffic volumes.

#### STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

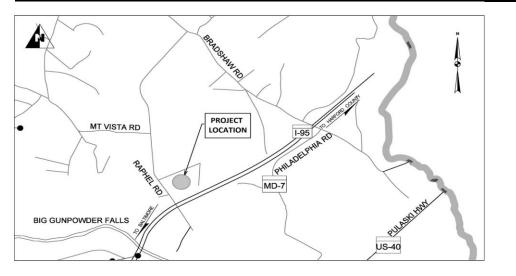

Enhance Safety and Security Deliver System Quality X Serve Communities and Support the Economy Promote Environmental Stewardship

**EXPLANATION:** I-95 southbound from Maryland House to MD 24 sometimes experiences congestion. This project will increase capacity in the area.

EXPLANATION: The Maintenance Building will support an environment safe for MDTA employees to perform their work

PROJECT: I-95 John F. Kennedy Memorial Highway - JFK Maintenance Facility Complex

**DESCRIPTION:** The complex will include a new Maintenance Building to support office space, common areas, locker/rest rooms, automotive shop/bays, material storage, wash bay, Salt Storage Barns, Fueling Island, Debris Dewatering pad, and Vehicle Storage Structures. Site improvements shall include grading, pavement, drainage, utilities, storm water management, lighting, security, fencing, and landscaping.

**PURPOSE & NEED SUMMARY STATEMENT:** The JFK thruway and approach roadways require continuous maintenance and safety activities to maintain the JFK highway and Hatem bridge in the highest serviceable condition for safe passage of MDTA customers. The JFK Maintenance Facility Complex will provide work areas for the staff and vehicle safety inspections and full service repair shop bays and parts storage.

#### **STATE GOALS :** Maryland Transportation Plan (MTP) Goals/Selection Criteria:

#### PROJECT: I-95 Fort McHenry Tunnel - Port Covington I-95 Access Study

**DESCRIPTION:** The first phase of this project is a comprehensive evaluation of potential improvements to I-95 ramps required to support major planned development on the Port Covington Peninsula located in Baltimore City. Improvements being evaluated include potential changes to the I-95 ramps between Hanover Street and Key Highway.

**PURPOSE & NEED SUMMARY STATEMENT:** A National Environmental Policy Act (NEPA) study is required to determine the potential environmental effects associated with proposed improvements to accommodate anticipated growth while maintaining the functionality of the regional and local transportation system.

#### STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

Enhance Safety and Security Deliver System Quality

X Serve Communities and Support the Economy Promote Environmental Stewardship

**EXPLANATION:** The study will identify preferred infrastructure improvements to support the full development potential of a large area of underutilized land in Baltimore City while maintaining the functionality of the regional transportation system.

#### STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

**Enhance Safety and Security** X Deliver System Quality

X Serve Communities and Support the Economy **Promote Environmental Stewardship** 

EXPLANATION: Changing to cashless tolling at the Fort McHenry Tunnel provides toll collection at highway speeds through the electronic methods of E-ZPass, Pay-By-Plate, and Video Tolling.

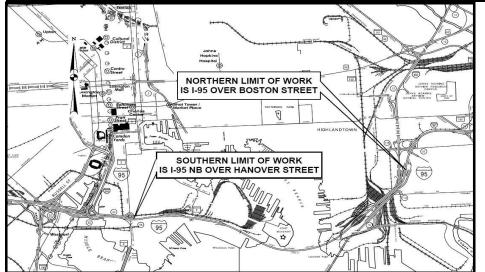

**DESCRIPTION:** Remove the existing toll booths and plaza elements, construct gantry structures, and reconstruct the plaza roadway to convert to cashless tolling; construct underground infrastructure, utilities, stormwater management, signing and marking, and commercial inspection area.

PURPOSE & NEED SUMMARY STATEMENT: Cashless tolling provides toll collection at highway speeds through the electronic methods of E-ZPass and video tolling. The advantages of converting to cashless tolling include reduced travel time; increased safety/reduced crashes; alignment with national practice; improved customer convenience; reduced emissions; and reduction in toll collection and maintenance costs. Cashless tolling has been used successfully at the MDTA's MD 200 Intercounty Connector (ICC) and the I-95 Express Toll Lanes (ETL).

PROJECT: I-95 Fort McHenry Tunnel - FMT Facility-wide Zone Paint Program

**DESCRIPTION:** This is a system preservation project to address areas of structural steel with moderate to advanced section loss and corrosion. The project will provide zone painting to bridges in the areas of higher corrosion to prevent further deterioration.

**PURPOSE & NEED SUMMARY STATEMENT:** The bridge inspections revealed large areas of the structural steel with moderate to advanced section loss particular at the beam ends where there is a roadway joint.

#### STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

Enhance Safety and Security Deliver System Quality Serve Communities and Support the Economy Promote Environmental Stewardship

**EXPLANATION:** The patina protecting the steel is wearing off, therefore cleaning and painting the steel is needed to prevent further deterioration.

PROJECT: I-95 Fort McHenry Tunnel - Rehabilitate FMT Area-Wide Lighting

**DESCRIPTION:** Rehabilitate the Fort McHenry Tunnel area-wide lighting.

vaults and cabinets, junction box covers, and conduit throughout.

#### STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

Enhance Safety and Security Deliver System Quality Serve Communities and Support the Economy Promote Environmental Stewardship

**EXPLANATION:** Cleaning and painting the box girders will preserve and extend their useful life.

PROJECT: I-95 Fort McHenry	v Tunnel - FMT	Box Girder Preservati	ion

**DESCRIPTION:** Clean, paint, and repair deteriorated portions of the FMT box girders, especially the supporting girder ends. Multiple bridges on the FMT facility are supported by hollow girders rectangular or "box" in cross section rather than normal "I" shaped girders. These box girders span multiple support piers spaced along their lengths. The work in this project is to abrasive blast (clean) and paint the areas of steel that are rusted inside and outside the girders.

**PURPOSE & NEED SUMMARY STATEMENT:** The purpose of this project is to remove rust and associated steel deterioration from steel in areas of the FMT "Box" girders by cleaning and painting the rusted areas that were discovered during biennial inspection to preserve the useful life of these girders.

#### PROJECT: I-895 Baltimore Harbor Tunnel Thruway - I-895 Bridge Replacement

**DESCRIPTION:** Replace the elevated portion of the I-895 roadway from the north portal entrance to Holabird Avenue. The rehabilitation of the tunnel deck, liner, and standpipe and sump pump systems have been added to this project. Note: This project was previously named "Replace Canton Viaduct."

**PURPOSE & NEED SUMMARY STATEMENT:** The bridge deck on this structure has not been renovated since 1985. Testing has indicated that portions of the bridge are nearing the end of their life cycle. The bridge deck, substructure, and superstructure are experiencing various degrees of wear. Additional work within the tunnel has been added to the project.

#### STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

Enhance Safety and Security Deliver System Quality Serve Communities and Support the Economy Promote Environmental Stewardship

**EXPLANATION:** The elevated portion of the roadway from the north portal entrance to Holabird Avenue will be replaced because it is nearing the end of its life cycle. Rehabilitation of the tunnel deck, liner, standpipes and sump pumps will extend the useful life of those components.

SMART GROWTH STATUS: Project Not Loca	tion Specific X Not Subject to PFA Law

#### SIGNIFICANT CHANGE FROM FY 2023 - 28 CTP: None.

**PROJECT:** I-895 Baltimore Harbor Tunnel Thruway - Resurfacing North and South of the Baltimore Harbor Tunnel

**DESCRIPTION:** Resurfacing I-895 north and south of Baltimore Harbor Tunnel. The limits of the project are I-895 from the southern junction of I-95 to just north of MD 295 (at the south end of the project) and I-895 from just south of Herring Run to the northern junction of I-95 (northern end of the project).

**PURPOSE & NEED SUMMARY STATEMENT:** This project will perform the required life-cycle pavement resurfacing and rehabilitation along I-895 in order to ensure that the pavement remains in acceptable condition.

PROJECT: US 50/301 Bay Bridge - Deck Rehabilitation and Miscellaneous Modifications

**DESCRIPTION:** Deck rehabilitation of the westbound span of the Bay Bridge includes resurfacing Lane 1 with Latex Modified Concrete (LMC) with the exception of the areas where the deck was already replaced, rehabilitating Lanes 2 and 3 by overlaying with LMC, and patching and sealing the remaining areas where needed. This project also includes replacing the lane use signal gantries (LUSG) mounted on the westbound span which is all the bridge-mounted LUSG with the exception of those mounted on the through truss and suspension towers.

**PURPOSE & NEED SUMMARY STATEMENT:** Inspection of the deck surface revealed the need for rehabilitation including overlays and sealing to extend the service life of the deck.

#### STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

Enhance Safety and Security Deliver System Quality Serve Communities and Support the Economy Promote Environmental Stewardship

**EXPLANATION:** Rehabilitation of the westbound span of the Bay Bridge will improve riding conditions and extend the useful life of the deck.

#### STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

X Enhance Safety and SecurityX Deliver System Quality

X Serve Communities and Support the Economy Promote Environmental Stewardship

**EXPLANATION:** The enhancement of the lane closure and two-way traffic operations system will improve and reduce the response time on the bridge for incidents and construction work.

_	SMART GROWTH STATUS:	Project Not Locati <u>on S</u> pecifi	c X	Not Subject to PFA Law
ſ	Project Inside PFA	Gran	dfathered	i da
ſ	Project Outside PFA	Exce	ption Will	Be Required
ſ	PFA Status Yet to Be Determine	d Exce	ption Gra	nted

**PURPOSE & NEED SUMMARY STATEMENT:** The installation of an automated lane closure system will reduce the response time and improve safety for implementing lane closure and two-way traffic

operations on the bridge for incidents and construction work. The original span opened in July 1952 and

provides a two-lane roadway for eastbound traffic. The parallel structure opened in June 1973 and has

three lanes for westbound travelers. During periods of heavy eastbound traffic, one lane of the

westbound bridge is reversed to carry eastbound travelers ("two-way" traffic operations).

STATUS: Open to service.

PAGE MDTA--22

PROJECT: US 50/301 Bay Bridge - Crossover Automated Lane Closure System

**DESCRIPTION:** The automated lane closure system includes enhanced lane use signals, gantries, pavement markings, dynamic in-pavement lights, dynamic message signs (DMS), and cameras to deploy lane closure and two-way traffic automatically.

#### STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

**Enhance Safety and Security** X Deliver System Quality

X Serve Communities and Support the Economy **Promote Environmental Stewardship** 

EXPLANATION: Changing to cashless tolling at the Bay Bridge provides toll collection at highway speeds through the electronic methods of E-ZPass, Pay-By-Plate, and Video Tolling.

**DESCRIPTION:** Close existing openings between the tunnel beneath the plaza and the toll islands, demolish existing toll islands and plaza elements, and reconstruct US 50/301 at toll plaza to support cashless tolling; install automatic lane controls to improve western shore operational traffic shifts, construct commercial inspection areas, and make environmental management improvements.

PURPOSE & NEED SUMMARY STATEMENT: Cashless tolling provides toll collection at highway speeds through the electronic methods of E-ZPass and video tolling. The advantages of converting to cashless tolling include reduced travel time; increased safety/reduced crashes; alignment with national practice; improved customer convenience; reduced emissions; and reduction in toll collection and maintenance costs. Cashless tolling has been used successfully at the MDTA's MD 200 Intercounty Connector (ICC) and the I-95 Express Toll Lanes (ETL).

IGNIFICANT CHANGE FROM FY 2023 - 28 CTP: None.

PROJECT: US 50/301 Bay Bridge - Project Management Office and Maintenance Equipment Storage Building

**DESCRIPTION:** This project includes the construction of a new Project Management Office and a new Maintenance Equipment Storage Building at the Bay Bridge Campus. Work also includes site utility upgrades including water main, power, fiber, and street lighting to support the new and existing buildings.

PURPOSE & NEED SUMMARY STATEMENT: The Bay Bridge crossing and approach roadways require continuous construction and maintenance activity to maintain the dual bridges in the highest serviceable condition for safe passage of MDTA customers. The Project Management Office will provide work areas for the inspection and contract administration staff. The Maintenance Equipment Storage Building will provide protection for the equipment used by operations staff.

PROJECT: US 50/301 Bay Bridge - Tier 2 NEPA Study

**DESCRIPTION:** The Bay Crossing Study Tier 2 NEPA is the second stage of the two-tiered federally required National Environmental Policy Act (NEPA) process. The Bay Crossing Study Tier 1 NEPA was approved by FHWA in April 2022, identifying Corridor 7, the corridor containing the existing Bay Bridge, as the Selected Corridor Alternative. Tier 2 studies specific alignment, crossing type and potential number of lanes needed within the 2-mile wide, 22-mile long corridor from Severn River Bridge to the US 50/301 split. Tier 2 involves significant public engagement and participation. Project delivery method options will be determined.

**PURPOSE & NEED SUMMARY STATEMENT:** The Bay Crossing Study Tier 2 NEPA is the next step in the strategy to address congestion and future traffic demand crossing the Chesapeake Bay. It must be completed before final design and construction could potentially begin if a build alignment alternative is selected.
