

Maryland Department of Transportation

CONSOLIDATED TRANSPORTATION PROGRAM

2011 State Report on Transportation • FY 2011-2016

Martin O'Malley, Governor
Anthony G. Brown, Lt. Governor
Beverley K. Swaim-Staley, Secretary

Printed on recycled paper

MARYLAND'S CONSOLIDATED TRANSPORTATION PROGRAM

The Consolidated Transportation Program (CTP) is Maryland's six-year capital budget for transportation projects. The Capital Program includes major and minor projects for the Maryland Department of Transportation, its modal agencies – the Maryland Aviation Administration (MAA), Maryland Port Administration (MPA), Motor Vehicle Administration (MVA), State Highway Administration (SHA) and the Maryland Transit Administration (MTA) and related authorities within the Department, including, the Maryland Transportation Authority (MdTA), and Washington Metropolitan Area Transit Authority (WMATA). In this document, you will find a Project Information Form (PIF) for every major project in the state – which includes project details, financial information and construction status as well as a list of minor capital projects. The Maryland Department of Transportation (MDOT) works together with residents, local jurisdictions and local and State delegations to include projects in the CTP that preserve investments, enhance transportation services and improve accessibility throughout the State. In order to help Maryland's citizens review this document, the CTP includes a summary of the Department's financing and budgeting process and instructions for reading Project Information Forms (PIFs).

For further information about this document, please contact the Maryland Department of Transportation, Office of Planning and Capital Programming toll free at 1-888-713-1414, or locally at 410-865-1288. This document also is available online at <http://www.mdot.maryland.gov/Planning>.

For the hearing impaired, Maryland Relay 711.

For more information on Maryland transportation, please visit us on the web at www.mdot.maryland.gov

TABLE OF CONTENTS

Summary of the Consolidated Transportation Program	1
Significant Changes to the FY 2010-2015 CTP	A-1
FY 2010 Accomplishments	A-9
Operating and Capital Program Summary	A-18
Federal Aid Obligations	A-20
System Preservation Minor Projects Program Levels.....	A-23
Major Bridge Projects	A-26
Bicycle and Pedestrian Related Projects.....	A-29
Regional Aviation Grants	A-35
Maryland Base Realignment and Closure (BRAC) Activities	A-37
American Recovery and Reinvestment Act (ARRA) Projects	A-48
The Secretary's Office	TSO-1
Motor Vehicle Administration	MVA-1
Maryland Aviation Administration.....	MAA-1
Maryland Port Administration.....	MPA-1
Maryland Transit Administration.....	MTA-1
Washington Metropolitan Area Transit Authority	WMAT-1
State Highway Administration	SHA-SW-1
Maryland Transportation Authority	MdTA-1
Glossary	GL-1

MARYLAND'S CONSOLIDATED TRANSPORTATION PROGRAM

The Maryland Department of Transportation (MDOT) is pleased to present the State's six-year capital investment program for transportation, the Final FY 2011-2016 Consolidated Transportation Program (CTP). Our transportation system provides Maryland many great benefits, and continued investment is necessary to sustain, enhance and strengthen our quality of life. The CTP is the comprehensive listing of transportation investments to be made by the State of Maryland. This year's CTP is, once again, affected by a complex set of issues, including: the national economic downturn, weak revenues supporting the Transportation Trust Fund, the Base Realignment and Closure (BRAC) process and related growth and environmental issues such as water quality and climate change. These issues require MDOT to be more strategic in how we make decisions regarding future investments. By focusing on our investments as part of the broader sustainability agenda of the Governor's Smart, Green and Growing initiative, MDOT can: address safety and system preservation needs, improve our environment, enhance accessibility and encourage healthier lifestyles while providing more effective, longer-lasting solutions.

Each year, MDOT publishes the State Report on Transportation (SRT). The SRT contains three important documents: the Maryland Transportation Plan (MTP), the Consolidated Transportation Program (CTP) and the annual Attainment Report (AR) on Transportation System Performance. To address Maryland's transportation issues and priorities, MDOT

must undertake new approaches: to planning and design, to construction, to operation and to maintenance of our transportation network.

Major capital projects generally include a new, expanded or significantly improved facility or service that generally involves planning, environmental studies, design, right-of-way acquisition and construction or purchase of essential equipment related to the facility or service.

In 2010, the Maryland General Assembly passed a bill intended to enhance transparency and accountability in the evaluation and selection of proposed major capital projects for the Consolidated Transportation Program (CTP). The resulting Maryland State Law, Chapter 725, requires MDOT and other proposing entities clarify the relationship between their prioritized projects and the overarching state goals for transportation as articulated in the MTP. In addition, full consideration of related goals and policies must be considered in the selection criteria.

This year, you will see some additional information on the Project Information Forms (PIF) for construction projects that respond to elements of this legislation. You also will see some additional information below on the criteria we considered for each of the projects in the Construction Program.

KEY FACTORS AFFECTING PRIORITIZATION

Transportation priorities are influenced by the everyday experience of our network users. Key concerns include:

- Our transportation system is increasingly inefficient due to traffic congestion and dispersed land-use patterns. Over the next 20 years, Maryland's 6.2 million acres of land will be home to 547,000 households, 762,000 jobs and more than 6.6 million people. Maryland's growing population will increase demands on our land, water and air as well as our transportation infrastructure. Developed land consumes about 1.3 million acres of Maryland. Although it took 300 years to develop the first 650,000 acres in our State, it took a mere 30 years to develop the second 650,000 acres.
- Maryland relies heavily upon fees generated from fuel consumption and vehicle purchases to finance its transportation system. The fuel based non-renewable resources will become increasingly scarce in the future. Approximately one-quarter of Maryland's overall energy usage goes toward transportation. Maryland residents

consume more than 448 gallons of gasoline per capita each year, higher than both California (414) and New York (293), but lower than the U.S. average (464).

- Unsafe driving and highway conditions result in death, injury, disability and financial hardship to Maryland citizens. From 1996 to 2005, more than 6,000 people died on Maryland roads and highways and more than 600,000 were injured at a cost of more than \$4.5 billion annually. MDOT's State Highway Administration (SHA) set a goal to reduce annual motor vehicle injuries to fewer than 50,000 by 2010. The state reached this goal in 2008 when it recorded 48,143 injuries and 592 deaths on all roads in Maryland. Maryland is making progress on its continual daily efforts to make our roads as safe as possible.
- Until 2008, Vehicle Miles Traveled (VMT) had increased every year since World War II. Drivers in Maryland traveled 57 billion vehicle miles in 2006. This figure represents a 40% increase in VMT from 1990, outpacing growth in both population (17%) and new lane miles (8%) during the same time period. Such a significant increase in driving strains Maryland's transportation system, its economy and its environment. MDOT is focused on moving people, not just vehicles throughout Maryland by providing a transportation system that accommodates all users, including: vehicles, transit riders, freight shippers, bicyclists and pedestrians.
- MDOT places a high priority on allocating funds toward safety and system preservation. The MTP and the CTP both reflect significant investments in operational improvements to the transportation system, bridge program, highway and runway resurfacing, rail car overhauls and replacements, bus replacements and facility upkeep. SHA is focused on reducing the number of structurally deficient bridges in the state and on maintaining a strong highway system that ensures safe travel for all Maryland motorists.
- The Environmental Protection Agency has established a "pollution budget" for the Chesapeake Bay and its tributary rivers, that will regulate the amount of certain pollutants that can be discharged to the waters of the Bay states. Paved urban areas, including highways and other transportation facilities, represent a significant source of those pollutants. MDOT will play a significant role in the Bay restoration effort by treating stormwater runoff from both new infrastructure and from facilities built before the regulation of stormwater.
- Marylanders are growing older. By 2030, the percentage of the population over age 65 is expected to grow to nearly 20% from just 7.6% in 1970.

- With Maryland's population increasing and the average household size decreasing, we will need more homes to house us. Improvements to transportation infrastructure and differences in housing costs and consumer demand means that residential development and employment are becoming increasingly dispersed.
- As people become more mobile and the demand for goods movement grows, congestion is increasing.
- By 2026, the number of licensed drivers is expected to increase in Maryland by more than 23% and the number of registered vehicles is expected to increase by 40%.

ESTABLISHING TRANSPORTATION PRIORITIES

The 2009 Maryland Transportation Plan establishes a 20-year vision for a world-class multimodal system. It outlines key Statewide transportation policies and identifies five long-term goals to guide investment decisions. As of 2010, Maryland State Law Chapter 725 requires that requests for project funding include an explanation of how the projects will contribute to these statewide goals. A description of each of the five goals is included below:

- **Quality of Service:** Enhance users' access to and positive experience with all MDOT transportation services;
- **Safety and Security:** Provide transportation assets that maximize personal safety and security in all situations;
- **System Preservation and Performance:** Protect Maryland's investment in its transportation system to preserve existing assets and maximize the efficient use of resources and infrastructure;
- **Environmental Stewardship:** Develop transportation policies and initiatives that protect the natural, community and historic resources of the State and that encourage development in areas best able to support growth; and
- **Connectivity for Daily Life:** Support continued economic growth in the State through strategic investments in a balanced, multimodal transportation system.

Alongside each of its goals, the State has established a concrete set of objectives that represent measurable benchmarks for achievement. In order to assess achievement, MDOT collects data, sets targets and measures performance in a number of categories related to the five transportation goals and publishes this information in its annual Attainment Report.

While the state's long-term transportation goals are a fundamental component in establishing priorities for the annual CTP, there are several other influences guiding and directing the state's transportation system.

Transportation planning and programming in Maryland is shaped by an array of Federal laws, regulations and policies, including the Safe, Accountable, Flexible and Efficient Transportation Equity Act: a Legacy for Users (SAFETEA-LU) of 2005 – commonly known as the federal transportation bill – and the Clean Air Act Amendments of 1990. In 2009, Congress acted to prevent a Highway Trust Fund shortfall through temporary legislation. Although Congress has not yet passed a new long-term federal transportation bill, Maryland remains committed to being part of the national ongoing dialogue to ensure federal transportation funding continues uninterrupted. Under the 1990 Clean Air Act amendments, the federal government mandates strict pollution standards to monitor emissions and requires emissions reductions in areas that are not in compliance with the standards.

Transportation priorities in Maryland's major metropolitan areas also are shaped by six federally-established Metropolitan Planning Organizations (MPOs) that coordinate transportation investments and develop regional plans. The State's six MPOs include the Baltimore Regional Transportation Board (BRTB), Cumberland MPO, Hagerstown-Eastern

Panhandle MPO (HEPMPO), National Capital Region Transportation Planning Board (TPB), Salisbury/Wicomico Area MPO and Wilmington Area Planning Council.

MDOT and its modal administrations work closely with Maryland's local governments on developing the capital program. In addition to reviewing county priority letters, outlining local transportation priorities, the Secretary meets with each of the 24 local jurisdictions individually every fall. This set of meetings, also known as the CTP Tour, allows the Secretary to have a dialogue in person with the local governments and citizens and provides an opportunity to discuss a variety of issues that impact transportation investments. In addition to giving local officials an opportunity to voice their priorities directly with the Secretary, these meetings also allow the public to shape the CTP and express interest, concern or consensus about particular projects. MDOT takes pride in listening to feedback from its customers. We consider all this local input when revising the CTP before it is submitted to the Governor and then the legislature in January.

UNDERSTANDING OUR PRIORITIES

This year's CTP is influenced by a variety of issues, ideas and realities, including: the goals of the Maryland Transportation Plan, federal and state mandates related to transportation, interests and concerns of local governments and the public and the vision of the O'Malley-Brown Administration. Guided by these considerations, MDOT has worked to establish a clear set of priorities that represent a core focus of the State's transportation program.

While MDOT places a strong emphasis on these priorities, our economic challenges continue to limit resources and to require the Department to make tough decisions about how to invest public dollars in the most efficient and cost-effective way. Given the current issues and constraints, MDOT views the following as our transportation priorities:

Priority: System Preservation & Safety

MDOT continues to place a high priority on allocating funds toward system preservation and safety. The MTP and the CTP both reflect significant investments in the bridge program, road and runway resurfacing, rail car overhauls and replacements, bus replacements and facility upkeep. A key area of focus is the condition of bridges across Maryland. The State Highway Administration continues to make significant progress in reducing the number of structurally deficient bridges on the state's highway system to ensure safe travel for Maryland motorists and other system users.

Priority: Transit Improvements

Maryland citizens, businesses and visitors need a dependable and affordable means to get to and from work, school or other activities each day. A good public transit network will help working families keep more money in the bank by providing them less expensive transportation options. A good public transit system will help address global climate

change and will serve as a focus for the State's Smart, Green and Growing initiatives. When people choose to ride public transportation, it translates into fewer cars on the road, fewer emissions in the air and a healthier environment. That is why the O'Malley/Brown Administration is committed to doubling transit ridership by 2020. The State of Maryland also provides funding for transit in rural areas, small cities and metropolitan regions. For longer commutes, MDOT provides MARC Train and Commuter Bus services to downtown Baltimore and Washington, D.C.

The O'Malley/Brown Administration is aggressively moving forward with new transit initiatives designed to meet current and future demand in both the Washington and Baltimore regions. The next generation of transit includes the Purple Line and Corridor Cities Transitway in the Washington region and the Red Line Transitway in the Baltimore region.

Governor O'Malley selected locally preferred alternatives for both the Red Line and the Purple Line, and this final CTP includes \$90 million in additional State funding for the preliminary engineering and final design phases for both projects. This new funding is a demonstration of the State's commitment to provide the matching funds for future federal New Starts funds. The Baltimore Red Line is a 14.5-mile, east-west light rail line that will connect Woodlawn to the west and the Johns Hopkins Bayview Medical Center to the east. The Red Line links the existing Baltimore Light Rail system, MARC stations, the Baltimore Metro subway and local bus routes to create a comprehensive regional transit network that is unprecedented in the Baltimore region. It will provide the region's first cross-town rail route and tie the City and suburbs together serving existing residential neighborhoods and employment centers. It also will support emerging new development at locations such as Harbor East, Canton Crossing and Uplands. The presence of the Red Line has the potential to spur revitalization efforts at Security Square Mall, Edmondson Village, Highlandtown, Greektown and around the West Baltimore MARC station. By linking with the MARC system, the Red Line will improve access to Washington, D.C. and to growing BRAC-related job opportunities at Fort Meade and Aberdeen.

The Purple Line is a light rail line serving a 16-mile east-west corridor between New Carrollton in Prince George's County and Bethesda in Montgomery County. On the eastern end, it will operate along the Montgomery County Master Plan's Georgetown Branch alignment, where innovative design techniques will be used to allow the hiker-biker trail and the Purple Line to coexist in a community-friendly-manner. The Purple Line will directly serve local communities and provide an important link to other transit services, particularly both branches of the Metrorail Red Line as well as the Green and Orange lines; MARC's Brunswick, Camden and Penn lines and local bus services.

Priority: Smart, Green and Growing

The O'Malley/Brown Administration has given new energy and focus to Maryland's Smart Growth legacy by launching the Smart, Green and Growing initiative and by supporting the Sustainable Communities Act, passed by the Maryland General Assembly in 2010. These statewide initiatives provide a framework for addressing transportation challenges and for coordinating with other stakeholders toward smarter and more sustainable patterns of future growth. This renewed focus has enabled MDOT to promote new measures and mechanisms: to encourage rideshare, telework and other commuter options; to establish a broader sustainability agenda to address emissions and other environmental impacts; and to coordinate with other agencies and partners to more strategically leverage investment. The Smart, Green and Growing Initiative also has encouraged the preservation of resource lands, the revitalization of existing communities and the promotion of compact, mixed-use development near existing and planned transit stations.

State law also requires MDOT to work closely with other State agencies to evaluate projects in terms of their compliance with the Smart Growth and Neighborhood Conservation acts. MDOT uses the State Report on Transportation process to help define and achieve smart growth goals. As part of its smart growth responsibilities, MDOT is strengthening the links between land use and transportation planning, through the strategic management of infrastructure investments.

MDOT has devoted particular attention to achieving Governor O'Malley's goals for increasing transit ridership. This effort has focused on improving existing services, and planning for system expansion. A key to driving transit ridership is transit oriented development. Through our involvement in the Task Force for the Future for Growth and Development in Maryland, as well as our anticipated coordination with the Sustainable Growth Commission, MDOT continues to work toward programs and policies that enhance accessibility and promote transportation alternatives such as biking, walking and transit. Governor O'Malley's first ever statewide trails plan, "*Maryland*" A Greener Way to Go" will serve as an additional guide to moving these efforts forward.

Priority: Transit-Oriented Development (TOD)

Transit-oriented development (TOD) is a key component of our efforts to ensure efficient use of our transportation system to promote sustainable, smart growth development for the State. A development that is "transit-oriented" is typically comprised of a mixture of land uses generally configured and oriented to maximize visibility and access to the transit station. TOD projects design street networks and parking to ensure the safety and comfort of pedestrians and bicyclists, while ensuring efficient traffic flow to automobiles, buses and

carpoolers. TOD will help ensure that Maryland residents achieve maximum benefit for their investment in transit and related transportation infrastructure. By contributing to transit ridership, TOD can reduce highway congestion, greenhouse gas emissions and sprawl.

MDOT works with State, local and private partners to support TOD through: pre-development planning, policy and program support; joint development partnerships, infrastructure investments and other project support. The Department has an active program of TOD planning and joint-development projects, spanning multiple jurisdictions and station types. MDOT also works with other agencies and local jurisdictions to help identify additional TOD opportunities and to promote principles of TOD through transit-supportive, land-use policies.

In 2010, the O'Malley/Brown Administration took further action to promote TOD as part of its Smart, Green, and Growing initiative by officially designating 14 transit stations as Transit-Oriented Developments. As announced in June 2010, these station areas are to be developed as integral elements of the state's overarching transportation agenda. They also will benefit from legislation which makes it easier for both state and local agencies to coordinate and advance their respective TOD agendas. For example, these designated TOD sites will be eligible to take advantage of 2009 legislation that grants many local governments greater flexibility to use existing tax increment financing (TIF) and special taxing district powers to finance these projects.

Under the 2010 Sustainable Communities Act, these 14 designated TODs are considered Sustainable Communities, and will, thereby, gain more ready access to other state programs. This designation also ensures general oversight by an expanded Smart Growth Sub-Cabinet.

Priority: Natural Environment

MDOT recognizes the need to work within a framework of ecological boundaries. As our climate changes, those boundaries will continue to change. Our commitment to Environmental Stewardship is one aspect of a larger commitment to a more sustainable future. That future will require our transportation system to be resilient and our strategies for the protection of our natural, cultural and community resources to be forward-looking and adaptive.

By coordinating land-use, transportation and resource planning with partners in other agencies and local governments, MDOT will ensure the investments we make will meet multiple needs for the citizens of Maryland.

The goal of environmental stewardship is to pursue projects and operate our system in ways that improve and restore environmental conditions. By increasing transit ridership and supporting greater use of ridesharing, telecommuting, biking, walking and intercity passenger rail, we will improve Maryland's environment by reducing the use of fossil fuels, lowering greenhouse gas emissions and reducing the need for more paved surfaces.

Using the State's Green Infrastructure Plan and Chesapeake Bay Restoration priorities as a guide, MDOT agencies can minimize negative impacts and use project mitigation to support

the State's broader conservation goals. Retrofitting older parts of the transportation network with the latest stormwater management technology moves the State closer to meeting our water quality targets.

SHA goes above and beyond required mitigation in its efforts to restore the Chesapeake Bay and to improve air quality. In addition to participating in the Governor's "One Million Trees" planting initiative, SHA recently has more than doubled the number of wetlands created through environmental stewardship, restored miles of streams, planted natural vegetation and wildflowers along roadsides, and become nationally known for using goats to mow to reduce emissions and protect small wildlife. The planting initiatives support Bay restoration by improving water quality and increasing Maryland's forest cover, thereby aiding in carbon sequestration.

Priority: Climate Change, Air Quality & Energy

MDOT is working to address Climate Change issues, reduce air emissions and manage energy consumption related to the transportation industry. As an active member of both the State's Climate Change Commission and its Energy Outlook Task Force, MDOT continues to improve its public transportation network to provide an alternative to single occupant vehicles. The State is also demonstrating its dedication to reducing the transportation sector's emissions by employing: electric-based transit modes, hybrid-electric bus technology and hybrid and flex-fuel vehicles. With the passage of the Clean Car legislation in 2007, the State has adopted the cleaner California car standards beginning with the 2011 model year. MDOT also is working with other state departments of transportation and environmental agencies to assess the possibility of installing electric vehicle recharging stations across the northeastern United States. MDOT will be installing electric vehicle recharging stations for public use at several locations including BWI Marshall Airport and a park and ride lot near I-95 north of Baltimore City. By paving the way for broader usage of cleaner vehicles, these efforts will help us reduce greenhouse gas emissions (GHG) and contribute to our long-term efforts to fight climate change. MDOT uses a variety of Travel Demand Management (TDM) strategies to support alternatives to driving alone and to limit emissions from the transportation sector. TDM efforts can also help reduce congestion, lower commuting costs, and improve air quality. Some of these efforts are: carpooling, car sharing, transit, teleworking, and variable pricing infrastructure.

MDOT is implementing these strategies in cooperation with our partners in the metropolitan planning organizations, the Maryland Department of the Environment and local governments. We are evaluating further implementation strategies to reduce GHG emissions in accordance with the goals of the Climate Change Commission's GHG Emission Reduction Report.

Priority: BRAC

In the fall of 2005, Congress approved a set of recommendations to realign and reposition numerous military bases in the United States. The Base Realignment and Closure (BRAC) effort is scheduled to take full effect by September 2011, and Maryland is one of a few states that will gain additional military and civilian positions as a result. An estimated 40,000 to 60,000 direct, indirect and induced jobs are projected to arrive in Maryland over the next 10 years in connection with BRAC. Fort George G. Meade (FGGM), Aberdeen Proving Ground (APG) and the National Naval Medical Center (NNMC) at Bethesda will gain most of these positions. Other installations, including Joint Base Andrews Naval Air Facility and Fort Detrick, also are expected to see significant increases in personnel stemming from BRAC and non-BRAC related growth.

Under the leadership of Governor O'Malley and Lt. Governor Brown, State and local agencies have collaborated to ensure that Maryland can accommodate anticipated growth in a manner that preserves and enhances our State's resources and our citizens' quality of life. In 2007, Governor O'Malley created the BRAC Subcabinet, chaired by the Lt. Governor, to oversee the State's BRAC preparations. MDOT's work is performed in concert with the Subcabinet and is documented in a dedicated section of the State of Maryland's BRAC Action Plan, which outlines policies, projects and legislation necessary for Maryland to effectively prepare for BRAC. Since its adoption, MDOT has tracked appropriate performance measures as part of the State's BRAC Stat monitoring program.

To address transportation impacts associated with BRAC, MDOT has coordinated with local governments, military installations, and our regional, State and federal partners. Given the limited time and funding available to advance improvements, MDOT has employed a “high/low” investment strategy aimed at implementing both short-term (“low”) capital projects, such as key intersection improvements, transit projects, and transportation demand management programs. At the same time we have been developing long-term (“high”), higher cost initiatives. These more expensive projects include long-term corridor improvements near military installations, transit oriented development, the MARC Growth and Investment Plan, and other major capital improvements that project to support BRAC, regional and statewide growth.

As part of this effort, MDOT has assisted local governments in evaluating BRAC-related transportation projects in the context of overall needs and long-term planning initiatives. We also have collaborated with stakeholder groups at each of the impacted military installations to develop a schedule of priority projects to implement based on current, as well as potential future, available funding. MDOT continues to work with its partners to advance priority projects in concert with the scheduled BRAC consolidations, and to collaborate in identifying and procuring additional programming dollars.

The transportation section of the State BRAC Action Plan (see www.brac.maryland.gov) contains more detailed information concerning MDOT's BRAC initiatives.

Priority: Freight

Freight activity in Maryland is expected to double by 2030. The state's location at the geographic epicenter of the I-95 Corridor means that the expected growth in freight will produce significant capacity constraints to traffic on highways and railways. While freight is expected to grow, chokepoints and aging infrastructure are impacting Maryland and the entire Northeast Corridor (NEC) and impeding the current flow of freight. These chokepoints create significant challenges for freight movement in the region, and can also have significant impacts on passenger rail operations for the NEC and, locally, for MARC commuter rail operations and capacity. We must address these challenges in order to accommodate freight demand and allow for the cost-effective and safe movement of goods by waterborne, rail, air and motor carrier providers.

To meet these needs, MDOT is taking an aggressive approach to implementing multimodal freight solutions in Maryland and the greater multi-state region. MDOT recognizes the multimodal and shared infrastructure nature of freight and passenger facilities. In order to better coordinate planning and policy, MDOT revised its Office of Freight Logistics to the newly named Office of Freight and Multimodalism (OFM) to combine freight and passenger focus under one division. This office, along with other MDOT offices and modal administrations,

is cultivating partnerships with neighboring states, freight stakeholders and nonprofits, and is participating in freight studies with groups such as the I-95 Corridor Coalition.

By developing these partnerships and increasing coordination with stakeholders, MDOT has been able to secure federal support through economic stimulus funds. These funds have supported major rail projects and helped the State implement elements of the Statewide Freight Plan and a State Rail Plan. Maryland continues to lead freight planning efforts nationwide by being one of the first states to address land use issues in freight and by creating a standing Freight Stakeholder Advisory Committee (FSAC). This committee includes industry representatives from freight and logistics entities that review freight planning and policy activities and provide advice on legislation and projects.

Priority: Economic Recovery and Stabilization

The National economic downturn is continuing to cause concerns across the Country. While Maryland is better off than some other states, it struggles with difficult economic challenges. In response to the economic crisis facing our nation, Congress passed and on February 17, 2009 President Barack Obama signed into law the American Recovery and Reinvestment Act (ARRA). The intent of the law is to preserve and support jobs; to provide tax cuts for working families in Maryland and throughout our nation; and to invest in America's public education system, and in roads, bridges, tunnels, and the green technologies of tomorrow.

As part of ARRA, Maryland is receiving \$4 billion. Of this total amount, \$638 million is directed toward formula funding for transportation in Maryland. Highways is receiving \$414 million – \$317 million for state highway projects and \$97 million for local roadway projects. Transit is receiving \$224 million – \$108 million for MTA projects, \$44 million for local transit system projects and \$72 million for WMATA improvements in Maryland. The WMATA system directly receives a total of \$201 million for projects throughout the Washington, D.C. region.

Maryland also received numerous discretionary grants through ARRA. Shortly after the legislation was passed, US DOT awarded \$15 million in grant funding to BWI Airport for apron resurfacing. More recently Maryland received \$60.0 million in design funds to replace the Baltimore and Potomac Tunnel and \$9.4 million for a new platform and fourth track at BWI Rail Station. As part of a Washington Area Transportation Planning Board application, Maryland received \$12.3 million to construct the Takoma/Langley Transit Center and \$2.5 million for priority bus corridor enhancements in Prince George's and Montgomery counties. Smaller grants were awarded to Baltimore City for their water taxi service, to MTA for greenhouse gas and energy reduction improvements and to MPA for port security work totaling \$3.4 million. MPA and SHA also received grants through the US Environmental Protection Agency ARRA grants for \$3.75 million. Additional information ARRA funded projects is on page A-48 and is designated on the individual project pages throughout the CTP.

In order to create the greatest economic benefit, to keep Marylanders working and to continue to improve the State's transportation network, MDOT is working to spend federal money as quickly as possible while preserving its capital program.

CRITERIA

Chapter 725 in Maryland State Law, which was adopted in 2010, creates new standards for how the Department evaluates proposed major capital projects for the Construction Program of the Consolidated Transportation Program (CTP). This new law is intended to provide additional transparency and accountability by providing more information about the Department's process for evaluating projects and by clarifying the role of the statewide transportation goals in this process. Under State Law, MDOT's evaluations are to be based on project purpose, need, and manner in which the project addresses state transportation goals and supports local government land use plan goals. Major capital projects include a new, expanded or significantly improved facility or service that generally involves planning, environmental studies, design, right-of-way acquisition, construction or purchase of essential equipment related to the facility or service. MDOT used the following

set of goals, outlined in the State's adopted Transportation Plan to evaluate and to examine projects for their inclusion in the Construction Program.

1. Quality of Service:

- How will a project address Quality of Service? This can include reduction in travel time or delay, or increase in travel time reliability for non-motorized travelers, private vehicle users, transit users and/or freight/commercial users.

2. Safety & Security:

- How will a project reduce collision and injury rates for non-motorized travelers, private vehicle users, transit users and/or freight/commercial users?
- How will a project provide additional security against terrorist or unlawful activity losses for private vehicles users or freight transportation?
- How will a project enhance the capability of the transportation system to handle emergency events?

3. System Preservation & Performance:

- What are the current physical conditions of a transportation link, and how critical is it to the integrity of the transportation network?
- How will a project reduce congestion or increase person throughput (person moving per hour by all modes)? Will a project reduce (public) costs of operation or maintenance based on more optimal location?
- Why is a project considered to be the most cost effective and sustainable long-term solution?

4. Environmental Stewardship:

- How does a project encourage Smart Growth development (higher density, mixed use, transit oriented, pedestrian friendly)?
- How does a project support redevelopment/reinvestment in existing communities or brownfield areas, making use of existing infrastructure?
- To what extent will a project protect rural, agricultural, or other sensitive/protected lands and/or natural or cultural resources?
- What might be the medium to long term impact of a project on land use, trip lengths, vehicle miles traveled (VMT) and emissions (sustainability)?

5. Connectivity for Daily Life:

- Why is a project critical to the movement of freight and goods?
- How might a project improve connectivity between modes?
- How might a project increase access to jobs and services within the community?

FINANCING MARYLAND'S TRANSPORTATION PRIORITIES

In developing the CTP and establishing funding levels, the Secretary and MDOT must account for both State and local economic growth, projections of state transportation revenue and allocations of federal funding. The State's Transportation Trust Fund supports MDOT investments through a dedicated account. Being heavily influenced by State and national economic performance, the Trust Fund has experienced a number of funding challenges in recent years that have deeply impacted the Department's decision-making process. While there remains some uncertainty regarding the status of federal transportation legislation, Maryland continues to work with the federal government and to rely on it as an important source of funding. MDOT is committed to working with available resources

and investing in a most cost-effective, responsible manner that will constantly improve our transportation system while respecting our state's fiscal challenges.

STATE REVENUE PROJECTIONS

Over the last few years, MDOT has had to assume a very different revenue picture to develop the Consolidated Transportation Program (CTP). The nationwide economic downturn continues to have an enormous impact on the revenue projections for both the State of Maryland and for MDOT. Despite these challenges, Maryland's transportation system has felt less impact from the revenue decline than many other states, because Governor Martin O'Malley successfully sought and obtained an increase in transportation revenue in 2007. The revenue added has allowed for capital investments already under construction to continue and support some safety and system preservation projects, but to a much lesser extent than expected.

Thanks to Governor O'Malley's efforts and to the ARRA formula and discretionary funding, we have been able to maintain a \$9.5 billion six-year capital program and continue funding many of our safety and system preservation projects. Nevertheless, MDOT has reduced its revenue projections in response to the economic downturn. Outside of the ARRA funded projects, only the Red and Purple transit lines had funds increased in this year's CTP.

Total projected revenues amount to \$20.0 billion for the six-year period. This estimate is based on the revenue sources used by MDOT and includes bond proceeds and federal

funds that will be used for operating, capital and debt payment expenses. The projection does not assume any future State tax or fee increases beyond those changes enacted in prior sessions.

Pertinent details are as follows:

- **Opening Balance:** MDOT's goal is to maintain a \$100 million fund balance over the program period to accommodate working cash flow requirements throughout the year.
- **Motor Vehicle Fuel Tax:** This revenue is projected to be \$3.1 billion over the six year period. Motor fuel taxes include the 23.5 cents per gallon gasoline and the 24.25 cents per gallon diesel fuel.
- **Motor Vehicle Titling Tax:** This source is projected to yield \$3.6 billion. The titling tax of 6.0 percent of the fair market value of motor vehicles, less an allowance for trade-in vehicles, is applied to new and used vehicles sold and to vehicles of new residents. This revenue source follows the cycle of auto sales with periods of decline and growth. Although vehicle sales have been in a down cycle, it is projected that this six-year planning period will follow a normal business cycle around an underlying upward trend.
- **In calendar year 2009 U.S. light vehicle sales hit a 27-year low.** Forecasts for 2010 sales are calling for an increase of 11-12% over the 2009 level. After declining in the past three fiscal years, titling tax revenues appear to be stabilizing and starting to recover.
- **Motor Vehicle Registration/Miscellaneous, and Other Fees:** These fees are projected to generate \$2.7 billion. This forecast assumes revenues will increase an average of 3.0 percent every two-year cycle.
- **Sales and Use Tax:** Beginning in fiscal year 2009, MDOT is receiving a portion of the 6.0 percent general sales and use tax. For fiscal years 2009 – 2013, MDOT's portion is 5.3 percent. The portion increases to 6.5 percent for fiscal year 2014 and beyond. The transportation share of this revenue is estimated to be \$1.5 billion.
- **Corporate Income Tax:** The transportation share of corporate income tax revenues is estimated to be \$808 million. MDOT receives a portion (20.4 percent) of the 8.25 percent corporate income tax.

- **Federal Aid:** This source is projected to contribute \$4.0 billion for operating and capital programs. This amount does not include \$610 million received directly by the Washington Metropolitan Area Transit Authority (WMATA). The majority of federal aid is capital; only \$530 million is for operating assistance. Since federal aid supports a significant portion of the capital program, a more detailed discussion of federal aid assumptions is presented in the next section of this summary.
- **Operating Revenues:** These revenues are projected to provide a six-year total of \$2.4 billion, with \$833 million from MTA; \$273 million from MPA; and \$1.3 billion from MAA. MTA revenues primarily include rail and bus fares. MPA revenues include terminal operations, the World Trade Center, and other Port-related revenues. MAA revenues include flight activities, rent and user fees, parking, airport concessions, and other aviation-related fees.
- **Bond Proceeds:** It is projected that \$1.6 billion of bonds will be sold in the six-year period. The level of bonds that could be issued is dependent on the net revenues of MDOT. This level of bonds is affordable within the financial parameters used by MDOT.
- **Other Sources:** The remaining sources are projected to provide \$340 million. These sources include earned interest from trust funds, reimbursements, and miscellaneous revenues.

FEDERAL AID ASSUMPTIONS

The Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) Act authorized highway, transit, rail and safety programs through Federal Fiscal Year (FFY) 2009. SAFETEA-LU provided \$286.5 billion nationally over six years and has been extended by Congress from September 30, 2009, until March 4, 2011, while it debates the policies and financing mechanisms to be contained in the next act. Since FFY 2004, Maryland has received approximately \$585 million annually for highways and \$140 million annually for transit formula programs (including WMATA's allocation for Maryland service).

It is important to note that not all of the funding authorized in the surface transportation legislation is necessarily new or additive money for Maryland. Our Consolidated Transportation Program (CTP) allocates federal funds to projects in the Program based on conservative projections for future federal funding. The majority of funds authorized by SAFETEA-LU were used for projects already committed in our capital program and for unfunded system preservation needs.

Continued delays in the enactment of the next surface transportation authorization bill and the uncertainty over the long-term solvency of the federal Highway Trust Fund (HTF) have constrained MDOT's ability to adequately plan for future investments throughout the State. Although Congress recently added \$19.5 billion in general funds to the HTF in order to protect against a projected shortfall in FFY 2010, forecasts indicate that the HTF will not be able to sustain existing levels of funding; thus another infusion of funds may be required to keep the HTF solvent in FFY 2011. If Congress is unable to find the revenue to prevent such a deficit, they will be forced to reduce the amount of federal aid provided to states. This action would have a dramatic impact on programs that are currently funded in the CTP.

Highways

Federal highway programs are authorized by multiple-year legislation. The funds authorized and apportioned to the states are subject to annual ceilings, which determine how much of the authorized money can be obligated in any given year. This ceiling is referred to as Obligation Authority (OA) and is imposed by Congress annually in response to prevailing economic policy. Under SAFETEA-LU, OA has ranged from 84 percent to 93 percent. Given fiscal concerns with the soundness of the Federal Highway Trust Fund, this CTP assumes an OA level of 93 percent for FFY 2010, an OA level of 85 percent for FFY 2011 and 80 percent for the remaining years.

Transit

Between 50 and 70 percent of Maryland's federal transit funds are distributed by formula, depending on the amount of discretionary earmarks for Maryland buses, bus facilities and New Start (major system expansion) projects. In the absence of new authorization legislation, we must assume the same funding levels authorized by SAFETEA-LU for FFY 2011. As such, FTA Urbanized Area capital assistance for Baltimore, MARC, D.C. area and Small Urban Systems is estimated at \$81.5 million for FFY11. Rail modernization funding for Maryland is estimated at \$36.8 million in FFY 2011.

SAFETEA-LU authorized \$105 million for the Baltimore Red Line and Green Line Transit projects. Additional New Start projects authorized in SAFETEA-LU include the Corridor Cities Transitway (CCT), the Purple Line and the Silver Spring Transit Center. MDOT has applied for the authorization of four New Starts projects in the next authorization – Baltimore Red Line; Baltimore Green Line; Purple Line; and the CCT. If these projects are authorized and approved, New Start transit projects will require an earmark in the annual appropriations act in order to obtain discretionary federal funding. Maryland received an earmark of \$3.0 million each for the Red Line and the Purple Line in New Starts funds in FFY 2010.

Congress earmarked \$1.25 million in bus discretionary funds for Southern Maryland commuter bus facilities in FFY 2010.

Washington Metropolitan Area Transit Authority — WMATA

WMATA receives federal formula funds (80 percent federal share) for bus and rail preservation activities. Federal funding for construction of the Addison Road to Largo Extension of the Washington Metro was completed in FFY 2005. Funding for rail cars related to the extension was completed in FY 2009.

Congress recently passed legislation amending the National Capital Transportation Act of 1969 to authorize additional federal contributions for rehabilitation and replacement of capital for the WMATA system. This legislation authorizes up to \$1.5 billion of federal money over 10 years. These federal funds need to be equally matched by Maryland, Virginia and the District of Columbia. MDOT has been fully supportive of the effort to secure additional financial resources for the Nation's transit system. To this end, this CTP includes a total of \$300 million (\$50 million each year in federal fiscal years 2011 through 2016) as Maryland's initial matching contribution required by the federal legislation. As required by the Act, all three jurisdictions passed identical amendments to the WMATA Compact; these amendments were ratified by Congress; and the President signed the amendments into law on August 19, 2009.

Aviation

The Federal Aviation Administration (FAA), through the Airport Improvement Program (AIP), provides federal entitlement and discretionary funding for airport projects. It is assumed that entitlement funding is calculated using enplanement and cargo-based formulas for the Baltimore Washington Thurgood Marshall International Airport (BWI).

Airport funding will total \$3.5 to \$4.0 million per year for the six-year program period. This level of entitlement is the net amount after reductions made due to BWI's ability to collect a \$4.50 Passenger Facility Charge (PFC).

The Maryland Aviation Administration (MAA) anticipates receipt of additional discretionary AIP funding for BWI and Martin State Airports during the six-year program period. FAA plans to financially support funding needs for the Runway Safety Areas. Following an environmental assessment to determine the viable options, these improvements must be completed by 2015. If anticipated discretionary funds are not forthcoming, the schedule of impacted projects will be adjusted accordingly.

Congress is currently working on the reauthorization of FAA programs, including the AIP program. Under consideration is an increase in overall AIP program funding, and a possible increase in the PFC to \$7.00. The MAA and MDOT support these proposals and will continue to work with Congress to meet Maryland's needs.

WHERE THE MONEY COMES FROM...

Maryland's transportation system is funded through several dedicated taxes and fees, federal aid, operating revenues, and bond sales, that are assigned to the Transportation Trust Fund. This fund is separate from the State's General Fund, which pays for most other State government operations and programs. MDOT's customers pay user fees for transportation infrastructure and services through motor fuel taxes, vehicle titling taxes, registration fees, operating revenues, sales and use taxes and corporate income taxes. The motor fuel tax and vehicle titling tax are the two largest sources of MDOT revenue. Operating revenues include transit fares and usage fees generated at the Port of Baltimore and the BWI Thurgood Marshall Airport. In addition to collecting revenue within the state, Maryland also receives federal aid for its transportation program. These federal funds must be authorized by a congressional act. The United States Congress last enacted long-term federal surface transportation authorizing legislation in August 2005. The current act expired on September 30, 2009, but has been extended by Congress to allow for continued investment in transportation infrastructure.

Total projected Trust Fund revenues amount to \$20.0 billion for the six-year period covered by this CTP. These amounts are based on the assumption that the economy will continue to recover and continue along a moderate growth scenario for the next six years.

Where The Money Comes From

WHERE THE MONEY GOES...

The MDOT program is fiscally constrained, meaning that the list of projects is tied to estimates of future revenue. The Trust Fund supports operation and maintenance of State transportation systems, administration, debt service and capital projects. A portion of these funds are directed to the General Fund and a share is also dispersed among Maryland's counties and Baltimore City for local transportation needs. After operating costs, debt service, and local distributions, the remaining money goes toward funding capital projects. This document, Maryland's CTP, is the six-year capital budget for all State transportation projects. This FY 2011-2016 CTP totals about \$9.5 billion; \$8.5 billion of which comes through the Trust Fund and \$1.0 billion from "Other" fund sources.

Where The Money Goes

Capital Expenditures

FY 2011-2016 CTP SUMMARY (\$ MILLIONS)					
	STATE FUNDS	FEDERAL AID	OTHER *	TOTAL	PERCENT OF TOTAL

* Funds not received through the Trust Fund. Includes some funds from Maryland Transportation Authority (MdTA), Passenger Facility Charges (PFC), Customer Facility Charges (CFC), Maryland Economic Development Corporation (MEDCO) and federal funds received directly by WMATA.

** Projects using non-trust fund financing sources are included in the total.

TSO – Transportation Secretary's Office
MVA – Motor Vehicle Administration
MAA – Maryland Aviation Administration
MPA – Maryland Port Administration
MTA – Maryland Transit Administration
WMATA – Washington Metropolitan Area Transit Authority
SHA – State Highway Administration

EVALUATING OUR PERFORMANCE

In 2000, the Maryland General Assembly passed a bill requiring MDOT to develop an Annual Attainment Report (AR) on Transportation System Performance. The main objectives of the AR are:

- to report on progress toward achieving the goals and objectives in the Maryland Transportation Plan and the CTP;
- to establish performance indicators that quantify achievement of these objectives; and
- to set long-term and intermediate-term performance targets.

In 2010, the Maryland General Assembly, through Chapter 725, added a new requirement that the performance indicators acknowledge the difference between urban and rural transportation needs. The legislation also requires the Governor to establish an Attainment Report Advisory Committee (AR-AC).

The performance measures were developed in a collaborative effort between the Secretary's Office, the modal administrations, the Maryland Transportation Authority and the AR-AC. The Attainment Report documents how MDOT is achieving its goals and objectives based on performance indicators and helps Maryland citizens assess improvements to its transportation system.

HOW TO READ THIS DOCUMENT

The Maryland Department of Transportation (MDOT) is organized into agencies responsible for different modes of travel. These are referred to as MDOT's modal agencies, or modes. Projects in the Consolidated Transportation Program (CTP) are listed under the mode responsible for the project's delivery.

For each major project, there is a Project Information Form (PIF). Each PIF contains a description of the project, its status, its justification, its compliance status with smart growth and a brief explanation of how it fits with the goals of the Maryland Transportation Plan. It also shows any significant change in the project since the previous year's CTP, as well as the funding for the project over the six-year cycle. The information in each PIF is meant to provide a general description of the project along with some specifics such as alignments, status of environmental permitting, or alternatives under study.

Funding Phases

Planning – Once a proposal is funded for project planning, detailed studies and analyses are conducted to evaluate the need for the project, to establish the scope and location of proposed transportation facilities and to obtain environmental approvals.

Engineering – Engineering projects involved detailed environmental studies and preliminary and final design. Having been through a detailed analysis based on the information from the Project Planning phase these projects are candidates for future addition to the Construction Program.

Right-of-Way – This funding is to provide the necessary land for the project or to protect corridors for future projects.

Construction – This last stage includes the costs of actually building the designed facility. Construction does not begin until a project receives necessary environmental permits, the State meets air and water quality requirements and the contracts are bid.

PIFs can include specific facilities and corridor studies that examine multimodal solutions to transportation needs. One example is the I-270/US 15 multimodal corridor study, which is evaluating highway and transit improvements in Montgomery and Frederick counties. The CTP also contains information on minor projects. These projects are smaller in scope and less costly. They also can include road resurfacing, safety improvements and sidewalk and bicycle trail construction.

Following this introduction is an explanation of some of the significant changes from last year's CTP. This section lists major projects added to the CTP or projects that have

advanced to a new stage of development. It also lists changes in construction schedules and projects removed from the CTP.

The CTP also includes information regarding the economic trends and assumptions and future revenue projects that inform the capital programming process.

MAJOR PROJECT SIGNIFICANT CHANGES TO THE FY 2010-2015 CTP

Significant project changes consist of additions to, or deletions from, the Construction Program or the Development and Evaluation Program; changes in the construction start year; significant cost increases or decreases, and changes in the scope of a project.

In total, \$158.8 million worth of projects have been added to the CTP. Of that amount six projects at a cost of \$75.7 million were added to the Construction Program. Two projects at a cost of \$64.5 million were added to the Development and Evaluation Program (D&E). In addition, two projects were moved from the D&E Program to the Construction Program at a cost of \$18.6 million. These projects are listed below by category.

PROJECTS ADDED TO THE CONSTRUCTION PROGRAM

<u>PROJECT DESCRIPTION</u>	<u>TOTAL COST (\$ MILLIONS)</u>
Maryland Port Administration	
Masonville Berth Construction*	22.6
State Highway Administration	
I-695, Baltimore Beltway; I-695 bridge on MD 144 over I-695 (Baltimore)**	20.1
MD 287, Sandtown Road; Replace Bridge over the Choptank River (Caroline)**	7.4
MD 545, Blue Ball Road; Replace Bridge over Little Elk Creek (Cecil)**	2.4
I-270, Eisenhower Memorial Highway; Replace deck and widen bridges over MD 80 and Bennett Creek (Frederick)**	12.6
I-495, Capital Beltway; I-495 over Northwest Branch (Montgomery)**	10.6

PROJECTS REMOVED FROM THE D&E PROGRAM

The following projects have been removed from the D&E Program:

<u>PROJECT DESCRIPTION</u>	<u>PHASE</u>	<u>JUSTIFICATION</u>
State Highway Administration US 1, Belair Road; US 1 from MD 43 to MD 152 (Harford, Baltimore)		Improvements along this corridor will be re-evaluated as smaller breakout projects are needed

PROJECTS REMOVED FROM THE CONSTRUCTION PROGRAM

The following projects have been removed from the Construction Program:

<u>PROJECT DESCRIPTION</u>	<u>PHASE</u>	<u>JUSTIFICATION</u>
Maryland Aviation Administration Protective Land Acquisition Program	RW	Program removed due to inactivity.

CONSTRUCTION SCHEDULE DELAYS

The start of construction has been postponed from the schedule shown in the FY 2010-2015 CTP, for the following nine major projects:

<u>PROJECT DESCRIPTION</u>	<u>JUSTIFICATION</u>	<u>FISCAL YEAR</u>
Maryland Aviation Administration		
Midfield Complex - New Air Traffic Control Tower at Martin State Airport	Requires completion of Airport Layout Plan Environmental Assessment.	FY 2012 to FY 2013
Noise Zone Land Acquisition Program	Based on schedule developed from Noise Land Re-Use Plan.	FY 2011 to FY 2012
Homeowner Assistance Program	Federal funding dependent upon property sales from Noise Land Re-Use Plan.	FY 2011 to FY 2013
Terminal Modernization Program at BWI Marshall Airport	Design start required PFC Application approval.	FY 2011 to FY 2012
State Highway Administration		
I-295/I-495, National Harbor; Interchange access ramps. (Prince George's)	The extension was delayed due to Permit Issues	FY 2010 to FY 2011
Maryland Transportation Authority		
I-95 Fort McHenry Tunnel - Moravia Road to the Tunnel Modifications	Additional Environmental Coordination	FY 2010 to FY 2011
I-95 Fort McHenry Tunnel - I-395 Repair and Spot Paint Beam Ends, Deck Seal and Joint Repair	Contract Sequencing	FY 2011 to FY 2012
Francis Scott Key Bridge - Police Outdoor Firing Range	Needs Assessment On-going	FY 2011 to FY 2013
US 40 Thomas J. Hatem Memorial Bridge - Underwater Repairs	Coincide with completion of deck completion.	FY 2011 to FY 2011

CONSTRUCTION SCHEDULE ADVANCEMENTS

The start of construction has been advanced from the schedule shown in the FY 2010-2015 CTP, for the following two major projects.

<u>PROJECT DESCRIPTION</u>	<u>JUSTIFICATION</u>	<u>FISCAL YEAR</u>
Maryland Transportation Authority		
MD 695 Francis Scott Key Bridge - Replace Curtis Creek Grid Deck	To follow recently completed emergency repair.	FY 2014 to FY 2012
MD 695 Francis Scott Key Bridge - Repair Approach Spans and Paint Bridge Fascia Beams	Inspection Findings	FY 2013 to FY 2012

COST & SCOPE CHANGES

In total, one-hundred and nineteen major construction projects experienced significant changes in project cost or scope, for a net increase of \$89.6 million. Seventy-four projects increased in cost by a total of \$428.4 million, while there were no projects that experienced a reduction in scope. The scope of four projects changed, which caused a net increase totalling \$53.1 million. There are many reasons for these changes, including legislated changes in program participation rates, more refined cost estimates, changes in design and environmental requirements. The specific reasons for significant changes to individual projects are noted on their respective Project Information Forms (PIF's).

FY 2010 ACCOMPLISHMENTS
MAJOR PROJECT COMPLETIONS

The Department completed seventeen major projects in FY 2010, at a total cost of \$575.0 million. These projects are listed below:

<u>PROJECT DESCRIPTION</u>	<u>TOTAL COST</u> <u>(\$ MILLIONS)</u>
Maryland Aviation Administration	
Concourse B/C Apron Reconstruction at BWI Marshall Airport	21.9
Concourse D/E Baggage Screening System and Baggage Claim Expansion at BWI Marshall Airport	38.4
Concourse D/E Apron and Airfield Pavement Improvements at BWI Marshall Airport	66.0
State Highway Administration	
MD 45, York Road; Cavan Road to Ridgeley Road (Baltimore)	21.6
MD 7, Philadelphia Road; Streetscape improvements from US 40 to I-695 (Rosedale) (Baltimore)	15.5
MD 147, Harford Road; Streetscape improvements from Taylor Ave. to Joppa Rd. (Parkville) (Baltimore)	14.6
MD 2/4, Solomons Island Road; Intersection at MD 231 (Calvert)	29.1
MD 30 Relocated, Hampstead Bypass; MD 30 Relocated from south of Hampstead to north of Hampstead (Carroll)	79.1
I-270, Eisenhower Memorial Highway; Replace Bridge 10080 over Doctor Perry Road (Frederick)	9.3
MD 180, Jefferson Pike; Replace Bridge 10178 over tributary of Potomac River (Frederick)	6.7
I-70, Baltimore National Pike; South Mountain Welcome Center (Frederick)	22.2
I-70, Baltimore National Pike; I-70 Phase 2B, 2C, Walser Dr., MD 355, and MD 475 South St. to Monocacy Blvd. (Frederick)	108.4
MD 450, Annapolis Road; Construct a CSX Railroad grade-separated crossing and intersection improvements near the Peace Cross. (Prince George's)	74.1
I-95/I-495, Capital Beltway; Interchange improvements at Arena Drive (Interim improvements) (Prince George's)	34.9
MD 362, Mt. Vernon Road; Replace Bridge over Monie Creek (Somerset)	2.3
I-70, Eisenhower Memorial Highway; Replace Bridges over Black Rock Road (Washington)	8.6
US 113, Worcester Highway; Hayes Landing Road to Goody Hill Road. (Worcester)	22.3
Total	575.0

^A - WMATA capital and operating grants in the Secretary's Office budget are shown for informational purposes

^B - The County and Municipality Funds (Highway User Revenues) in the State Highway Administration's budget are shown separately for informational purposes

^C - County and Municipality transfer funds from the federal government are not included in FY 2013-2016

^D - Capital Program WMATA Grants line includes federal funds received by WMATA directly

^E - "Other" funds are included in the totals for MAA, MTA and WMATA

^F - Debt Service for County Bonds is not included in FY 2013-2016

^G - Funds not received through the Trust Fund. Includes funds from Passenger Facility Charges (PFC), Maryland Transportation Authority (MdTA) funds, Certificates of Participation (COPs), County participation and federal funds received by WMATA directly

SUMMARY OF FEDERAL AID OBLIGATIONS
(\$ MILLIONS)

The following listing estimates the annual levels of funds anticipated from individual federal aid categories necessary to support the FY 2011-FY 2016 CTP/STP:

	Federal Fiscal Year					<u>TOTAL</u>
	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015 - 16</u>	
Surface Transportation Program (STP)	108.3	69.8	91.8	89.8	218.2	577.9
National Highway System (NHS)	170.8	88.3	143.9	134.3	251.0	788.3
Interstate Maintenance (IM)	25.8	25.2	28.7	24.5	40.0	144.2
Bridge (BR)	117.8	77.3	73.6	78.1	152.9	499.7
Congestion Mitigation / Air Quality (CMAQ)	42.6	53.7	41.1	53.6	108.1	299.1
Safety (HSIP & SRTS)	12.0	15.1	7.5	12.7	24.7	72.0
Enhancements	8.1	8.3	8.3	8.7	18.3	51.7

MAJOR BRIDGE PROJECTS

The following is a list of major bridge reconstruction, rehabilitation and replacement projects. New highway bridges that are part of a highway project are not included. Detailed information for each can be found on the Major PIF's as referenced.

<u>PIF LINE#</u>	<u>PROGRAM/PROJECT</u>	<u>DESCRIPTION</u>
<u>Allegany County</u>		
<u>Construction Program</u>		
1.	US 220, McMullen Highway -- Primary	Replace Bridge 1060 over the Potomac River
2.	MD 36, Lower Georges Creek Road -- Secondary	Replace Bridge 1014 over George's Creek
3.	MD 36, George's Creek Road -- Secondary	Replace Bridge 1166 over Koontz Run
<u>Baltimore County</u>		
<u>Construction Program</u>		
1.	I-695, Baltimore Beltway -- Interstate	Replace Bridge on MD 139 over I-695
2.	I-695, Baltimore Beltway -- Interstate	Replace Bridge 3139 at MD 26 (Liberty Road) (ARRA)
3.	I-695, Baltimore Beltway -- Interstate	I-695 bridge on MD 144 over I-695
6.	US 1, Belair Road -- Secondary	Replace Bridge 3001 over Little Gunpowder Falls
7.	US 40, Baltimore National Pike -- Secondary	Replace Bridge 3109 over Patapsco River
<u>Caroline County</u>		
<u>Construction Program</u>		
2.	MD 287, Sandtown Road -- Secondary	Replace Bridge over the Choptank River
3.	MD 328, New Bridge Road -- Secondary	Replace Bridge 5012 over Tuckahoe Creek
<u>Development and Evaluation Program</u>		
5.	MD 331, Dover Road -- Secondary	Replace Bridge 20023 over Choptank River

MAJOR BRIDGE PROJECTS (Cont'd.)

<u>PIF LINE#</u>	<u>PROGRAM/PROJECT</u>	<u>DESCRIPTION</u>
<u>Cecil County</u>		
	<u>Construction Program</u>	
1.	MD 545, Blue Ball Road -- Secondary	Replace Bridge over Little Elk Creek
<u>Frederick County</u>		
	<u>Construction Program</u>	
4.	I-270, Eisenhower Memorial Highway -- Interstate	Replace deck and widen bridges over MD 80 and Bennett Creek
5.	I-270, Eisenhower Memorial Highway -- Interstate	Replace Bridge 10080 over Doctor Perry Road
6.	MD 464, Point of Rocks Road -- Secondary	Replace Bridge 10091 over Catoctin Creek.
<u>Howard County</u>		
	<u>Construction Program</u>	
3.	US 40, Baltimore National Pike -- Secondary	Replace Bridge 3109 over Patapsco River
<u>Montgomery County</u>		
	<u>Construction Program</u>	
1.	I-495, Capital Beltway -- Interstate	I-495 over Northwest Branch
<u>Prince George's County</u>

BRAC ACTIVITIES

MARYLAND DEPARTMENT OF TRANSPORTATION BRAC ACTIVITIES

Base Realignment and Closure (BRAC) encompasses the arrival of new residents, jobs, and national defense and security activities into Maryland by September, 2011. As a result of the Federally-established 2005 BRAC Commission's decision to relocate several thousand jobs from outside the State to five Maryland military installations, BRAC will bring a myriad of benefits and challenges to the State, including the need for transportation improvements that will both support the BRAC consolidations, as well as preserve Marylanders' quality of life.

Maryland is one of the few states benefiting from BRAC by gaining 26,000 direct positions, with Aberdeen Proving Ground and Fort George G. Meade receiving the most growth. Somewhat unique to Maryland is that nearly all of the 26,000 jobs are to be filled by civilian employees who are not authorized to live on the bases. When indirect and tertiary positions are factored into the equation, Maryland stands to gain between 45,000 and 60,000 new jobs – the greatest economic growth the State will experience since World War II. It is important to note that this represents both BRAC and other federal and Department of Defense (DoD) location decisions. According to the Maryland Department of Business and Economic Development, the five Maryland military installations expected to have significant increases in personnel resulting from BRAC and non-BRAC related DoD growth are:

- **Fort George G. Meade** in Anne Arundel County is expected to add 5,700 jobs due directly to BRAC, over 4,000 jobs due to ongoing National Security Agency and other Army and DoD growth, and over 10,000 jobs from Enhanced Use Lease (EUL) related growth over time (beyond the BRAC window of 2011);
- **Aberdeen Proving Ground** in Harford County is expected to add approximately 8,200 direct BRAC jobs on base, as well as 6,000 indirect and induced jobs, and 3,000 to 5,000 new jobs from EUL related growth over time (beyond the BRAC window of 2011);
- **National Naval Medical Center at Bethesda** in Montgomery County is expected to add approximately 2,500 new personnel due to BRAC, including 1,750 from the Walter Reed Army Medical Center, in addition to a doubling of patient load;
- **Fort Detrick** in Frederick County is expected to add approximately 2,000 jobs total, 220 of which will be due directly to BRAC; and
- **Joint Base Andrews** in Prince George's County is expected to add approximately 3,000 jobs total, 600 of which will be due directly to BRAC.

How is Maryland Preparing for BRAC?

Preparations continue in coordination with communities and stakeholder groups throughout the State. MDOT's work is performed in concert with the State of Maryland's Subcabinet on BRAC, chaired by the Lt. Governor, which was established by the Governor and the General Assembly to "coordinate State activities and work with the federal and local governments to prepare for and accommodate incoming households and jobs while sustaining and enhancing the quality of life throughout the State." MDOT prepared a section of the State of Maryland's *BRAC Action Plan* for the Subcabinet, outlining policies, projects and legislation needed for Maryland to respond to

MARYLAND DEPARTMENT OF TRANSPORTATION BRAC ACTIVITIES

BRAC. The State of Maryland's *BRAC Action Plan* outlines specific investments to meet the transportation needs of BRAC in Maryland. Transportation action items listed in the *BRAC Action Plan* are included in the table below, as well as references to specific project information forms (PIFs).

The *BRAC Action Plan* also proposed legislation, subsequently signed into law as the BRAC Community Enhancement Act in the summer of 2008, to allow for the designation of "BRAC Revitalization and Incentive Zones" (BRAC Zones) as a mechanism for local governments to provide State financing support for public infrastructure in areas targeted for BRAC growth. On December 15, 2008, Lt. Governor Brown announced the designation of BRAC Zones in Baltimore City, Anne Arundel County, the City of Frederick, the City of Laurel, and Prince George's County. In 2009, additional BRAC Zones were designated in the City of Aberdeen in Harford County, and Savage Town Centre in Howard County.

The BRAC Community Enhancement Act also empowered local governments to negotiate for transportation improvements with developers of Enhanced Use Lease (EUL) projects at military installations, which are otherwise exempt from local mitigation requirements. As a result of the legislation, in June 2009, a Payment in Lieu of Taxes Agreement (PILOT) was executed between MDOT (acting on behalf of the state), Harford County and the private developer, for mitigation in connection with an EUL Project to be located at the Aberdeen Proving Ground. A similar agreement was also executed at Fort Detrick for its Central Utility Plant project, and is anticipated in association with a planned EUL project at Fort Meade..

The State's *BRAC Action Plan* may be accessed at <http://www.gov.state.md.us/brac/index.asp>, or by contacting the BRAC Subcabinet at (410) 260-6116.

MDOT's Approach to BRAC

MDOT's mission for BRAC is "*to facilitate the safe and efficient movement of people and goods to support Maryland's military installations while sustaining and enhancing the quality of transportation and Maryland's communities throughout the State.*" This mission is achieved through the collaborative work of MDOT's modal agencies: the Maryland Transit Administration (MTA), State Highway Administration (SHA), Motor Vehicle Administration (MVA), Maryland Port Administration (MPA), Maryland Aviation Administration (MAA), and Maryland Transportation Authority (MdTA).

MDOT has taken a proactive approach in planning for and implementing a coordinated response to the projected increase in demand on the transportation system as a result of BRAC. MDOT's coordinated effort is reflected through the transportation planning process, involving consultation and collaboration with local governments, as well as regional, State and federal partners, including the BRAC-impacted

MARYLAND DEPARTMENT OF TRANSPORTATION BRAC ACTIVITIES

military installations. Addressing BRAC needs is a challenge for transportation in terms of both time and funding, as major transportation projects may take 8-14 years to plan, design, fund and construct, while the BRAC moves will be implemented by mid-2011. To address the challenges of time and available funding, MDOT relies on a “*high/low*” investment strategy to fund and deliver BRAC-related transportation projects.

Under the “*high/low*” strategy, lower-cost improvements that can be implemented quickly (low strategy) have been targeted for potential completion in concert with the 2011 consolidations, while higher-cost, major capacity projects will be implemented over time. Many of the long-term projects identified in the FY 2011-2016 CTP as BRAC-related are major projects that pre-date the 2005 BRAC decisions. These projects were already needed for overall regional growth, but are also needed to support access to Maryland’s BRAC-impacted military installations.

Short-term BRAC projects include intersection improvements (see pp. SHA-SW-5 to SHA-SW-8), the evaluation of direct transit services, operating and maintenance needs, and system preservation projects. Under the BRAC Intersection Improvement Program, SHA analyzed projected near-term traffic impacts at 107 heavily impacted intersections near Aberdeen Proving Ground, Fort George G. Meade and Bethesda National Naval Medical Center. Sixteen (16) intersections were identified for potential improvement based on level of service, relative cost, environmental and socio-economic impacts, and proximity to the installations. Improvements at those 16 intersections were advanced to the 30% design stage, funded in part with federal assistance. Following continued development of regional priorities and in consideration of limited resources given prevailing economic conditions, priority intersections were then selected by stakeholders to advance toward implementation in synchronization with BRAC consolidation in 2011. Certain priority projects identified at Aberdeen Proving Ground and Fort George G. Meade commenced construction activities in 2010; priority initiatives at National Naval Medical Center completed a critical project review process conducted by the Maryland-National Capital Park and Planning Commission, and can now similarly advance toward implementation.

In the coming year, MDOT and SHA will continue the design of key intersection improvements identified proximate to Joint Base Andrews, as well as continue to work with local stakeholders and federal partners to refine statewide BRAC project priorities in accordance with available funding. Also in the short-term, MDOT and MTA will collaborate with the installations, their tenants, DoD, and local officials to develop and implement sound Transportation Demand Management practices. These efforts will include the growth and marketing of car and van pool programs, Ridesharing, and the Guaranteed Ride Home program, as well as promoting telework and flexible work hours where possible, and bicycle and pedestrian uses.

MARYLAND DEPARTMENT OF TRANSPORTATION BRAC ACTIVITIES

In the FY 11-16 CTP, \$150 million has been programmed for SHA's Intersection Improvement Program, and is structured to allow for flexibility; current available funding ensures that priority intersections will continue to advance in project development, to the point where phased construction could begin once additional funding is identified.

Long-term BRAC projects include several major highway projects, such as the MD 175 and MD 198 Project Planning Studies at Fort George G. Meade and the Branch Avenue Metro Access Project in Prince George's County. In addition, the MARC commuter rail system is also part of MDOT's "high" strategy. MARC serves an important role in Maryland's response to BRAC, serving both Fort George G. Meade and Aberdeen Proving Ground. At Governor O'Malley's direction, the MTA produced the "MARC Growth and Investment Plan" in 2007, an ambitious plan to triple MARC ridership by the year 2035. This Plan includes near-term and long-term projects in support of BRAC and regional mobility to be implemented over the next 25 years, which require the cooperation of both AMTRAK and CSX who own and operate the lines and will ultimately require significant money - \$3.9 billion in federal, State and private funding.

MDOT's BRAC strategy is in keeping with its commitment to Transit-Oriented Development (TOD) and Smart Growth. MDOT will aggressively promote TOD projects around the State's transit stations to accommodate growth in a more efficient and sustainable way by marketing property surrounding MARC, Metro, Light Rail, and other transit stations for development.

New funding approved by the General Assembly at the request of the Governor in 2007 allowed for additional investments in a balanced transportation system to be more responsive to the specific transportation needs around the BRAC-impacted Maryland military installations. Though requested projects continue to outstrip resources, requiring careful prioritization and staging of projects, the FY 11-16 CTP demonstrates MDOT's ongoing commitment to Maryland's BRAC-impacted communities.

| <input checked="" type="checkbox"/> Connectivity for Daily Life | |

EXPLANATION: Transportation enhancement projects will improve connectivity by enhancing pedestrian and bicycle mobility. In addition to environmental improvements such as treatment of roadway runoff, tree planting and preservation of historical structures.

PROJECT: Transportation Enhancement Program

DESCRIPTION: Projects that may be considered include: pedestrian or bicycle facilities; provision of safety and educational activities for pedestrians and bicyclists; acquisition of scenic easements and scenic or historic sites; scenic or historic highway programs; landscaping and other beautification; historic preservation; rehabilitation and operation of historic transportation buildings, structures or facilities - including historic railroad facilities and canals; preservation of abandoned railway corridors - included conversion for use as bicycle or pedestrian trails; archaeological planning and research. Project sponsors are required to provide matching funds.

PURPOSE & NEED SUMMARY STATEMENT: Transportation enhancements are projects that will add community and environmental value to the transportation system. The Safe, Accountable, Flexible Efficient Transportation Equity Act (SAFETEA-LU) provides that 10% of the Surface Transportation funds be set aside for the Transportation Enhancement Program.

SMART GROWTH STATUS: ☒ Project Not Location Specific or Not Subject to PFA Law

| <input type="checkbox"/> Project Outside PFA | <input type="checkbox"/> Exception Will Be Required |
| <input type="checkbox"/> PFA Status Yet to Be Determined | <input type="checkbox"/> Exception Granted |

ASSOCIATED IMPROVEMENTS: Enhancement activities must be directly related to transportation.

STATUS: Projects approved for funding appear in the State Highway Administration's Safety, Congestion Relief, Highway and Bridge Preservation Program.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Added funding in FY 16.

PROJECT: Transportation Emission Reduction Program

DESCRIPTION: The objective of the program is the reduction of traffic congestion and/or mobile source emissions. This program will incorporate and expand proven strategies to reduce emissions in Maryland's air quality non-attainment areas, included telework, regional commuter assistance, and other programs geared towards reductions in mobile source emissions. New approaches will also be developed to reduce traffic congestion in Maryland through regional partnerships, quality-of-life initiatives, congestion mitigation projects and development and deployment of advanced transportation technologies.

JUSTIFICATION: The Federal Clean Air Act requires transportation programs to remain in step with State air quality plans. Fifteen counties are in air quality non-attainment or maintenance status. Worsening traffic congestion in the Baltimore/Washington metropolitan area negatively impacts the quality of life for Maryland citizens. This program will help address these issues by implementing projects that will achieve measurable reductions in mobile source emissions. These reductions are important to the annual air quality conformity analysis of the Department's transportation plans and programs and to help reduce Green House Gas emissions.

PROJECT: High Speed Intercity Passenger Rail Grant Funding for B&P Tunnel (ARRA)

DESCRIPTION: The purpose of this project is to perform Preliminary engineering and NEPA analysis for the Amtrak Baltimore and Potomac Tunnel on Amtrak's Northeast Corridor (NEC).

JUSTIFICATION: This project is funded through the federal High Speed Intercity Passenger Rail (HSIPR) program and addresses the planning required to construct an alternative tunnel to replace the 100-plus year old tunnel. This project is being managed by Amtrak as MDOT is the recipient of the grant funds. The project is critical for safety, but it will also provide improved trip time on the NEC. The tunnel is considered one of the priority projects for the NEC in Amtrak's 2030 Master Plan.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet to Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS: Associated improvements include the cost benefit analysis for the rail tunnels and the BWI Station Area project, which was also funded by HSIPR.

STATUS: This is a new project related to previous Congressionally funded studies in which MDOT has been engaged to evaluate feasibility of tunnel replacement.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Added to the Development and Evaluation Program.

EXPLANATION: The MVA implemented new procedures and requirements to comply with the new State lawful presence law. Proof of lawful presence in the United States is now required before an individual can be granted a MD driver's license, learner's permit or ID card. There are several additional requirements that are being implemented as prescribed by the federal Real ID Act of 2005.

PROJECT: Real ID Act

DESCRIPTION: This project will verify identification documents presented to the MVA in connection with driver license and ID card transactions. The project will develop a more secure driver license and ID card, and a means to archive identity documents.

PURPOSE & NEED SUMMARY STATEMENT: This project will upgrade systems and policies within MVA in order to comply with federal regulations mandated in May 2005 by the signing of The Real ID Act.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP:

Decreased by \$1.4 Million due to refined cost estimates.

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☒ Quality of Service
- ☐ System Preservation & Performance
- ☐ Connectivity for Daily Life
- ☐ Safety & Security
- ☐ Environmental Stewardship

EXPLANATION: The implementation of new Kiosks will provide customers with the ability to receive real-time registration stickers, the option to pay in-cash or with a credit card, and the capability to receive certified and non-certified driving records, as well as the option to order scenic and personalized license plates. Providing this advanced functionality is of great benefit to the public and will most certainly enhance customer satisfaction.

PROJECT: Alternative Service Delivery Systems

DESCRIPTION: This project (formerly e-MVA Service Delivery Systems) includes the design and implementation of electronic delivery of MVA services through the Internet, kiosks and telephone Interactive Voice Response (IVR) systems.

PURPOSE & NEED SUMMARY STATEMENT: Alternative delivery systems provide MVA customers with the ability to conduct transactions electronically. Web-based services, customer service kiosks, interactive voice recognition systems and other advancements not only make interaction with the MVA an efficient and pleasant experience, they help the Administration to reduce the number of trips to MVA offices. This in turn reduces customer wait time as well as increases overall customer satisfaction.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

PROJECT: Enterprise Management System

DESCRIPTION: The EMS will establish an Information Technology platform for all MVA services through a set of principles and architectural components that provide a service infrastructure on which each system will be built. This platform will define the way components of the architecture communicate, store/secure data, and interact with both MVA staff and customers. EMS would serve as the base architecture for replacing the existing Titling and Registration System (TARIS), and other legacy systems, and the development of new applications. The current phase of the project is limited to a comprehensive planning study that will include a gap analysis to identify deficiencies in MVA

JUSTIFICATION: Many existing business systems were developed over the years as independent applications in response to separate business unit needs, and have become outdated in meeting the needs of today's operating environment. These systems need to be more efficient for improved customer service and increased employee productivity, and must be re-engineered to allow MVA to maximize service using electronic commerce and a network of branch locations.

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☐ Quality of Service
- ☐ System Preservation & Performance
- ☐ Connectivity for Daily Life
- ☐ Safety & Security
- ☒ Environmental Stewardship

EXPLANATION: This program enhances the environment of neighboring communities by providing homeowner noise mitigation for people living within designated noise zones near BWI Marshall.

PROJECT: Homeowner Assistance Program

DESCRIPTION: This voluntary program provides for the mitigation of aircraft noise and improvement of land-use compatibility around BWI Marshall. Homeowners may elect to either sell their home, with the State ensuring a fair market value, or have their house soundproofed to reduce interior noise levels. The State receives an avigation easement for each participating property.

PURPOSE & NEED SUMMARY STATEMENT: This program enhances the environment of neighboring communities by providing noise mitigation for homeowners residing within the BWI Marshall Airport Noise Zone starting with the most severely impacted communities.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

- ☒ Project Inside PFA
- ☐ Project Outside PFA
- ☐ PFA Status Yet to Be Determined
- ☐ Grandfathered
- ☐ Exception Will Be Required
- ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
Noise Zone Land Acquisition Program -- Line 1

STATUS: MAA has participated in the soundproofing of 670 properties and sales assistance for 113 homes through FY 2010.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The \$1.0 million cost decrease reflects program cost containment.

**STATE GOALS:** Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☐ Quality of Service
☒ System Preservation & Performance
☐ Connectivity for Daily Life
☒ Safety & Security
☒ Environmental Stewardship

EXPLANATION: This project enhances compliance with FAA Part 139 regulations that require airfield pavement to be free cracks and surface variations that could impair directional control of air carrier aircraft. New drainage and deicing structures will improve runoff collection and recycling of chemicals used for inclement weather.

PROJECT: Concourse C/D Apron Reconstruction at BWI Marshall Airport (ARRA)

DESCRIPTION: This project consists of the reconstruction of the aircraft ramp area between Concourses C and D. The work includes pavement removal and reconstruction, improvements to drainage structures, upgrades to deicing collection facilities, communications infrastructure, and ramp lighting.

PURPOSE & NEED SUMMARY STATEMENT: The project will enhance airfield safety and operations through reconstruction of pavement and apron grade, drainage structures, and upgrade of airfield lighting to meet Federal Aviation Administration (FAA) standards. The areas identified for upgrades were determined through independent pavement analysis as required by the FAA.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

- ☒ Project Inside PFA
☐ Project Outside PFA
☐ PFA Status Yet to Be Determined
☐ Grandfathered
☐ Exception Will Be Required
☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

STATUS: Construction underway. ARRA phases to be complete by February 2011 and the balance of the project by Fall 2011.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Cost increase of \$2.0 million reflects security cost and actual expenditures. Cashflow change reflects schedule revision due to last winters weather.

USAGE: Accommodate projected annual passenger growth.

OPERATING COST IMPACT: Operating cost will be recovered through airport user fees.

POTENTIAL FUNDING SOURCE:

☐ SPECIAL ☒ FEDERAL ☐ GENERAL ☒ OTHER

Federal-Aid	18,276	6,999	10,105	1,172	0	0	0	0	11,277	0

Other funding source is Passenger Facility Charge (PFC) revenue. Federal funding includes \$15 million from American Recovery and Reinvestment Act (ARRA).

**STATE GOALS:** Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☐ Quality of Service
☒ System Preservation & Performance
☐ Connectivity for Daily Life
- ☒ Safety & Security
☒ Environmental Stewardship

EXPLANATION: This project provides for compliance with Public Law 109-115 and FAA Part 139 regulations. RSA improvements enhance safety by reducing the risk of aircraft damage and personal injury in the event of runway overruns. Part 139 pavement improvements and FAA standards will ensure airfield pavement is free of cracks and surface variations that could impair directional control of the air carrier aircraft.

PROJECT: Runway Safety Area / Pavement Management Program Improvements at BWI Marshall

DESCRIPTION: This project consists of the design and construction of the Runway Safety Area (RSA) and Pavement Management Program (PMP) improvements, other Facility Airport Layout Plan (ALP) improvements, and airfield pavement reconstruction to meet Federal Aviation Administration (FAA) standards. Improvements will cover Runways 10-28, 15R-33L, 04-22 and 15L-33R, as well as, connecting taxiways, taxilanes, and adjacent deicing pads.

PURPOSE & NEED SUMMARY STATEMENT: FAA mandates compliance with Runway Safety Area standards by December 2015, in addition, FAR 14 CFR Part 139.305 requires MAA to keep airfield pavement free of cracks and surface variations that could impair directional control of air carrier aircraft. The proposed work will allow MAA to meet the RSA mandate and address the Pavement Condition Index ratings of fair or lower. This project will preserve existing airfield capacity by ensuring the continued long-term use of runways, aprons, taxiways and taxilanes located at the busiest areas of airfield operations and minimize the exposure of aircraft to FOD.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Project moved from Development and Evaluation Program to Construction Program. Projected construction cost and schedule added.

USAGE: Accommodate projected annual passenger growth.

OPERATING COST IMPACT: Operating cost will be recovered through airport user fees.

PROJECT: Comprehensive Roadway Signing, Phase II at BWI Marshall Airport

DESCRIPTION: This project is the final phase of the new Comprehensive Roadway Sign System for BWI that was initiated as part of the Comprehensive Landside Development Program. This project will make global changes to various access roadway signage including parking and cell phone lots; rental car facility; east and west bound on I-195; MD 170 and I-97; and the MARC/Amtrak Station.

PURPOSE & NEED SUMMARY STATEMENT: The signage improvements will establish consistency and clarification among signage that directs travelers to the terminal, parking, and rental car facilities.

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☐ Quality of Service
☒ System Preservation & Performance
☐ Connectivity for Daily Life
☒ Safety & Security
☐ Environmental Stewardship

EXPLANATION: Replacement of the aged security monitoring and dispatching systems improves compliance with FAA Part 139 and TSA security regulations. These modern security monitoring and response alert systems will enhance the safety and security of all airport users.

PROJECT: Integrated Life-Safety and Security Systems at BWI Marshall Airport

DESCRIPTION: These projects provide for the replacement of numerous, disparate, end of life cycle facility monitoring, emergency response and security systems. The use of new technologies will allow the integration of Consolidated Dispatch Center (CDC) systems with Closed Circuit Television (CCTV) and Controlled Access Security (CASS) systems. Improvements will include replacement of the MODUCOM fire alert and fire alarm system, terminal-wide CCTV and CASS systems, automation of the dispatching system, monitoring/control workstations, access detection, and event monitoring.

PURPOSE & NEED SUMMARY STATEMENT: Federal Aviation Administration (FAA) and Transportation Security Administration (TSA) regulations require BWI Marshall to provide adequate safeguards to prevent unauthorized entry to secure areas, maintain event records, and meet standards for incident response.

EXPLANATION: This completed project provides for compliance with Public Law 109-115 and FAA Part 139 regulations. RSA improvements enhance safety by reducing the risk of aircraft damage and personal injury in the event of runway overruns. Part 139 pavement improvements and FAA standards will ensure airfield pavement is free of cracks and surface variations that could impair directional control of the air carrier aircraft.

PROJECT: Hagerstown Airport Expansion

DESCRIPTION: This project was a multi-year project to expand Runway 09-27 at Hagerstown Regional Airport. The project lengthened the runway from 5,500 feet to 7,000 feet, and includes associated land acquisition, hold apron, stormwater management, roadway and bridge improvements to US 11.

PURPOSE & NEED SUMMARY STATEMENT: The Runway 09-27 improvements correct numerous non standard conditions, most importantly, the lack of adequate Runway Safety Area (RSA) beyond the ends of the pavement. Also, the former runway length limited the Airport in accommodating larger aircraft necessary to meet the growth in the region. The extension will better facilitate larger aircraft, as well as, avoid reduction of runway length as an alternative resolution of RSA issues.

EXPLANATION: This project enhances compliance with Federal Aviation Administration Part 139 SIDA and safety regulations through modernization of baggage screening equipment. In addition, the improvements provide the ability to maintain 100 percent electronic baggage screening while achieving the necessary capacity to meet projected airline departure flight schedules and reduces congestion in the passenger bag claim areas.

PROJECT: Concourse D/E Baggage Screening System and Baggage Claim Expansion at BWI Marshall Airport

DESCRIPTION: This project will reconfigure the existing baggage screening and baggage make-up system to an integrated baggage security and handling system. Improvements will include changes to the baggage system configuration, sort loop, curbside check-in, redundant feed for ticket counters, equipment, and expansion of the current building structure. Work will also include upgrade of baggage claim area.

PURPOSE & NEED SUMMARY STATEMENT: The ability to maintain 100 percent electronic baggage screening, while achieving the necessary capacity to meet projected airline departure flight schedules, is dependent upon BWI Marshall attaining the maximum utilization of bag screening technology. The project will also address baggage claim crowding.

PROJECT: Concourse D/E Apron and Airfield Pavement Improvements at BWI Marshall Airport

DESCRIPTION: This project includes the reconstruction and overlay of multiple taxiways, replacement of airfield lighting and electrical duct bank, and the reconstruction of aircraft ramp areas between Concourses D & E. The work includes pavement removal and reconstruction, improvements to drainage structures, upgrades to deicing collection facilities, installation of centerline and edge lighting on taxiways, ramp lighting and electrical system improvements. The work will be accomplished in multiple phases to minimize impacts to airfield operations and maintain appropriate access for terminal gate usage.

PURPOSE & NEED SUMMARY STATEMENT: The project will enhance airfield safety and operations through reconstruction of pavement, drainage structures, and upgrade of airfield lighting to meet Federal Aviation Administration (FAA) standards. The areas identified for upgrades were determined through independent pavement analysis as required by the FAA.

ASSOCIATED IMPROVEMENTS:

STATUS: Airfield taxiway paving and Concourse D/E ramp reconstruction completed September 2008. Airfield lighting cable and drainage upgrades completed Summer 2010.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Cost reduction of \$2.4 million represents contract alternates that were not exercised and actual expenditures. Updated cashflow reflects timing of construction close-out documents.

USAGE: Accommodate projected annual passenger growth.

OPERATING COST IMPACT: Operating cost will be recovered through airport user fees.

PROJECT: Master Plan at BWI Marshall Airport

DESCRIPTION: Study to identify long-term (2030) projection, location and extent of BWI Marshall facility improvements, as required to meet future aviation demand and to identify Federal Aviation Administration (FAA) design standard deficiencies. Study will require in-depth evaluations of many factors, including future air service, runway and terminal capacities, environmental and community impact considerations. Study also collaborates with Anne Arundel County regarding land use compatibility in the airport vicinity.

JUSTIFICATION: To undertake a comprehensive analysis of BWI Marshall's facilities and infrastructure to determine what improvements are necessary to support air travel through 2030. The most recent BWI Master Plan was approved in 1987. Most projects envisioned in the 1987 Plan have been constructed. BWI Marshall and the aviation industry have changed significantly since the completion of the last Master Plan.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet to Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

Runway Safety Area/Pavement Management Program Improvements at BWI Marshall -- Line 4

STATUS: Master Plan completed June 2010. Plan under review by the FAA.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

PHASE	TOTAL		CURRENT YEAR 2011	BUDGET YEAR 2012	PROJECTED CASH REQUIREMENTS FOR PLANNING PURPOSES ONLY				SIX YEAR TOTAL	BALANCE TO COMPLETE

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Cost increase of \$0.1 represents actual expenditures. Adjusted cashflow reflects final grant closeout timing.

USAGE: Determine facility improvements needed to accommodate future aviation demand.

PROJECT: Interim Airport Layout Plan Environmental Assessment at BWI Marshall Airport

DESCRIPTION: This project provides for the study and design work necessary for the environmental impact assessment of all capital projects shown on the Airport Layout Plan (ALP) and Master Plan. Projects include: runway safety areas, airfield pavement, terminal and fuel farm improvements, perimeter roadway, midfield cargo extension, Northrup Grumman apron and hangar, airport maintenance buildings, and other ancillary facilities.

JUSTIFICATION: In accordance with Federal Aviation Administration Order 5050.4A, Airport Environmental Handbook, MAA must determine the environmental consequences of capital project development as proposed by the Airport Layout Plan.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA
☐ Project Outside PFA
☐ PFA Status Yet to Be Determined

Other funding source is Passenger Facility Charge (PFC) revenue.
1429, 1617, 7700

JUSTIFICATION: BWI has experienced significant growth in passenger levels since development of the older concourses. The International and A/B Terminals provide sufficient passenger processing areas and accepted levels of customer service. These amenities need to be incorporated into the remainder of the terminal. Fire code life safety compliance and federally mandated security requirements are also expected to impact terminal space usage. Undertaking planning and conceptual design at this time will provide MAA with the necessary options to be responsive to passenger, airline and air service needs.

PROJECT: Hart-Miller Island Related Projects

DESCRIPTION: Hart-Miller Island is a 1,140 acre, two-cell containment island, off-shore from Baltimore County. The island operated as a dredge disposal site since 1984. The southern part of the island is developed for use as a wildlife habitat. On December 31, 2009 Hart Miller Island ceased accepting dredge material. The North cell will be developed as a wildlife habitat over the next several years.

PURPOSE & NEED SUMMARY STATEMENT: The disposal capacity of the island was needed to allow dredging of the Port's harbor and shipping channels. Hart-Miller Island represented one of the most cost efficient dredge disposal options available.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA
☐ Project Outside PFA
☐ PFA Status Yet to Be Determined

☒ Grandfathered
☐ Exception Will Be Required
☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

Dredge Material Placement Monitoring -- Line 2
 Dredge Material Program -- Line 8

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☐ Quality of Service
☐ System Preservation & Performance
☒ Connectivity for Daily Life

☐ Safety & Security
☒ Environmental Stewardship

EXPLANATION: The dredge material placed in the Hart Miller Island facility was collected from Inner Harbor channels and berths. The placement of this material at Hart Miller Island allowed vessels to transport cargo to and from the Port of Baltimore

STATUS: The facility ceased in-flow operations December 31, 2009. Maintenance and monitoring will continue until the final configuration of the cell is determined.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The program increased by \$5.2 million due to the addition of FY 16. Project Cash Flows result in addition of \$2.8 Million to FY 16.

POTENTIAL FUNDING SOURCE: <input type="checkbox"/> SPECIAL <input type="checkbox"/> FEDERAL <input type="checkbox"/> GENERAL <input type="checkbox"/> OTHER

5002, 5003

PROJECT: Dredge Material Placement and Monitoring

DESCRIPTION: This project involves the placement and monitoring of material dredged from the Port of Baltimore channels. Costs associated with this program are for construction of containment sites; monitoring during placement; dredge site placement operations; and beneficial use projects

JUSTIFICATION: The Governor's Strategic Plan for Dredge Material Management identified either specific sites and projects, or types of sites or projects for future dredge material placement. This program will fund the construction and monitoring during the development of selected sites. With approximately 2,000 ships a year calling on the Port of Baltimore's shipping lanes, there is a need to maintain the channels for the Port to remain competitive and increase economic development.

SMART GROWTH STATUS: ☒ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA
☐ Project Outside PFA
☐ PFA Status Yet to Be Determined

☐ Grandfathered
☐ Exception Will Be Required
☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

Hart-Miller Island Related Projects -- Line 1
 Dredge Material Program -- Line 8
 Masonville Vessel Berth - Line 9

STATUS: The MPA continues to evaluate alternative dredge material placement sites. The Corp cost/share arrangement with the MPA has changed from 25/75 to 35/65. Masonville dike construction is complete; inflow will start in the 2nd half of calendar year 2010.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Total program increased by \$20.9 million due to the addition of FY 16 and the reallocation of funds to other projects.

POTENTIAL FUNDING SOURCE: ☒ SPECIAL ☐ FEDERAL ☐ GENERAL ☐ OTHER

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☐ Quality of Service
☐ System Preservation & Performance
☒ Connectivity for Daily Life
☐ Safety & Security
☐ Environmental Stewardship

EXPLANATION: Funding of this project allows vessels with deeper drafts to makes future calls at the Dundalk Marine Terminal. These vessels will be larger than current-day ships and carry more cargo. Rehabilitation of these berths will enable the movement of additional cargo across the terminal.

PROJECT: Rehabilitation of Berths 1- 6 at Dundalk Marine Terminal, Phase I

DESCRIPTION: The western bulkhead at Dundalk Marine Terminal was part of the original Harbor Municipal Airport dating back to the 1930's; the marginal wharf was constructed in the early 1960s. This project will (in a phased approach) replace and deepen the berths to meet future cargo and vessels needs. Heavy cargo vessels have grounded on the bottom at low tides. The berths will be designed to allow dredging to an eventual depth of 50 feet. The first phase funded reconstruction of Berths 5 and 6. Berth 4 is the next phase, which is not yet funded.

PURPOSE & NEED SUMMARY STATEMENT: Berths 1-6 are essential to the Port because they handle a variety of cargoes, i.e. automobiles, forest products, roll-on/roll-off and other break-bulk (van packs). Age and harsh marine environment require these berths be rehabilitated before they become unstable. The other berths at Dundalk Marine Terminal (7-13) are not viable alternatives since they are used for other cargo (containers and RoRo) and are too distant from the warehouses and automobile lots. The MPA Facilities Plan ranks DMT Berth 4 as the highest priority project which is unfunded.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

- ☒ Project Inside PFA
☐ Project Outside PFA
☐ PFA Status Yet to Be Determined
☐ Grandfathered
☐ Exception Will Be Required
☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
None.

STATUS: Construction for Phase I was completed in December 2006. Additional funding is needed for Phase II (Berth 4, \$15.5 million estimated cost).

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

USAGE: Increase in larger, deeper vessel calls.

POTENTIAL FUNDING SOURCE:

PROJECT: Terminal Security Program

DESCRIPTION: The Terminal Security Program uses state-of-the-art technologies to secure MPA cargo terminals against unauthorized intrusions. Current projects include: Terminal Video Surveillance System to observe MPA terminals, Seagirt Marine Terminal Security Infrastructure, Access Control (gate improvements) and Visitor Control at Dundalk marine terminal. Terminal Perimeter Security will integrate a detection intrusion system.

JUSTIFICATION: Federal Regulations enacted under the Maritime Transportation Security Act of 2002 require the MPA to develop a security plan for MPA terminals that handles foreign cargo or passengers. These projects are being developed to comply with this act. The Security Program will allow the MPA to enhance its capability to prevent unauthorized intrusions onto its terminals and facilities. A large portion of the Federally approved project's cost is funded by Federal Port Security Grants.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet to Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
None.

STATUS: Remote Video Surveillance and Enhanced Terminal Security are complete.

PROJECT: South Locust Point Cruise Terminal

DESCRIPTION: Current projects include terminal roof repair; purchase a new gangway; installing a redundant electrical feeder; and enclosing the existing canopy. Four cruise lines operate international excursions out of MPA facilities. A total of 94 voyages will sail during the 2010 season; 112 departures are scheduled for the 2011 cruise season.

PURPOSE & NEED SUMMARY STATEMENT: Development of this facility will eliminate the conflict between passenger and cargo activity at the Seagirt and Dundalk Marine Terminals. This facility is closer to tourist attractions located at the Inner Harbor and has excellent visibility and access to I-95.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet to Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS: None

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☐ Quality of Service ☐ Safety & Security
☐ System Preservation & Performance ☐ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: The improvements made at the South Locust Point Marine Terminal are for the comfort and convenience of cruise line passengers. These improvements spurred an increase in passenger demand and voyages from MPA facilities in the Port of Baltimore.

STATUS: The terminal started operations in FY 2006. The remaining funds will be used to develop adjacent land for passenger parking and procure a new gangway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE: <input checked="" type="checkbox"/> SPECIAL <input type="checkbox"/> FEDERAL <input checked="" type="checkbox"/> GENERAL <input type="checkbox"/> OTHER

PROJECT: Dundalk Marine Terminal Property Acquisition

DESCRIPTION: Purchase parcel(s) of land adjacent to or in the vicinity of Dundalk Marine Terminal.

PURPOSE & NEED SUMMARY STATEMENT: The desired parcels will allow for greater capacity at Dundalk Marine Terminal and will be used to store autos, RoRo equipment; for security processing or other space needs. Transferring functions to this property will free-up space on the terminal for additional cargo capacity. Expanding existing terminals is more cost effective than building new terminals.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

<input checked="" type="checkbox"/>	Project Inside PFA	<input type="checkbox"/>	Grandfathered
<input type="checkbox"/>	Project Outside PFA	<input type="checkbox"/>	Exception Will Be Required

ASSOCIATED IMPROVEMENTS:

None.

☐ Quality of Service
 ☐ Safety & Security

☐ System Preservation & Performance
 ☐ Environmental Stewardship

☒ Connectivity for Daily Life

EXPLANATION: Purchase of property adjacent to Dundalk Marine Terminal allows the MPA to increase RoRo and automobile activity in the Port of Baltimore. The increase activity will have a positive impact on local and statewide jobs.

STATUS: Four parcels were purchased since FY 08.

EXPLANATION: Remediation of the affective areas located at the Dundalk Marine Terminal will prevent hazardous substances generated by chrome ore residue from entering Baltimore Harbor

The application of Corrective Measure will enable the reclamation of chrome affected areas. The MPA will use these areas to store additional cargo brought to the Port of Baltimore by vessel or rail.

PROJECT: Chrome Ore Processing Residue Remediation (COPR)

DESCRIPTION: In April 2006 the Maryland Port Administration and Honeywell International entered into a Consent Decree with the Maryland Department of the Environment (MDE) to provide a long-term final remedy to resolve all environmental matters related to the presence of chrome ore processing residue at Dundalk. The MPA and Honeywell International entered into a Settlement Agreement; the agreement specifies the financial and operating responsibilities to be conducted by each party for the duration of the remediation.

PURPOSE & NEED SUMMARY STATEMENT: Originally COPR was believed to be good fill material; unfortunately, it is now known that a large portion of the COPR at DMT contains hexavalent chromium which is defined and regulated as a hazardous substance under Federal and State law. The studies and work plans required under the Consent Decree are designed to assess the presence and scope of chromium in all environmental media, including the soil, water, and air at the site, and to evaluate whether or not chromium is migrating off-site. A Corrective Measures Alternatives Analysis (CMAA) will be prepared that will evaluate a complete range of potential final remedies for the DMT.

PROJECT: Masonville Berth Construction

DESCRIPTION: The MPA is currently constructing a 141 acre Dredge Management Containment Facility (DMCF) at Masonville. This project will construct a 968-foot long and 130-foot wide berth, capable of accommodating the world's fleet of Auto and Roll-on/Roll-off ships. The new berth will have a deck load rating of 1000 psf, allowing for flexibility in loading heavy cargo or military equipment. Being a wharf, it will be much less susceptible to damage due to vessel strike, ice movement or debris. Masonville Vessel Berth will not have the wind restrictions of the existing pier. This berth will be dredged to 42 feet.

PURPOSE & NEED SUMMARY STATEMENT: This new structure will replace Fairfield Marine Terminal Pier 4, a deficient pier of World War II vintage that is currently at the end of its useful life. Pier 4 is the sole MPA berth for two large auto terminals (146 acres). Baltimore is ranks # 2 in the nation for auto exports. Within 20 years of the Masonville Vessel Berth construction auto movements over the Berth is predicted to grow from 120,000 units to 230,000 automobiles. The DMCF at Masonville is expected to reach dredge placement capacity at this time; the DCMF will be converted into a marine terminal. The Masonville Vessel Berth will replace Pier 4 and service vessels making

PROJECT: Dredge Material Management Program

DESCRIPTION: This project conducts detailed studies with the US Army Corp of Engineers to identify and assess potential dredged material placement sites consistent with Maryland's Dredge Material Management program emphasizing beneficial uses of dredged material for projects such as island and shoreline reclamation.

JUSTIFICATION: Available placement capacity for sediment dredged from navigational channels serving the Port of Baltimore is completely committed. The MPA must identify placement sites and uses for future dredge material. Studies and investigations are necessary to meet the requirements of the Dredge Material Management Act of 2001.

EXPLANATION: This project provides commuter rail service between the Frederick area, the I-270 Corridor and Washington.

PROJECT: MARC Frederick Extension

DESCRIPTION: Service extension from Point of Rocks to City of Frederick, includes downtown Frederick and suburban stations which connect to the Brunswick Line and provide access to Washington, D.C.

PURPOSE & NEED SUMMARY STATEMENT: This extension assists in meeting travel demands of the I-270 corridor by providing additional MARC stations. The Frederick downtown station supports the revitalization of the downtown area in conjunction with the Carroll Creek Project and office development.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

- | | |

PROJECT: MARC Maintenance, Layover & Storage Facilities

DESCRIPTION: Funding for planning, environmental documentation, design and property acquisition of maintenance, layover and storage facilities. Funding includes construction for the Washington Mid-Day Storage Yard as well as planning and environmental documentation for a new MARC Layover and Maintenance facility.

PURPOSE & NEED SUMMARY STATEMENT: Projects will provide critically needed storage and maintenance facilities for the MARC fleet. The storage facility will reduce interference with Amtrak operations in Washington and provide urgently needed fleet storage away from the passenger platforms at Washington Union Station.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet to Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
None.

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☐ Quality of Service ☐ Safety & Security
☒ System Preservation & Performance ☐ Environmental Stewardship
☐ Connectivity for Daily Life

EXPLANATION: Projects will provide facilities needed to inspect and maintain MARC fleet.

STATUS: Engineering is underway for the Washington Mid-Day Storage Yard. Construction funding for the Mid-Day Storage Yard to begin during current year. Site selection for an additional maintenance facility underway.

POTENTIAL FUNDING SOURCE: ☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Project Total Estimated Cost reduced by \$11.9 million to reflect completion and deletion of the initial phase of the Layover & Maintenance Facility project.

PROJECT: MARC Improvements on Camden, Brunswick and Penn Lines (ARRA)

DESCRIPTION: Ongoing improvement program of the MARC Camden, Brunswick and Penn lines to ensure safety and quality of service. Program is implemented through CSX and Amtrak operating agreements. On CSX projects, the existing signal system will be upgraded and three crossovers will be added to increase track capacity. Amtrak projects will include passenger upgrades at Baltimore Penn Station, BWI Rail Station and Washington Union Station.

JUSTIFICATION: Investments in passenger rail corridor infrastructure improvements are necessary to continue quality MARC service.

EXPLANATION: This project provides for overhauls of MARC coaches to refurbish and update mechanical systems and car bodies.

PROJECT: MARC Coaches - Overhauls and Replacement

DESCRIPTION: Overhaul the following MARC coaches in accordance with "10-year Minor" and "20-year mid-life" schedules: 34 MARC IIB (Minor), 26 MARC IIA (Mid-Life) and 63 MARC III (Minor).

PURPOSE & NEED SUMMARY STATEMENT: The overhauls will extend the life cycle of mechanical systems and car bodies, providing safe and reliable vehicles for MARC service.

EXPLANATION: Overhaul and replacement of locomotives, electric and diesel, will increase reliability and meet operational needs. New diesel locomotives are more fuel efficient and environmentally friendly.

DESCRIPTION: Conduct overhaul of four AEM-7 electric locomotives, six HHP8 electric locomotives and procurement of twenty-six re-manufactured MP36 diesel locomotives. Nineteen of the existing twenty-five diesel locomotives will be traded. Replacement diesel locomotives have higher horsepower and meet EPA Tier II air quality emissions standards.

PURPOSE & NEED SUMMARY STATEMENT: Overhaul of locomotives in accordance with the manufacturer's schedule is needed to maintain safe and reliable operation and to comply with federally mandated maintenance and environmental regulations.

PROJECT: MARC Edgewood Station

DESCRIPTION: Phase I of the project included expanded parking and ADA platform improvements. Phase II improvements are to include replacement of the existing station trailer with a permanent building and site enhancements to enhance customer service and provide improved ADA access. This is a BRAC-related project.

PURPOSE & NEED SUMMARY STATEMENT: Current ridership and anticipated growth due to BRAC will be better accommodated in a permanent facility.

EXPLANATION: This transit center project will expand and improve the multimodal connectivity of MARC, Metrorail and Bus for Silver Spring passengers.

PROJECT: Paul S. Sarbanes Transit Center

DESCRIPTION: Construct transit center at the Silver Spring Metrorail Station under a transit-oriented development (TOD) agreement between WMATA and a private developer, with a portion of the site reserved for future high-rise office, residential and hotel towers. It includes the construction of bus bays for Metrobus and Ride On, an intercity bus facility, a taxi queuing area, kiss and ride parking and MARC platforms with connecting pedestrian bridge and elevator towers. Provision is also made for a future Purple Line Station and a hiker/biker trail. MARC platform relocation completed as Phase I at this station.

PURPOSE & NEED SUMMARY STATEMENT: Consolidating transit services at a single location in Silver Spring will improve efficiency and ease of use. Proposed high density TOD development should increase ridership of MARC, Metrorail and Bus. The project will support the ongoing revitalization of downtown Silver Spring.

EXPLANATION: This project involves a major overhaul of the Light Rail fleet to ensure safe, reliable service to the end of the cars' useful life.

PROJECT: Light Rail Vehicle Mid-Life Overhaul

DESCRIPTION: Perform a mid-life overhaul of the Light Rail fleet. A 15-year inspection and overhaul of the major and sub-assemblies of the vehicles will be performed. The effort will also involve identifying and replacing obsolete parts to improve vehicle performance. Project also supports ongoing overhauls of systems to ensure reliability and safety.

PURPOSE & NEED SUMMARY STATEMENT: Major overhaul of the Light Rail Vehicles and upgrades of selected systems will ensure safe operation, reduce ongoing maintenance costs, increase vehicle reliability and availability, and increase passenger comfort and security.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Increase of \$4.2 million was due to the repair of the Light Rail Vehicle involved in the Gilroy Road accident, inclusion of video surveillance and to fund project cost revisions.

PROJECT: Owings Mills Joint Development

DESCRIPTION: Site infrastructure improvements for joint development of the existing 46-acre surface parking lot at Owings Mills Metro Station. Site infrastructure includes the replacement of parking structures and utilities.

PURPOSE & NEED SUMMARY STATEMENT: This project will provide state and local economic development benefits while supporting the State's goal to develop areas adjacent to transit stations. The project will also increase ridership through mixed-use development.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet to Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
None.

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☐ Quality of Service ☐ Safety & Security
☐ System Preservation & Performance ☒ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: This project supports mixed use transit oriented development immediately adjacent to the Metro station to reduce automobile trips.

STATUS: Construction of the first garage is complete. Construction of the second garage is scheduled to start during budget year.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Project delay due to current economic conditions.

EXPLANATION: This project provides an overhaul of the Metro vehicles to ensure safe, reliable service to the end of the cars' useful life.

PROJECT: Metro Subway Railcar Overhauls

DESCRIPTION: Mid-life and on-going overhauls of structural elements and systems of 100 Metro railcars. The mid-life overhaul provides for the upgrade and installation of new vehicle systems which include propulsion logic, passenger seating, flooring, audible and visual announcement systems, as well as new video surveillance system.

PURPOSE & NEED SUMMARY STATEMENT: On-going overhaul for Metro vehicle subsystems is required to reduce system failures and improve reliability. Repair of critical equipment such as traction motors, gearboxes, axles and wheels is necessary for system dependability.

EXPLANATION: This project overhauls the Metro railcars truck assembly to extend the assembly life and maintain safe operations.

PROJECT: Metro Subway Railcar Truck Assembly Overhaul (ARRA)

DESCRIPTION: Five-year overhaul cycle of major equipment to ensure safe and reliable operation of Metro railcars. Truck assemblies, which consist of critical equipment such as traction motors, gearboxes, axles and wheels require overhaul to ensure safe operation and to prevent high failure rate.

PURPOSE & NEED SUMMARY STATEMENT: Obsolete parts and defective components are in need of repair or replacement to ensure proper operation.

PROJECT: Metro Subway Train Control Signaling System Replacement

DESCRIPTION: Project will replace the existing Metro train control signaling system. The current electronic components have exceeded recommended industry standard life cycles. The new technology will improve reliability and provide new diagnostic capabilities for servicing.

PURPOSE & NEED SUMMARY STATEMENT: Original system technology is reaching its life cycle end. Electronic components of the original design have become very difficult to obtain and maintenance costs have increased.

☐ Environmental Stewardship

EXPLANATION: This project provides up-to-date fire detection and management system for the safe operation of Metro.

PROJECT: Metro Subway Fire and Security Management Systems

DESCRIPTION: Modernize the Life Safety and Supervisory Control and Data Acquisition (SCADA) systems and replace the obsolete control center systems required to manage the overall Metro SCADA function. This effort will affect the existing fire detection and management system with the associated station ventilation and smoke removal systems, the SCADA system for the primary control of passenger station security, smoke and fire suppression systems, and the motor controls for the ventilation and smoke removal electric fan motors.

PURPOSE & NEED SUMMARY STATEMENT: The existing SCADA system is nearing the end of its useful life. A new system will enhance the existing Life Safety system and functionality.

EXPLANATION: This project overhauls and improves the power supply for the Metro.

PROJECT: Metro Subway Electrical Substation Improvements

DESCRIPTION: Overhaul electrical substations used to supply power to Metro trains. Includes equipment compartments, switch gear controls, flooring, power supply panels and electrical connections.

PURPOSE & NEED SUMMARY STATEMENT: Operational environment and normal wear have degraded the condition of electrical power supply equipment. The service life of the existing equipment has been met. Repair, refurbishment or replacement is necessary to ensure reliability and safety.

PROJECT: Bus Procurement

DESCRIPTION: Annual purchase of clean diesel hybrid electric buses to replace those that have been in service for 12 or more years.

JUSTIFICATION: Bus replacement levels are based on the fleet age to prevent high out-of-service rates and major repair problems that arise from retaining buses beyond their useful life. Replacement buses are hybrid electric which reduces emissions and noise levels.

☐ Connectivity for Daily Life
- ☒ Safety & Security
☐ Environmental Stewardship

EXPLANATION: This project provides a closed circuit television system for MTA's existing bus fleet to offer enhanced safety and security.

PROJECT: Bus On-Board Closed Circuit Television Retrofit

DESCRIPTION: Retrofit 541 buses with an on-board wireless closed circuit television (CCTV) system that will be compatible with the system being procured for new buses. The new system will link to various system components such as vehicle monitoring, automatic vehicle location (AVL), voice announcements and passenger counters.

PURPOSE & NEED SUMMARY STATEMENT: The retrofit will bring the remaining bus fleet to the same level of security and monitoring system levels as found on the 2008 and 2009 buses.

EXPLANATION: This project provides state of the art fare collection and seamless fare payment in the Baltimore and Washington regions.

PROJECT: Replacement of Fare Collection Equipment and Implementation of Smart Card

DESCRIPTION: Replace existing fare collection equipment on Bus, Light Rail and Metro Subway with automatic fare collection equipment which includes the implementation of smart card technology and credit card readers on the rail systems. The project also includes the implementation of a customer service center to support the MTA and Washington Region transit agencies.

PURPOSE & NEED SUMMARY STATEMENT: The new fare collection equipment will increase the efficiency of operations, reduce fraud, improve data collection and enhance reliability. The smart card technology will allow faster passenger loading on bus and rail, and will provide more accurate ridership numbers.

PROJECT: Trunked Radio Expansion

DESCRIPTION: Construct additional radio communication system sites in Owings Mills, Cub Hill and Jacobsville.

PURPOSE & NEED SUMMARY STATEMENT: The additional trunked radio system sites will enhance radio coverage for MTA Operations, Maintenance and Police activities thereby increasing safety and reliability.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet to Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
None.

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☐ Quality of Service ☒ Safety & Security
☐ System Preservation & Performance ☐ Environmental Stewardship
☐ Connectivity for Daily Life

EXPLANATION: This project provides enhanced and dependable radio coverage for MTA services.

STATUS: Initial three locations at Mays Chapel, Westview and TV Hill are complete. Sites at Owings Mills, Cub Hill and Jacobsville are to begin construction during current fiscal year.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Cost increased by \$1.1 million due to revised estimates.

EXPLANATION: This project provides the upgrade for the bus fleet communication system and will improve communication and information to and from buses.

PROJECT: CAD/AVL Systems

DESCRIPTION: The Computer-Aided Dispatch and Automated Vehicle Location (CAD/AVL) project provides radio data channel expansion to improve the bus fleet's voice and data communication. It includes upgrades to the existing CAD/AVL system hardware and software as well as upgrading obsolete vehicle equipment with state of the art replacements.

PURPOSE & NEED SUMMARY STATEMENT: The procurement of an updated and enhanced CAD/AVL system, together with the expanded data channel, will improve the operational efficiency of the bus fleet. These efforts will improve customer service by providing real time management and scheduling adherence.

EXPLANATION: This effort supports multiple parking expansion projects for Southern Maryland Commuter Bus services, addressing demand for increased commuter parking.

PROJECT: Southern Maryland Commuter Bus Initiative

DESCRIPTION: Construction of Commuter Bus Park and Ride lots at Dunkirk, Prince Frederick, Waldorf, LaPlata and Charlotte Hall in Southern Maryland.

PURPOSE & NEED SUMMARY STATEMENT: Southern Maryland has been identified as one of the fastest growing regions in Maryland. The project will assist in keeping up with demand for commuter parking which continues to grow as more people move into the region.

PROJECT: Locally Operated Transit Systems Capital Procurement Projects (Local Jurisdictions) (ARRA)

DESCRIPTION: Funding to rural and small jurisdictions for transit vehicles, equipment and facilities. In addition, the MTA provides rideshare funds to Baltimore City, Anne Arundel, Baltimore, Calvert, Carroll, Frederick, Harford, Howard, Montgomery and Prince George's Counties and the Tri-County Council for Southern Maryland to promote the use of carpools and vanpools. MTA facilitates federal funds for locally-sponsored projects.

JUSTIFICATION: Intense use of equipment and increased service demand requires regular vehicle replacement and expansion as well as adequate support facilities providing reliable maintenance service. The ridesharing program provides citizens with information on expanded commute options and provides companies with technical expertise needed to meet federal clean air requirements.

EXPLANATION: Expanded parking capacity making usage more convenient for MARC passengers.

PROJECT: MARC West Baltimore Station Parking Expansion (ARRA)

DESCRIPTION: Construct additional parking spaces at the West Baltimore MARC Station in Baltimore City. Phase I is for the demolition of structures to prepare for the parking expansion.

PURPOSE & NEED SUMMARY STATEMENT: Parking demand regularly exceeds the capacity of the existing 326-space lot. Expanded lot will accommodate ridership growth and reduce overflow parking in adjacent communities. Lot will be designed to accommodate the proposed Red Line as well as transit oriented development.

PROJECT: Takoma/Langley Park Transit Center (ARRA)

DESCRIPTION: Construction of an off-street covered transit center at the intersection of MD 193 and MD 650 in the Takoma/Langley Park community. Associated SHA improvements include roadway and intersection improvements, pedestrian safety measures, and new sidewalks and crosswalks. Project includes 12 bus bays to provide service for 11 bus routes, passenger shelters, public restroom facilities, a canopy over the entire facility and transit information services. The project will accommodate a future Purple Line station.

PURPOSE & NEED SUMMARY STATEMENT: This area is the busiest transit transfer point, outside a rail station in the Washington region, with 11 Metrobus, Ride On, The Bus and shuttle van routes. The project will also address pedestrian safety issues.

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

MTA DEVELOPMENT & EVALUATION PROJECTS

PROJECT: Kirk Bus Division

DESCRIPTION: The existing Kirk Division will be replaced with a modern facility on an expanded site. The new facility will be able to accommodate buses of all types.

JUSTIFICATION: Existing facility is 60 years old and does not support efficient, effective bus operations. The replacement facility will be able to handle the newer generation of transit buses more efficiently. Present neighborhood concerns regarding noise and air quality will also be addressed.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet to Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
 None.

STATUS: Project planning phase is complete. Project design underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

PROJECT: Assessment of Transit Needs for Maryland Base Realignment and Closure

DESCRIPTION: Assess transit needs related to the proposed BRAC assignments and prepare proposals to address identified needs. Focus will be on Ft Meade, Bethesda, Aberdeen, Fort Detrick and Andrews AFB. This is a BRAC-related project.

JUSTIFICATION: Central Maryland is expected to experience additional growth due to BRAC. Funding is provided to study transit improvements needed to support additional travel demand.

PROJECT: Southern Maryland Mass Transportation Analysis

DESCRIPTION: Planning activities to identify and protect an alignment for future development of high-capacity transit services in the US 301/MD 5 corridor from White Plains to the Branch Avenue Metrorail Station.

JUSTIFICATION: Continued growth in Southern Maryland has created high levels of traffic congestion in the US 301/MD 5 corridor. Planning is needed to determine the role of a high capacity transit service in the corridor.

PROJECT: Red Line

DESCRIPTION: 14-mile light rail line between Woodlawn area in western Baltimore County and Bayview Medical Center located within Baltimore City.

JUSTIFICATION: The Red Line will improve transit mobility in an east-west corridor of the Baltimore region. This project is intended to address traffic congestion, provide better connectivity to existing transit service, support new and future transit-oriented economic development and revitalization efforts and address regional air quality issues. The Red Line will provide connection to MARC, Light Rail and Metro. The project is estimated to have ridership of 60,000 in 2030.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law
☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required

PROJECT: Purple Line

DESCRIPTION: 16-mile light rail line between New Carrollton (in Prince George's County) and Bethesda (in Montgomery County).

JUSTIFICATION: The Purple Line would serve a highly congested corridor in Prince George's and Montgomery Counties connecting the Metrorail Red, Green and Orange lines to key employment, residential and institutional destinations. This transit line also connects the MARC Brunswick, Camden and Penn lines as well as Amtrak at New Carrollton. In addition, the Purple Line connects to existing regional and local bus services. The project is estimated to generate transit ridership of 68,000 in 2030.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

PROJECT: Corridor Cities Transitway (CCT)

DESCRIPTION: Transit portion of a multi-modal corridor study to consider transit and highway improvements in the I-270/US 15 corridor in Montgomery and Frederick Counties from Shady Grove Metro Station to I-70. The Corridor Cities Transitway (CCT) would be either a light rail transit (LRT) or bus rapid transit (BRT) line along a 14-mile corridor from Rockville through Quince Orchard, Gaithersburg and Germantown to Clarksburg. Another option under study is "premium bus" service along proposed I-270 High Occupancy Vehicle (HOV)/managed lanes.

JUSTIFICATION: The purpose and need for the project is to relieve congestion and improve safety due to existing and projected growth within the I-270/US 15 Corridor. The CCT would also enhance mobility by serving existing and future transit-oriented land uses in the corridor.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet to Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

SHA - I-70/I-270 Interchange
 SHA - I-70, MD 85 Extended and MD 355 Relocated
 SHA - MD 80 and MD 355 Relocated
 SHA - I-70, Mt. Phillip Road to MD 144

STATUS: Selection of locally preferred alternative and preliminary engineering to begin during current fiscal year.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Total Estimated Cost decreased \$5.0 million to reflect deletion of the Balance to Complete funding.

Federal Funds - WMATA *	104.8	93.9	95.4	100.2	105.2	110.5	610.0

* These federal funds are received by WMATA directly and are not included in the MDOT budget.

PROJECT: Metrorail Debt Service

DESCRIPTION: Maryland Department of Transportation's share of Metrorail debt service payments, which supplement the 103-mile rail system's construction.

JUSTIFICATION: Payments required to retire revenue bonds previously issued by the Washington Metropolitan Transit Authority to supplement construction costs of the Metrorail system.

SMART GROWTH STATUS: ☒ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA
☐ Project Outside PFA
☐ PFA Status Yet to Be Determined

☐ Grandfathered
☐ Exception Will Be Required
☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
WMATA Capital Improvement Program -- Line 2

STATUS: Annual payments are made for debt service by MDOT in accordance with legislation enacted in 1980 and amended by the General Assembly. Maryland's share increased from 75% to 100% effective FY 2000.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Decrease of \$19.32 million. The final maturity for the Metrorail construction bonds is FY 2015. Maryland's final payment to WMATA for Maryland's share of the Metrorail construction bonds will occur in FY 2014.

PROJECT: WMATA Capital Improvement Program

DESCRIPTION: This program provides Maryland's share of the funding for the Washington Metropolitan Area Transit Authority's Capital Improvement Program (CIP). It includes Maryland's share of matching funds to federal formula funds received directly by WMATA as well as Maryland's share of additional state and local funds for WMATA capital projects.

JUSTIFICATION: WMATA's FY 2011-2016 CIP is focused on infrastructure rehabilitation and replacement and maintaining the Washington region's primary transit system in a state of good repair. WMATA's FY 2011-2016 CIP includes, but is not limited to, projects to replace rail cars, rehabilitate some of the oldest segments of the Metrorail system, replace vehicles for Metrobus and MetroAccess, and implement recommendations of the National Transportation Safety Board. The projects included in WMATA's CIP are priority projects selected from WMATA's \$11 billion Capital Needs Inventory, a detailed assessment of WMATA's capital needs over the next ten years.

SMART GROWTH STATUS: ☒ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet to Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

Metrorail Debt Service -- Line 1
 Matching Funds -- Line 4

STATUS: A new capital funding agreement among the State of Maryland, WMATA, the District of Columbia and local governments in Northern Virginia was executed on July 1, 2010.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Project cost increased \$224.6 million due to the addition of \$198.0 million in FY 2016 and annual contributions to the Capital Improvement Program.

POTENTIAL FUNDING SOURCE: <input checked="" type="checkbox"/> SPECIAL <input checked="" type="checkbox"/> FEDERAL <input type="checkbox"/> GENERAL <input type="checkbox"/> OTHER

This project includes a total of \$1.05 billion in federal funds attributable to Maryland that are received directly by WMATA.
 9003, 9004, 9005, 9006

PROJECT: Rail Cars/Capital Improvement Program

DESCRIPTION: Once portion of this program funds Maryland's share of 48 new rail cars that were ordered in FY 2003. This program also funds Maryland's allocated share of the Washington Metropolitan Area Transit Authority's Project Development Program.

JUSTIFICATION: The addition of new rail cars provides significant relief to certain severe overcrowding conditions. WMATA's Project Development Program provides for preliminary design and planning of Maryland directed projects within the WMATA region.

PROJECT: Matching Funds for "Passenger Rail Investment and Improvement Act of 2008" - P.L. 110-432

DESCRIPTION: The Passenger Rail Investment and Improvement Act of 2008 authorizes new federal funds to be appropriated over a ten year period for capital and preventative maintenance projects of the Washington Metropolitan Area Transit Authority. The federal legislation also requires matching funds from Maryland, Virginia, and the District of Columbia. This program provides Maryland's share of the match to the federal funds.

JUSTIFICATION: Maryland is committed to paying the \$50.0 million per year as part of the dedicated funding package for WMATA.

PROJECT: WMATA American Recovery and Reinvestment Act (ARRA) Capital Program

DESCRIPTION: The American Recovery and Reinvestment Act (ARRA), signed into law by President Obama on February 17, 2009, provides federal funding for infrastructure projects around the nation. WMATA is projected to receive \$201.8 million directly from the federal government; no local match required. Approximately \$72.4 million of the federal funds are attributable to Maryland.

JUSTIFICATION: The funds are being used for capital projects which include the procurement of replacement buses and support equipment, rehabilitation of passenger and maintenance facilities, and upgrades to various operational and information technology systems. WMATA's ARRA projects were selected based on WMATA's agency goals and the ability to meet the requirements of the federal law.

PROJECT: Metro Matters Program

DESCRIPTION: Metro Matters is a regionally funded program of capital improvements for the Washington Metropolitan Area Transit Authority. This program provides Maryland's share of the required contributions under the terms of the Metro Matters Funding Agreement.

JUSTIFICATION: The Metro Matters program was initiated in FY 2005 with a multi-year budget of approximately \$3.9 billion. A majority of Metro Matters project work was completed during FY 2005-2010. Repayment of long-term bonds issued by WMATA to fund the Metro Matters program will extend through FY 2034.

SHA

SHA STATEWIDE

PROJECT: Coordinated Highway Action Response Team (CHART)

DESCRIPTION: Install advanced traffic management system (ATMS) and advanced traffic information system (ATIS) technologies on Interstate highways and arterials statewide. Technologies include cameras, traffic detectors, weather sensors, dynamic message signs, highway advisory radios, web sites and telecommunication networks. CHART is comprised of five major components: 1) Traffic and Roadway Monitoring; 2) Incident Management; 3) "511" - Traveler's Information; 4) System Integration and Communication; 5) Traffic Management.

PURPOSE & NEED SUMMARY STATEMENT: Heavy volumes of traffic, stop-and-go commuter peaks, and lack of comprehensive information regarding current, real-time conditions on available alternatives contribute to and compound the effects of unexpected incidents. With the growth in traffic outpacing any realistic hope of expanding capacity through building new highways, or expanding existing ones, it is imperative to operate the existing highway system more efficiently through the application of Intelligent Transportation System (ITS) technologies and interagency teamwork.

SMART GROWTH STATUS: ☒ Project Not Location Specific or Not Subject to PFA Law

<input type="checkbox"/> Project Inside PFA	<input type="checkbox"/> Grandfathered
<input type="checkbox"/> Project Outside PFA	<input type="checkbox"/> Exception Will Be Required
<input type="checkbox"/> PFA Status Yet To Be Determined	<input type="checkbox"/> Exception Granted

PROJECT: Community Safety and Enhancement Program

DESCRIPTION: This is the SHA element of the Statewide Neighborhood Conservation Program. Funds will be made available for highway transportation projects in designated revitalization areas. Areas will be designated by local jurisdictions, taking into account factors such as the age and number of abandoned and substandard structures, the extent of unemployment, and the redevelopment plans and strategies of the local jurisdiction. Project improvements include roadway reconstruction, lighting and drainage improvements, streetscaping and roadway improvements.

PURPOSE & NEED SUMMARY STATEMENT: Some of Maryland's older urban areas contain significant investments in physical infrastructure that are underutilized due to their inability to attract new investment. MDOT is joining with other State agencies to target resources for these areas with the goal of increasing their attractiveness to private investment.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service ☒ Safety & Security
☒ System Preservation & Performance ☒ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: This program targets transportation improvements in older urban areas with physical infrastructure that is in need of repair to support economic development and revitalization. Provides/promotes bike and pedestrian access to commercial centers, transit facilities, schools and other public facilities. Encourages other State Agencies to target resources for those areas with the goal of increasing their attractiveness for private investment.

STATUS: Engineering, Right-of-way and Construction underway. This sheet represents a summary of this program. Individual projects are shown in the State Highway Administration's Safety, Congestion Relief, Highway and Bridge Preservation Program.

PROJECT: BRAC Intersections near Bethesda Naval Center

DESCRIPTION: Design and construct intersection improvements at key locations along access routes to Bethesda Naval Center. Bicycle and pedestrian facilities will be provided where appropriate.

PURPOSE & NEED SUMMARY STATEMENT: Improved access to Bethesda Naval Center is a vital component needed to accommodate the increase of employment as a result of BRAC. These intersections improvements will improve safety, capacity and operations in the near-term.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service ☒ Safety & Security
☒ System Preservation & Performance ☐ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: Improvements to key intersections in the vicinity of Bethesda Naval Medical Center are vital in support of the congressionally authorized BRAC initiative. These improvements will provide congestion relief and safety improvements as well as provide for the safe and efficient movement of freight.

STATUS: Engineering underway. Right-of-Way acquisition to begin during current fiscal year. Construction to begin during budget fiscal year.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The increase of \$4.4 million reflects the addition of FY10 Federal Aid Appropriation Funds.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

Allegany

PROJECT: US 220, McMullen Highway

DESCRIPTION: Replace Bridge 1060 over the Potomac River. Shoulders and sidewalks will accommodate bicycles and pedestrians. Existing structure will be removed. (ARRA)

PURPOSE & NEED SUMMARY STATEMENT: The existing bridge is structurally deficient.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☐ Quality of Service ☐ Safety & Security
☒ System Preservation & Performance ☐ Environmental Stewardship
☐ Connectivity for Daily Life

EXPLANATION: The existing bridge is structurally deficient. The bridge provides a critical link from Maryland to West Virginia.

STATUS: Construction underway. The cost shown is the estimated cost for Maryland's share only (which is approximately 35% of the total cost).

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The cost decrease of \$6.8 million is due to a favorable bid price.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☒ OTHER

Anne Arundel

PROJECT: MD 295, Baltimore Washington Parkway

DESCRIPTION: Widen MD 295 from 4 to 6 lanes from I-695 (Baltimore Beltway) to I-195 (1.50 miles).

PURPOSE & NEED SUMMARY STATEMENT: This project will ease growing congestion and improve access to one of the State's economic engines, the Baltimore-Washington International Thurgood Marshall Airport.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
 MD 295, MD 100 to I-195 (Line 3)

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☒ Quality of Service ☐ Safety & Security
☒ System Preservation & Performance ☒ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: This project will provide a satisfactory level of service, including reduction in travel time delay. Widening is being done in the median limiting property and environmental impacts.

STATUS: Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

STATE HIGHWAY ADMINISTRATION -- Anne Arundel County -- Line 2

PRIMARY DEVELOPMENT AND EVALUATION PROGRAM

PROJECT: MD 3, Robert Crain Highway

DESCRIPTION: Study to upgrade MD 3 from US 50 to MD 32 to address safety and capacity concerns (8.89 miles). Wide curb lanes and shoulders will accommodate bicycles. Bicycle and pedestrian access will be provided where appropriate.

JUSTIFICATION: This project would improve safety and operations and relieve congestion in this heavily traveled corridor.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

US 301, South Corridor Transportation Study (Prince George's County - Line 15)
 US 301, North of Mount Oak Road to US 50 (Prince George's County - Line 16)
 MD 450, Stonybrook Drive to west of MD 3 (Prince George's County - Line 23)

STATUS: Project Planning underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

SAFETY, CONGESTION RELIEF, HIGHWAY AND BRIDGE PRESERVATION PROGRAM

STATE HIGHWAY ADMINISTRATION -- ANNE ARUNDEL COUNTY LINE 7 (cont'd)

ITEM NO.	ROUTE NO.	DESCRIPTION AND IMPROVEMENT TYPE	TOTAL ESTIMATED COST (\$000's)	CONSTRUCTION START Status as of December 1, 2010
		<u>Fiscal Years 2011 and 2012 (cont'd)</u>		
		<u>Enhancements (cont'd)</u>		
62		I 97 Stormwater Management Facilities Functional Upgrades; reconstruction of 13 stormwater management facilities along I 97 from south of MD 178 to MD 100 and 2 stormwater management facilities on MD 100 near MD 713 and near Wright Road to current standards	609	Underway
63		North Cypress Branch Stream Restoration; 2200 linear feet of stream restoration for creation of a one-acre stormwater wetland; restoration/creation of 3.3 acres of wetlands along the stream; environmental mitigation	650	FY 2011
		<u>Scenic/Historic Highway Programs/Visitor Centers (cont'd)</u>		
64		London Town Visitor's Center & Museum - construct a Visitor's Center and Museum at Historic London Town and Gardens in Edgewater (Visitor's Center Complete)	2,647	Underway
		<u>Congressional Earmarks</u>		
65		Construct Broadneck Peninsula Trail; construct trail (Earmark \$1.2 million; CO)	0	
66		Patuxent Research Refuge road improvements (Earmark \$3 million; PE, CO) Sponsor: U.S. Fish & Wildlife Service	0	
67		South Shore Trail; construct trail from MD 3 to I-97 at Waterbury Road; construct trail (Earmark \$1.6 million; PE, CO)	0	
68		Linthicum; Peer review study of conflicts between road system and light rail operations (Earmark \$80,000; PE) Sponsor: Maryland Transit Administration	0	

Baltimore

**PROJECT:** I-695, Baltimore Beltway**DESCRIPTION:** Replacement of MD 139 Bridge (Charles Street).**PURPOSE & NEED SUMMARY STATEMENT:** The bridge is nearing the end of its structural life and widening of the bridge is required for the future capacity needs of I-695.**SMART GROWTH STATUS:** ☐ Project Not Location Specific or Not Subject to PFA Law

<input checked="" type="checkbox"/> Project Inside PFA	<input type="checkbox"/> Grandfathered
<input type="checkbox"/> Project Outside PFA	<input type="checkbox"/> Exception Will Be Required
<input type="checkbox"/> PFA Status Yet To Be Determined	<input type="checkbox"/> Exception Granted

ASSOCIATED IMPROVEMENTS:

I-695, I-83 to I-95 (Line 9)
 I-695, Noise Barriers (System Preservation Program)

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- | | |
|---|---|
| <input checked="" type="checkbox"/> Quality of Service | <input checked="" type="checkbox"/> Safety & Security |
| <input checked="" type="checkbox"/> System Preservation & Performance | <input type="checkbox"/> Environmental Stewardship |
| <input checked="" type="checkbox"/> Connectivity for Daily Life | |

EXPLANATION: The MD 139 (Charles Street) bridge is nearing the end of its structural life. The bridge serves as a major link connecting Lutherville and West Towson neighborhoods. The new bridge will provide additional capacity for safety, improved operation and enhanced pedestrian and bicycle accommodations. The bridge will be lengthened to allow widening of the Baltimore Beltway, I-695, which serves as the main emergency and freight transport interstate for the Baltimore region.

STATUS: Construction underway.**SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP:** The cost increase of \$2.1 million is due to additional bridge modifications, soil stabilization needs and slope repairs..**POTENTIAL FUNDING SOURCE:**

EXPLANATION: The Baltimore Beltway bridge over MD 26 (Liberty Road) is nearing the end of its structural life. The new bridge will provide critical capacity needed for improved safety and operations on I-695, vital emergency, freight carrier and connecting route for the Baltimore Region. Lengthening of the bridge deck will allow for pedestrian and bicycle accommodations along MD 26 (Liberty Road).

STATUS: Construction underway.**SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP:** The cost decrease of \$8.7 million is due to a favorable bid price..**POTENTIAL FUNDING SOURCE:**

☒ Exception Granted

ASSOCIATED IMPROVEMENTS:

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service
☒ System Preservation & Performance
☒ Connectivity for Daily Life

☒ Safety & Security
☐ Environmental Stewardship

EXPLANATION: This deteriorating bridge is a major link along the US 40 corridor. US 40 is a major commerce route for the transportation of goods and freight. In emergencies, the US 40 corridor serves as a back up route for I-70. The bridge will be rehabilitated in kind to preserve the historic nature of the structure and to blend in with its Patapsco State Park setting. The bridge will be widened to provide for bicycle/pedestrian compatible 5' shoulders.

STATUS: Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The cost decrease of \$9.8 million is due to a favorable bid price.

Calvert

PROJECT: MD 2/4, Solomons Island Road

DESCRIPTION: Upgrade MD 2/4, from south of MD 765 to north of Stoakley Road, excluding the MD 231 intersection, to a 6 lane divided highway with auxiliary lanes (3.29 miles). Sidewalks will be included where appropriate. Wide curb lanes will accommodate bicycles.

JUSTIFICATION: Projected traffic volumes generated by continuing commercial growth in the Prince Frederick area and throughout Calvert County along the MD 2/4 corridor will result in congestion along the existing roadway unless additional capacity is provided.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☒ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

Prince Frederick Boulevard (County Project)

STATUS: Engineering on hold for the segment from Fox Run Boulevard to Commerce Lane.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

Caroline

PROJECT: MD 404, Shore Highway

DESCRIPTION: Upgrade existing MD 404 from 1500' west of Cemetery Road to 2000' east of MD 480 (Phase 1A) (1.07 miles). Shoulders will accommodate bicycles and pedestrians. (ARRA)

PURPOSE & NEED SUMMARY STATEMENT: This project is needed to reduce traffic congestion caused by high seasonal peaks associated with summer resort traffic and to improve safety and service.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA
☒ Project Outside PFA
☐ PFA Status Yet To Be Determined

☒ Grandfathered
☐ Exception Will Be Required
☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
MD 404, US 50 to MD 404 Bus. (Line 4)

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service
☐ System Preservation & Performance
☐ Connectivity for Daily Life

☒ Safety & Security
☐ Environmental Stewardship

EXPLANATION: This project will decrease travel time and delay for seasonal resort traffic and will reduce congestion and related collision and injury rates.

STATUS: Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

PROJECT: MD 331, Dover Road

DESCRIPTION: Replace Bridge 20023 over Choptank River. The new span, which will be located south of the existing roadway, will provide a 50 foot river clearance. Shoulders will accommodate bicycles and pedestrians.

JUSTIFICATION: Constructing a new high level bridge will provide a safe and dependable MD 331 crossing of the Choptank River that will accommodate both vehicular and marine traffic. The old span has had mechanical difficulties in the past that affected commerce and emergency services in Caroline and Talbot counties. This bridge is functionally obsolete.

PROJECT: MD 140, Baltimore Street

DESCRIPTION: Streetscape improvements from Harney Road to MD 832 (Taneytown Streetscape). Bicycle and pedestrian facilities will be provided (1.76 miles).

PURPOSE & NEED SUMMARY STATEMENT: The improvement of MD 140, Baltimore Street, will enhance safety, traffic operations and neighborhood appearance.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA
☐ Project Outside PFA
☐ PFA Status Yet To Be Determined

 MD 3, US 50 to MD 32 (Prince George's Line 9)
 MD 5, US 301 at T.B. to North of I-95/I-495 (Prince George's Line 12)
 MD 5, Interchange at MD 373 and Brandywine Road Relocated (Prince George's Line 13)

STATUS: Project Planning on hold for the entire corridor, but proceeding with breakout projects in Bowie and Waldorf. Protective Right-of-way funding to be used to preserve viability of alternatives under study.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The cost increase of \$2.6 million is due to funds being added in FY16 for protective Right-of way acquisition.

Frederick

PROJECT: I-70, Baltimore National Pike

DESCRIPTION: This project is an extension of MD 475 (East Street) from South Street to the proposed Monocacy Boulevard (formerly Walser Drive). This project also included the construction of stormwater management ponds and a pumping station along Monocacy Boulevard. In addition, the project included an urban diamond interchange. This project also included the construction of a new MD 355 Bridge over I-70 at MD 85.

PURPOSE & NEED SUMMARY STATEMENT: Although signed as I-70, this section was constructed as US 40 Rel, the Frederick Bypass. Existing interchanges had short acceleration and deceleration lanes, very sharp curves, short merging and weaving sections and missing movements. Improvements included widening of the 4 lane section and reconstruction of the interchanges. This project enhanced access to the City of Frederick from I-70.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

I-70, Mt. Phillip Road to MD 144 FA (Line 7)

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☒ Quality of Service ☒ Safety & Security
☐ System Preservation & Performance ☐ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: The new interchange and approach Roads include improved geometric features which will reduce collision and injury rates for all users of the system. The project also improves access to jobs and services in the City of Frederick and along the MD 85 corridor. These improvements will encourage MARC ridership by providing better access to the station.

STATUS: Open to Service.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The cost increase of \$1.4 million is due to the redesign of the roundabout at MD 85.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

CURRENT (2010) - 4,100 - 9,250

PROJECTED (2030) - 24,000 - 36,250

PROJECT: I-70, Baltimore National Pike

DESCRIPTION: Widen I-70 east of MD 355 to east of MD 144, (1.57 miles) replace the I-70 bridge over Reich's Ford Road. The existing ramps to Monocacy Blvd. and Reich's Ford are reconstructed (Phase 2D).

PURPOSE & NEED SUMMARY STATEMENT: Signed as I-70, this section was constructed as US 40 Relocated and does not meet current Interstate highway standards. Existing interchanges have short acceleration and deceleration lanes, very sharp curves, short merging and weaving sections and missing movements. Improvements include widening of the 4 lane section and reconstruction of the interchanges. This project will enhance access to the City of Frederick and improve Interstate travel.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

I-70, Phase 2B, 2C and MD 475 from South Street to Monocacy Boulevard (Line 1)

I-70, Mt. Phillip Road to MD 144FA (Line 7)

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service ☒ Safety & Security
☒ System Preservation & Performance ☐ Environmental Stewardship
☐ Connectivity for Daily Life

EXPLANATION: By improving the geometry of the existing interchange ramps between I-70 and Monocacy Boulevard and Reich's Ford Road, this project will improve operations along I-70 through Frederick and reduce collision and injury rates.

STATUS: Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

DAILY TRAFFIC : (USAGE IMPACTS)

CURRENT (2010) - 81,975

PROJECTED (2030) - 106,400

PROJECT: I-270, Eisenhower Highway, and US 15, Frederick Freeway

DESCRIPTION: Multi-modal corridor study to consider highway and transit improvements in the I-270/US 15 corridor in Montgomery and Frederick counties from Shady Grove Metro Station to north of Biggs Ford Road (27.90 miles).

JUSTIFICATION: Poor levels of traffic service and safety problems are experienced throughout I-270 and on US 15 through the City of Frederick. Traffic conditions will continue to deteriorate due to rapid development along this corridor. I-270 is a heavily traveled commuter and transportation route and transportation improvements are needed to relieve existing and future traffic and to support planned economic development.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA
☒ Project Outside PFA
☐ PFA Status Yet To Be Determined

☐ Grandfathered
☒ Exception Will Be Required
☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

I-70, Mt. Phillip Road to MD 144 (Line 7)
 US 15, Interchange at Monocacy Boulevard (Line 10)
 MD 200, InterCounty Connector (Montgomery County Line 2)
 I-270, Interchange at Watkins Mill Road (Montgomery County Line 7)

STATUS: Project Planning underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

PROJECT: MD 180/MD 351, Jefferson Pike/Ballenger Creek Pike

DESCRIPTION: Study to improve the existing capacity and traffic operations along MD 180 and MD 351 from Greenfield Drive to Corporate Drive, while supporting existing and planned development.

JUSTIFICATION: Land adjacent to existing MD 180 and MD 351 is experiencing rapid growth. Businesses and residential developments in the study area have contributed to operational failures along the existing roadway network, as indicated by heavily congested roads and high traffic volumes, especially during peak periods.

Garrett

PROJECT: US 219 Relocated, Oakland Bypass

DESCRIPTION: Relocate US 219 from north of Oakland to MD 135 (2.40 miles). Sidewalks will be included where appropriate and shoulders will accommodate pedestrians in open sections. Shoulders and wide curb lanes will accommodate bicycles.

JUSTIFICATION: Existing US 219 through Oakland experiences congestion because of the frequency of entrances and intersections along with restricted roadway width. The bypass will divert through traffic including heavy trucks from downtown Oakland, improving safety and reducing congestion.

10		Hoyes Run Gully and Erosion Repair Project; construct a series of step pools with logs and boulders within a narrow floodplain, adjacent to Crabtree Bottom Road, to stabilize an un-named channel within the stream corridor (This project is a split funded project with the Environmental Preservation Program)	113	FY 2011

Harford

PROJECT: MD 24, Vietnam Veterans Memorial Highway

DESCRIPTION: Construct improvements to the I-95/MD 24 interchange, including upgrades to MD 24 and the reconstruction of the MD 24/MD 924 intersection to a grade-separated interchange. Phase 1 includes minor improvements to the I-95/MD 24 interchange and a grade-separated interchange at the MD24/MD 924 intersection. Future phases will be further investigated as part of the I-95 Section 200 project planning study. (BRAC Related)

PURPOSE & NEED SUMMARY STATEMENT: This project will provide improved capacity, operation and safety for the I-95/MD 24 interchange and the MD 24/MD 924/Tollgate Road intersection, which is in close proximity and vital to the I-95/MD 24 interchange operation.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

I-95, Section 200 (MdTA) - Development & Evaluation Program

I-95, Interchange at MD 24 (MdTA)

BRAC Intersection Improvements at APG (Statewide Line 7)

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service ☒ Safety & Security
☒ System Preservation & Performance ☐ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: The interchange is a part of the overall improvements planned for I-95, Section 200. The reconstruction of I-95/MD 24/MD 924 interchange will improve travel time for commuters and interstate travelers and the movement of freight and provide an efficient east coast emergency transportation corridor. The project will provide enhanced interstate access to the Aberdeen Proving Ground-Edgewood Area.

STATUS: Construction underway. The Maryland Transportation Authority is funding Engineering, Right-of-Way and Construction (the costs for those phases are shown in the Authority's program). Cost shown is SHA share only.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

STATE HIGHWAY ADMINISTRATION -- Harford County -- Line 2

SECONDARY CONSTRUCTION PROGRAM

PROJECT: MD 24, Rocks Road

DESCRIPTION: MD 24 will be reconstructed, with slopes repaired and guardrail replaced from South of Sharon Road to North of Stirrup Run Culvert.

PURPOSE & NEED SUMMARY STATEMENT: The purpose of this project is to improve the road safety by remediating the slope supporting MD 24, repairing the pavement, improving roadway drainage and addressing roadside safety concerns.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA ☐ Grandfathered
☒ Project Outside PFA ☒ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☐ Quality of Service ☒ Safety & Security
☒ System Preservation & Performance ☐ Environmental Stewardship
☐ Connectivity for Daily Life

EXPLANATION: This section of MD 24 travels through the pristine Rocks State Park and parallels Deer Creek. The reconstruction of MD 24 will be designed to preserve the historic and aesthetic value of the state park and at the same time preserve the operational and safety aspects of the state roadway.

STATUS: Engineering and Right-of-Way underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The cost increase of \$0.9 million is due to scope changes.

EXPLANATION: The project includes capacity and MD 715/Old Philadelphia Road intersection improvements to accommodate growth from BRAC. The improvements will address operational and safety concerns, support freight movement and provide improved access to the APG main gate. The proposed improvements will also eliminate the current dangerous u-turns for large commercial trucks accessing the industrial park area.

STATUS: Engineering and Right-of-way underway. Construction to begin during current fiscal year.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The cost decrease of \$7.4 million is due to a favorable bid price.

Howard

STATE HIGHWAY ADMINISTRATION -- Howard County -- Line 1

PRIMARY CONSTRUCTION PROGRAM

PROJECT: MD 32, Patuxent Freeway

DESCRIPTION: Construct a new interchange at Linden Church Road.

PURPOSE & NEED SUMMARY STATEMENT: This project will improve safety and operations and relieve congestion in the heavily traveled corridor.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA ☐ Grandfathered
☒ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☒ Exception Granted

ASSOCIATED IMPROVEMENTS:

MD 32 MD 108 to I-70 (Line 5)
 MD 32, Wellworth Way Access Improvements (Line 6)

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service ☒ Safety & Security
☐ System Preservation & Performance ☐ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: This grade-separation project will result in a reduction in travel times along MD 32, improved safety and reduced collision and injury rates.

STATUS: Engineering underway. Howard County is participating in the funding of Engineering. The County and SHA are discussing funding arrangements that could allow Right-of-way and Construction to proceed. The cost shown is SHA share only.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

DAILY TRAFFIC : (USAGE IMPACTS)

CURRENT (2010) - 25,500

PROJECTED (2030) - 30,800

PROJECT: US 40, Baltimore National Pike

DESCRIPTION: Replace Bridge 3109 over Patapsco River. Shoulders will accommodate bicycles and pedestrians.

PURPOSE & NEED SUMMARY STATEMENT: This project will rehabilitate the deteriorating 1936 historic bridge structure over the Patapsco River at the Baltimore/Howard County Line.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA
☒ Project Outside PFA
☐ PFA Status Yet To Be Determined

☐ Grandfathered
☐ Exception Will Be Required
☒ Exception Granted

ASSOCIATED IMPROVEMENTS:

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service
☒ System Preservation & Performance
☒ Connectivity for Daily Life

☒ Safety & Security
☐ Environmental Stewardship

EXPLANATION: This deteriorating bridge is a major link along the US 40 corridor. US 40 is a major commerce route for the transportation of goods and freight. In emergencies, the US 40 corridor serves as a back up route for I-70. The bridge will be rehabilitated in kind to preserve the historic nature of the structure and to blend in with its Patapsco State Park setting. The bridge will be widened to provide for bicycle/pedestrian compatible 5' shoulders.

STATUS: Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The cost decrease of \$9.8 million is due to a favorable bid price.

PROJECTED (2030) - 106,425

PROJECT: US 29, Columbia Pike

DESCRIPTION: Widen the northbound section of US 29 from the Middle Patuxent River to Seneca Drive from 2 to 3 lanes (1.7 miles).

JUSTIFICATION: This project will improve safety and reduce congestion by upgrading northbound US 29 to match the southbound section, which is currently 3 lanes.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law
☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
US 29, Seneca Drive to MD 175 (Line 7)

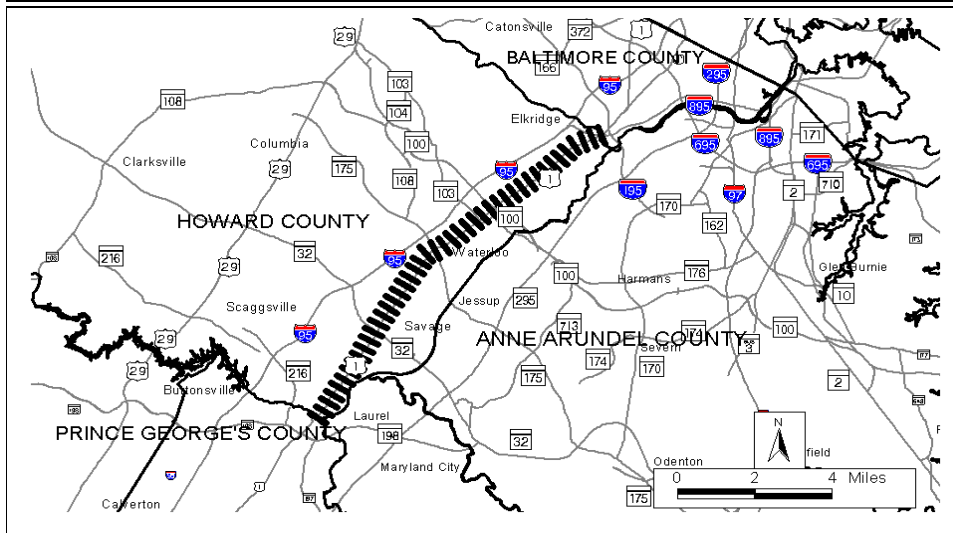

STATUS: Engineering underway and being done under the segment from MD 175 to Seneca Drive (Line 7).

SECONDARY DEVELOPMENT AND EVALUATION PROGRAM

PROJECT: US 1, Washington Boulevard

DESCRIPTION: Studies to identify potential improvements along the US 1 corridor from the Prince George's County Line to the Baltimore County Line, including potential interchange improvements at MD 175. (11.0 miles).

JUSTIFICATION: Improvements identified as a result of these studies will provide a blueprint for future State, local and developer projects such that the corridor can be developed in a manner consistent with the County's overall vision plan as well as in a way that accommodates existing and future travel demand to improve safety and mobility on US 1, circulation on the supporting local network, and connectivity for all users of the system, including bicyclists and pedestrians.

PROJECT: MD 200, InterCounty Connector

DESCRIPTION: Construct a new East-West multi-modal highway in Montgomery and Prince George's counties between I-270 and I-95/US 1.

PURPOSE & NEED SUMMARY STATEMENT: This transportation project is needed to increase community mobility and safety; to support development and local land-use plans; to improve access between economic growth centers; to advance home land security measures; and to help restore the natural, human and cultural environments from past development impacts in the project area.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA
☒ Project Outside PFA
☐ PFA Status Yet To Be Determined

☐ Grandfathered
☐ Exception Will Be Required
☒ Exception Granted

ASSOCIATED IMPROVEMENTS:

US 29 Interchanges (Lines 9,10)
 MD 28/MD 198, MD 97 to I-95 (Line 11)
 I-95/Contee Road Interchange (Prince George's County - Line 5)
 MD 201 Extended/US 1, I-95/I-495 to Contee Road (Prince George's County - Line 20)

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service
☐ System Preservation & Performance
☒ Connectivity for Daily Life

☒ Safety & Security
☒ Environmental Stewardship

EXPLANATION: MD 200 will provide an east/west connection to facilitate movement of freight and people. It provides an improved route for emergency vehicles and improved security during a state of emergency. The new access will support master plan development in Montgomery and Prince George's counties. The project includes numerous environmental features such as wildlife crossings and stream restorations.

STATUS: Right-of-way and Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Additional project funds are shown in MdTA's portion of the CTP. The funding shown in SHA's Program is due to the Federal Appropriation Acts of 2004, 2005 and Federal High Priority/NC11P Project Funds.

DAILY TRAFFIC : (USAGE IMPACTS)

CURRENT (2010) - N/A

PROJECTED (2030) - 30,400 - 96,500

PROJECT: MD 97, Georgia Avenue

DESCRIPTION: Construct interchange improvements at Randolph Road. Sidewalks will be included where appropriate. Wide curb lanes will accommodate bicycles.

PURPOSE & NEED SUMMARY STATEMENT: This project would relieve congestion at the existing intersection.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:
 InterCounty Connector (Line 2)

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☒ Quality of Service ☒ Safety & Security
☐ System Preservation & Performance ☐ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: This grade-separation project will result in a reduction in travel times along both Randolph Road and Georgia Avenue and improve safety by separating the through movements. The new interchange will also provide new sidewalks and wide curb lanes to safely accommodate all users of the road.

STATUS: Engineering and Right-of-way underway. Construction for advanced utility work underway. Construction for the overall project will begin in FY14. County to provide \$14.4 million for Right-of-way and Advanced Utilities. The cost shown is SHA share only.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

INTERSTATE DEVELOPMENT AND EVALUATION PROGRAM

PROJECT: I-270, Eisenhower Highway, and US 15, Frederick Freeway

DESCRIPTION: Multi-modal corridor study to consider highway and transit improvements in the I-270/US 15 corridor in Montgomery and Frederick counties from Shady Grove Metro Station to north of Biggs Ford Road (27.90 miles).

JUSTIFICATION: Poor levels of traffic service and safety problems are experienced throughout I-270 and on US 15 through the City of Frederick. Traffic conditions will continue to deteriorate due to rapid development along this corridor. I-270 is a heavily traveled commuter and transportation route and transportation improvements are needed to relieve existing and future traffic and to support planned economic development.

 103,900 - 267,400 (I-270)

STATE HIGHWAY ADMINISTRATION -- Montgomery County -- Line 7

INTERSTATE DEVELOPMENT AND EVALUATION PROGRAM

PROJECT: I-270/Watkins Mill Road Extended

DESCRIPTION: Construct a new interchange at Watkins Mill Road Extended.

JUSTIFICATION: This project would support economic development and relieve existing congestion at the I-270/MD 124 interchange and the MD 355/MD 124 intersection. It would provide access from I-270 to the Metropolitan Grove Road (MARC) commuter rail station.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

InterCounty Connector (Line 2)
 I-270 and US 15 Multi-Modal Corridor Study (Line 6)

STATUS: Partial Engineering underway. The County is contributing \$2.4 million towards engineering. The cost shown is SHA share only. The County and SHA are discussing an additional \$2.5 million to complete Engineering on the bridge.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

INTERSTATE DEVELOPMENT AND EVALUATION PROGRAM

PROJECT: I-95/I-495, Capital Beltway

DESCRIPTION: Study to widen I-495 and determine the feasibility of managed lanes from the American Legion Bridge to the Woodrow Wilson Bridge (42.2 miles).

JUSTIFICATION: Increased development in Prince George's and Montgomery counties and the concurrent increase in traffic has caused the Capital Beltway to experience severe congestion.

Prince George's

PROJECT: I-295/I-495, National Harbor

DESCRIPTION: Construct access improvements and MD 414 Extended.

PURPOSE & NEED SUMMARY STATEMENT: This project supports the National Harbor project, which is a major economic development engine in Prince George's County.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

I-95/I-495, American Legion Bridge to Woodrow Wilson Bridge (Line 6)
 MD 210, MD 228 to I-95/I-495 (Line 14)
 MD 210, Interchange at Kerby Hill/Livingston Roads (Line 25)

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service ☐ Safety & Security
☐ System Preservation & Performance ☐ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: National Harbor is an emerging mixed-use center in Prince George's County and a major draw for the Capital Region. Improved access will allow the National Harbor to continue to prosper.

STATUS: Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The cost decrease of \$2.7 million is due to a favorable bid price.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☐ FEDERAL ☐ GENERAL ☐ OTHER

CURRENT (2010) - 63,250

PROJECTED (2030) - 97,700

STATE HIGHWAY ADMINISTRATION -- Prince George's County -- Line 3

PRIMARY CONSTRUCTION PROGRAM

PROJECT: MD 200, InterCounty Connector

DESCRIPTION: Construct a new East-West multi-modal highway in Montgomery and Prince George's counties between I-270 and I-95/US 1.

PURPOSE & NEED SUMMARY STATEMENT: This transportation project is needed to increase community mobility and safety; to support development and local land-use plans; to improve access between economic growth centers; to advance home land security measures; and to help restore the natural, human and cultural environments from past development impacts in the project area.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA
☒ Project Outside PFA
☐ PFA Status Yet To Be Determined
 ☐ Grandfathered
☐ Exception Will Be Required
☒ Exception Granted

ASSOCIATED IMPROVEMENTS:

I-95/Contee Road Interchange (Line 5)
 MD 28/MD 198, MD 97 to I-95 (Line 18)
 MD 201 Ext/US 1, I-95 to Contee Road (Line 20)

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service
☐ System Preservation & Performance
☒ Connectivity for Daily Life
☒ Safety & Security
☒ Environmental Stewardship

EXPLANATION: MD 200 will provide an east/west connection to facilitate movement of freight and people. It provides an improved route for emergency vehicles and improved security during a state of emergency. The new access will support master plan development in Montgomery and Prince George's counties. The project includes numerous environmental features such as wildlife crossings and stream restorations.

STATUS: Right-of-way and Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Additional project funds are shown in MdTA's portion of the CTP. The funding shown in SHA's Program is due to the Federal Appropriation Acts of 2004, 2005 and Federal High Priority/NC11P Project Funds.

SECONDARY CONSTRUCTION PROGRAM

PROJECT: MD 725, Old Marlboro Road

DESCRIPTION: Replace Bridge 16009 over Federal Spring Branch. Shoulders and sidewalks will accommodate bicycles and pedestrians. (ARRA)

PURPOSE & NEED SUMMARY STATEMENT: The existing bridge is structurally deficient and functionally obsolete.

SMART GROWTH STATUS: ☒ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service ☒ Safety & Security
☒ System Preservation & Performance ☐ Environmental Stewardship
☒ Connectivity for Daily Life

EXPLANATION: The existing bridge is nearing the end of its useful life and is in need of replacement. The new bridge will be widened to provide for a new sidewalk allowing for safe movement across the bridge for all users of the road.

STATUS: Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

PROJECTED (2030) - 141,000 (MD 5) 204,400 (I-95/495)

STATE HIGHWAY ADMINISTRATION -- Prince George's County -- Line 9

PRIMARY DEVELOPMENT AND EVALUATION PROGRAM

PROJECT: MD 3, Robert Crain Highway

DESCRIPTION: Study to upgrade MD 3 from US 50 to MD 32 to address safety and capacity concerns (8.89 miles). Wide curb lanes and shoulders will accommodate bicycles. Bicycle and pedestrian access will be provided where appropriate.

JUSTIFICATION: This project would improve safety and operations and relieve congestion in this heavily traveled corridor.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

US 301, South Corridor Transportation Study (Line 15)
 US 301, North of Mount Oak Road to US 50 (Line 16)
 MD 450, Stonybrook Drive to west of MD 3 (Line 23)

STATUS: Project Planning underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

PROJECT: MD 223, Piscataway Road

DESCRIPTION: Reconstruct MD 223 from Steed Road to MD 5. Bicycle and pedestrian facilities will be included where appropriate.

JUSTIFICATION: Increased development along the MD 223 corridor has caused traffic congestion during peak hours. Additional roadway capacity is needed to address this congestion.

PROJECT: MD 450, Annapolis Road

DESCRIPTION: Upgrade and widen existing MD 450 to a multi-lane divided highway from Stonybrook Drive to west of MD 3 (1.37 miles). Sidewalks will be included where appropriate. Wide curb lanes will accommodate bicycles.

JUSTIFICATION: Additional lanes are needed to accommodate increasing volumes of traffic. This improvement would provide better access to developing areas of central Prince George's County.

Queen Anne's

STATE HIGHWAY ADMINISTRATION -- Queen Anne's County -- Line 1

PRIMARY DEVELOPMENT AND EVALUATION PROGRAM

PROJECT: MD 404, Shore Highway

DESCRIPTION: Upgrade existing MD 404 to a 4 lane divided highway with access controls from US 50 to MD 404 Business (11.83 miles). Shoulders will accommodate bicycles and pedestrians.

JUSTIFICATION: This project is needed to reduce traffic congestion caused by high seasonal peaks associated with summer resort traffic and to improve safety and service.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☒ Grandfathered
☒ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

US 50, US 301 to MD 404 (Line 2)

MD 404, West of Cemetery Road to East of MD 480 (Caroline County Line 1)

STATUS: Partial Engineering underway.

PRIMARY DEVELOPMENT AND EVALUATION PROGRAM

PROJECT: US 50, Ocean Gateway

DESCRIPTION: Widen existing US 50 from US 301 at Queenstown to MD 404 (13.8 miles) to 6 lanes, acquire control of access and replace at-grade intersections with interchanges. Shoulders and service roads will accommodate bicycles and pedestrians.

JUSTIFICATION: This improvement is needed to provide increased capacity to relieve traffic congestion and for improved safety.

St. Mary's

PROJECT: MD 237, Chancellors Run Road

DESCRIPTION: Upgrade and widen MD 237 to a multi-lane highway from Pegg Road to MD 235 (2.80 miles). Sidewalks will serve pedestrians. Wide curb lanes will accommodate bicycles.

PURPOSE & NEED SUMMARY STATEMENT: The existing two lane roadway is narrow with minimal shoulders and some sharp horizontal and vertical curves. It experiences periods of congestion and will be incapable of handling projected peak hour traffic volumes resulting from residential and commercial growth in the Lexington Park area.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service ☒ Safety & Security
☐ System Preservation & Performance ☐ Environmental Stewardship
☐ Connectivity for Daily Life

EXPLANATION: The project will increase capacity and improve safety and operations.

STATUS: Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

PRIMARY DEVELOPMENT AND EVALUATION PROGRAM

PROJECT: MD 404, Shore Highway

DESCRIPTION: Upgrade existing MD 404 to a 4 lane divided highway with access controls from US 50 to MD 404 Business (11.83 miles). Shoulders will accommodate bicycles and pedestrians.

JUSTIFICATION: This project is needed to reduce traffic congestion caused by high seasonal peaks associated with summer resort traffic and to improve safety and service.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☒ Grandfathered
☒ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

MD 404, West of Cemetery Road to East of MD 480 (Caroline County Line 1)
 US 50, US 301 to MD 404 (Queen Anne's County - Line 2)

STATUS: Partial Engineering underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Added \$1.0 million of FY10 Federal Appropriation Funds.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

STATE HIGHWAY ADMINISTRATION -- Talbot County -- Line 3

SECONDARY DEVELOPMENT AND EVALUATION PROGRAM

PROJECT: MD 331, Dover Road

DESCRIPTION: Replace Bridge 20023 over Choptank River. The new span, which will be located south of the existing roadway, will provide a 50 foot river clearance. Shoulders will accommodate bicycles and pedestrians.

JUSTIFICATION: Constructing a new high level bridge will provide a safe and dependable MD 331 crossing of the Choptank River that will accommodate both vehicular and marine traffic. The old span has had mechanical difficulties in the past that affected commerce and emergency services in Caroline and Talbot counties. This bridge is functionally obsolete.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

Washington

PROJECT: US 40, Dual Highway

DESCRIPTION: Widen US 40 at Edgewood Drive intersection. Wide curb lanes will be provided for bicycles and sidewalks will serve pedestrians.

PURPOSE & NEED SUMMARY STATEMENT: The project will increase capacity along this segment of US 40. It will also better accommodate bicyclists and pedestrians.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☒ Project Inside PFA ☐ Grandfathered
☐ Project Outside PFA ☐ Exception Will Be Required
☐ PFA Status Yet To Be Determined ☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

☒ Quality of Service ☒ Safety & Security
☐ System Preservation & Performance ☐ Environmental Stewardship
☐ Connectivity for Daily Life

EXPLANATION: This is one of several intersections on US 40 east of Hagerstown that experiences congestion. Increased development and moving the hospital to a new location will result in additional traffic. The reconstructed intersection will increase capacity and improve safety and operation for this segment of US 40.

STATUS: Construction underway. The City and County are participating in project funding. Funding shown is SHA share only.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

Worcester

PROJECT: US 113, Worcester Highway

DESCRIPTION: Upgrade existing US 113 as a 4 lane divided highway from Goody Hill Road to Massey Branch (1.8 miles). Project will include access control improvements. Shoulders will accommodate bicycles and pedestrians.

PURPOSE & NEED SUMMARY STATEMENT: The US 113 corridor is experiencing deterioration in safety and service due to increasing seasonal traffic volumes coupled with local, commercial/residential development along this highway. This project will improve the highway's safety and servability.

SMART GROWTH STATUS: ☐ Project Not Location Specific or Not Subject to PFA Law

☐ Project Inside PFA
☒ Project Outside PFA
☐ PFA Status Yet To Be Determined

☒ Grandfathered
☐ Exception Will Be Required
☐ Exception Granted

ASSOCIATED IMPROVEMENTS:

US 113, Public Landing Road to Massey Branch (Line 3)

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☒ Quality of Service
☒ System Preservation & Performance
☐ Connectivity for Daily Life
- ☒ Safety & Security
☐ Environmental Stewardship

EXPLANATION: This project will decrease travel time and delay for local and seasonal traffic and will reduce congestion and related collision and injury rates.

STATUS: Construction underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

POTENTIAL FUNDING SOURCE:

☒ SPECIAL ☒ FEDERAL ☐ GENERAL ☐ OTHER

DAILY TRAFFIC : (USAGE IMPACTS)

CURRENT (2010) - 11,425

PROJECTED (2030) - 16,275

PROJECT: US 50, Ocean Gateway

DESCRIPTION: Study to replace Bridge 23007 over the Sinepuxent Bay. The study will investigate options to eliminate/upgrade the drawspan structure. Shoulders or wide curb lanes and sidewalks will accommodate bicycles and pedestrians.

JUSTIFICATION: The 67 year old draw span is estimated to have 15 to 20 years of serviceability left. This high traffic volume arterial has experienced mechanical problems with the draw span during peak seasonal traffic. This project would improve the highway's safety and serviceability.

PROJECT: I-95 John F. Kennedy Memorial Highway - Express Toll Lanes (ETL)

DESCRIPTION: Improve the interchanges with I-895, I-695 and MD 43 and construct two Express Toll Lanes in each direction from I-895 North to north of MD 43 (9.63 miles). (BRAC related.)

PURPOSE & NEED SUMMARY STATEMENT: This segment of I-95 is the most congested section of I-95 in Maryland north of Baltimore City. Currently, I-95, south of MD 43, operates at Level of Service (LOS) F (lowest level of efficiency) during morning and evening rush hours. By 2025, this section is also expected to operate at LOS E (irregular flow with speed variations) and F during weekend peak periods. High congestion levels increase the level of diversion to alternative routes, such as the community-oriented arterials US 1, US 40, and MD 7. If anticipated congestion levels on this segment of I-95 are not addressed, increases in congestion-related accidents would likely occur.

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- | | |
|---|--|
| <input checked="" type="checkbox"/> Quality of Service | <input type="checkbox"/> Safety & Security |
| <input type="checkbox"/> System Preservation & Performance | <input type="checkbox"/> Environmental Stewardship |
| <input checked="" type="checkbox"/> Connectivity for Daily Life | |

EXPLANATION: I-95, south of MD 43, experiences congestion during the morning and evening rush hours. By 2025, this section is also expected to experience congestion during weekend peak periods. I-95 is the backbone of the east coast's transportation network and is essential to the movement of people and freight.

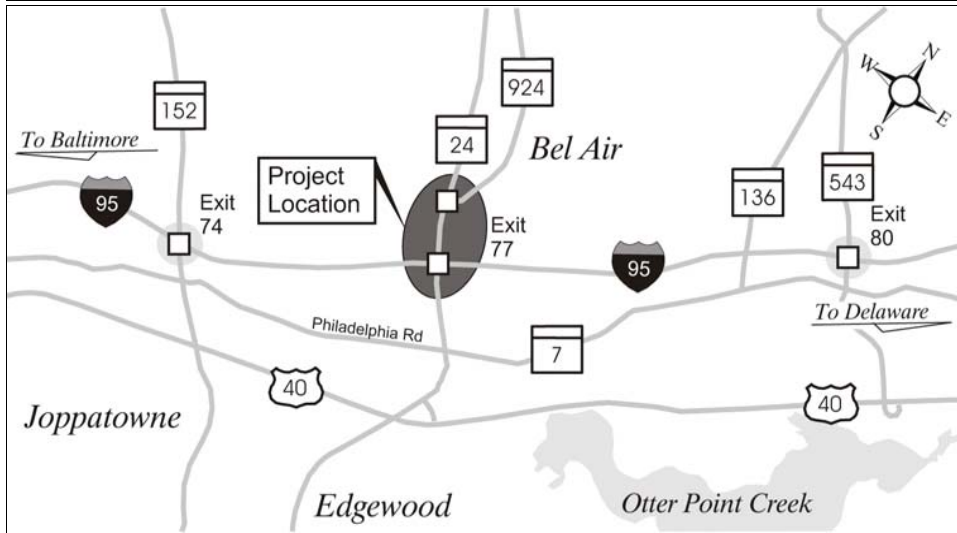

ASSOCIATED IMPROVEMENTS:

- I-95/MD24 Interchange - Construction Program (Line 2)
- I-95 New Maintenance Facility (Line 4)
- I-95 Ft. McHenry Tunnel - Moravia Road to the Tunnel - Construction Program (Line 6)
- I-95 Section 200 - Development and Evaluation Program (Line 33)

STATUS: Engineering, right-of-way acquisition, and construction are underway.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

PROJECT: I-95 John F. Kennedy Memorial Highway - MD 24 Interchange Improvements (Phase I)

DESCRIPTION: Phase 1, construct improvements to the I-95/MD 24 interchange, including upgrades to MD 24 and the reconstruction of the MD 24/MD 924/Tollgate Road intersection to a grade separated interchange. Phase 2, improvements to the I-95/MD 24 interchange are being developed as part of the I-95 Section 200 project planning study. (BRAC related.)

PURPOSE & NEED SUMMARY STATEMENT: This project will provide improved capacity, operation and safety for the I-95/MD 24 interchange and the MD 24/MD 924/Tollgate Road intersection, which is in close proximity and integral to the I-95/MD 24 interchange operation.

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- | | |
|--|---|
| <input checked="" type="checkbox"/> Quality of Service | <input checked="" type="checkbox"/> Safety & Security |
| <input type="checkbox"/> System Preservation & Performance | <input type="checkbox"/> Environmental Stewardship |
| <input type="checkbox"/> Connectivity for Daily Life | |

EXPLANATION: The project will improve capacity and safety for the I-95/MD 24 interchange and the MD 24/MD 924/Tollgate Road intersection. This improvement will address weaving movements on I-95 and MD 24 and improve traffic flow.

ASSOCIATED IMPROVEMENTS:

I-95 Express Toll Lanes - Construction Program (Line 1)
I-95 Section 200 - Development and Evaluation Program (Line 33)

STATUS: Engineering, right-of-way acquisition and construction are underway.

Federal-Aid	0	0	0	0	0	0	0	0	0	0

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Cost increased by \$13 million due to increased scope including enhanced rehabilitation and protection through thicker encasements and increased environmental mitigation work.

PROJECT: I-95 John F. Kennedy Memorial Highway - New Maintenance Facility

DESCRIPTION: The project includes the planning and right of way acquisition for a new maintenance facility along the I-95 John F. Kennedy Memorial Highway. Construction funding is included to purchase additional equipment for maintenance and operations of the Express Toll Lanes (ETL) and associated interchange improvements only.

PURPOSE & NEED SUMMARY STATEMENT: A new maintenance facility will be required to replace the existing JFK Maintenance 1 because Section 200 Project will displace this facility. The new maintenance Facility will cover the current service area for JFK Maintenance 1 as well as I-95 Master Plan Improvements, including the ETL's and associated interchange improvements.

PROJECT: I-95 Fort McHenry Tunnel - Moravia Road to the Tunnel Modifications

DESCRIPTION: The project limits extend from the southern end of the I-95, ETL Project (Moravia Road) to the Fort McHenry Tunnel Toll Plaza. Phase 1 modifications from Moravia Road to Eastern Avenue include grinding and overlaying to provide four continuous through lanes (lane continuity); Phase 2 from Eastern Avenue to Fort McHenry Tunnel includes re-striping to provide four continuous through lanes (lane continuity).

PURPOSE & NEED SUMMARY STATEMENT: The existing typical section of I-95 from Moravia Road to the FMT is as follows: three lanes per direction from I-895 to Moravia Road; four lanes per direction from Moravia Road to O'Donnell Street; three lanes per direction from O'Donnell Street to Boston Street; and four lanes per direction from Boston Street to the Fort McHenry Tunnel. This project will provide southbound lane continuity from the southern limits of the ETL's to the tunnel.

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- | | |
|--|--|
| <input checked="" type="checkbox"/> Quality of Service | <input type="checkbox"/> Safety & Security |
| <input type="checkbox"/> System Preservation & Performance | <input type="checkbox"/> Environmental Stewardship |
| <input type="checkbox"/> Connectivity for Daily Life | |

EXPLANATION: This project will provide southbound lane continuity from the southern limits of the ETL's to the Fort McHenry Tunnel. This will improve traffic flow on this segment of I-95.

ASSOCIATED IMPROVEMENTS:

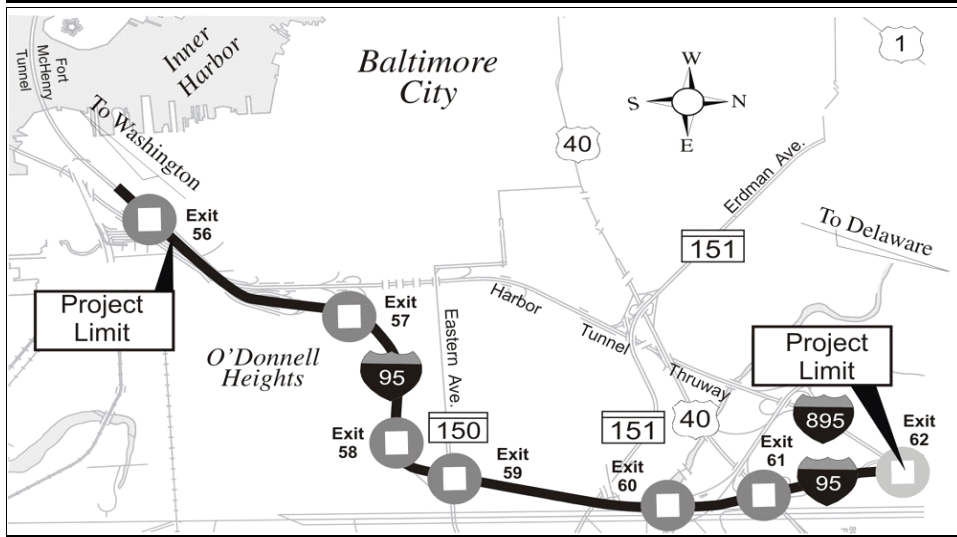

- I-95 Express Toll Lanes - Construction Program (Line 1)
- I-95 Ft. McHenry Tunnel - Rehabilitation North of Tunnel - Construction Program (Line 7)
- I-95 Ft. McHenry Tunnel - Rehab. from Joh Ave. to Washington Blvd. - Construction Program (Line 8)
- I-95 Ft. McHenry Tunnel - Higher Speed Toll Plaza Modifications - Construction Program (Line 9)

STATUS: Planning is complete. Engineering is underway. Construction for Phase I southbound began in August 2010.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP:

Construction start delayed to FY 2011 due to additional environmental coordination. Reduced cost by \$2.2 million based on actual bid prices.

PROJECT: I-95 Fort McHenry Tunnel - Bridge, Roadway and Signage Rehabilitation North of Tunnel

DESCRIPTION: Rehabilitate I-95 north of the Tunnel to I-895. Includes resurfacing of 34 bridge decks and related structural repairs; resurfacing and safety improvements of roadways; replacing and upgrading of existing signing; and inspecting and repairing of high mast light poles and sign structures.

PURPOSE & NEED SUMMARY STATEMENT: Bridge decks and roadways have not been resurfaced since their opening in 1976 and they exhibit various degrees of wear. Signs and other safety features need to be brought up to the latest standards.

PROJECT: I-95 Fort McHenry Tunnel - I-395 Repair and Spot Paint Beam Ends, Deck Seal and Joint Repair

DESCRIPTION: Repair and paint beam ends, seal concrete deck, and repair joints.

PURPOSE & NEED SUMMARY STATEMENT: Beam ends, bridge deck and roadway joints exhibit various degrees of wear. This improvement will correct current wear and prevent further wear of the concrete deck and steel beams.

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- | | |
|---|--|
| <input type="checkbox"/> Quality of Service | <input type="checkbox"/> Safety & Security |
| <input checked="" type="checkbox"/> System Preservation & Performance | <input type="checkbox"/> Environmental Stewardship |

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP:

Construction start delayed to FY 2012 due to sequencing of contracts.

PROJECT: MD 695 Francis Scott Key Bridge - Interchange Improvements at Quarantine Road

DESCRIPTION: Improvements to Quarantine Road interchange will include widening of the ramps and upgraded traffic signals; permanent closure of the ramp from Quarantine Road to the Outer Loop and redirection of traffic to the Fort Armistead ramp; widening of the approach roadways and restriping the Quarantine Road bridge to four lanes; a new storm water management facility to control storm water pollution; new roadway signing, lighting, pavement markings, landscaping and reforestation.

PURPOSE & NEED SUMMARY STATEMENT: This project will improve safety by addressing constraints at the existing MD 695 - Quarantine Road interchange that result in ramp queues that extend onto MD 695.

STATE GOALS: Maryland Transportation Plan (MTP) Goals/Selection Criteria:

EXPLANATION: The project increases community mobility and safety; supports development and local land use plans; improves access between economic growth centers; advances homeland security measures; and helps restore the natural, human and cultural environments from past development impacts in the project area.

ASSOCIATED IMPROVEMENTS:

I-95/Contee Road Interchange (Line 5, Montgomery County - SHA)
MD 28/MD 198, MD 97 to I-95 (Line 19, Montgomery County - SHA)
MD 201 Extended/US 1, I-95/I-495 to Contee Road (Line 21, Prince George's County - SHA)

STATUS: Engineering, right-of-way and construction are underway. The MDTA and SHA are reviewing potential adjustments to project scope, and other budget and funding mitigation measures to address the increased cost of contract B (east of MD 97 to west of US 29), which might allow all or a portion of the deferred work to be undertaken. Contract D is not reflected in the cashflow.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: The total project cost was reduced by \$103.2 million. This reflects the removal of the balance to complete budget from this project sheet. The balance to complete obligation is still reflected in MDTA financial forecast.

The Federal aid share of \$19.27 million is also included in SHA's portion of the CTP.
1982

PROJECT: US 40 Thomas J. Hatem Memorial Bridge - Deck Replacement

DESCRIPTION: Replace the deck on the Hatem Bridge. One 12-foot wide traffic lane will be maintained in each direction during construction. This maintenance of traffic plan was selected through coordination efforts with the Cecil/Harford Bridges Work Group. (BRAC related.)

PURPOSE & NEED SUMMARY STATEMENT: The concrete and steel grate core are worn, requiring replacement. The deck was last renovated in 1982. This improvement will completely replace the bridge deck.

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- | | |

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Cost increased by \$300 thousand for inflation.

PROJECT: US 301 Harry W. Nice Bridge - Cleaning and Painting Structural Steel and Miscellaneous Structural Repairs

DESCRIPTION: Spot paint as required throughout the full length of the bridge and zone paint at locations of roadway joints. Repair miscellaneous structural elements.

PURPOSE & NEED SUMMARY STATEMENT: Last zone paint completed was on the truss towers in 2002. Paint on many locations throughout the bridge has significant wear. This improvement will extend the useful life of the structural steel.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: Project moved to Construction Program from System Preservation Minor Projects Program. Construction cost greater than \$10 million.

PROJECT: Authority-wide - Upgrade MDTA Radio Communication Systems (700 MHz System)

DESCRIPTION: The State of Maryland intends to purchase an integrated statewide wireless communications system. The system will operate with the 700/800 MHz band frequencies. The implementation of the system will incorporate a phased deployment methodology. The Maryland Transportation Authority will be the first agency to work within this statewide project. MDTA is in Phase 1 Region 1-A which consists of BWI, ICC, Tunnel Command, Nice Bridge, Bay Bridge, and JFK North.

PURPOSE & NEED SUMMARY STATEMENT: The upgraded radio communications systems will provide state, local, and regional public first responders' real time operable and interoperable voice and data services that support Day-to-Day, Mutual Aid, and Task Force operations.

STATE GOALS : Maryland Transportation Plan (MTP) Goals/Selection Criteria:

- ☐ Quality of Service
 ☒ Safety & Security
 ☐ System Preservation & Performance
 ☐ Environmental Stewardship
 ☐ Connectivity for Daily Life

ASSOCIATED IMPROVEMENTS: None.

EXPLANATION: The upgraded radio communications systems will provide state, local, and regional public first responders' real time operable and interoperable voice and data services that support Day-to-Day, Mutual Aid, and Task Force operations.

STATUS: Maryland Board of Public Works approved contract on November 17, 2010. Notice to proceed issued December 15, 2010.

SIGNIFICANT CHANGE FROM FY 2010 - 15 CTP: None.

PROJECT: Authority-wide - Procure, Upgrade, Repair and Replace Signs Including Dynamic Message Signs and Sign Structures

DESCRIPTION: Upgrade and replace signs and sign structures and perform miscellaneous repairs. Also, supply dynamic message signs (DMS) for a 5 year period to support about 20+ projects that are replacing or installing new DMS throughout MDTA's facilities. The project also provides for preventive maintenance, emergency maintenance, and parts and supplies as needed to maintain the DMS signs.

PURPOSE & NEED SUMMARY STATEMENT: Existing DMS signs are experiencing reliability issues and other signs and sign structures are worn. This improvement will also bring signs and other safety features MDTA-wide up to latest standards.

55	Rehabilitation of Static Scale Pit at Perryville Scale House (NB and SB) (2119)	12	Complete
56	Repair & Replace Raised Pavement Marking (RPM) Housing and Lenses (2085)	48	Complete
57	Study to Upgrade Fire Alarm System in Tunnels (2104)	15	Complete
58	On-Going Miscellaneous Upgrade/Replace Highway Signs, Pavement Markers & RPM (1980)	4,091	Underway
59	Install Closed Circuit TV Systems and Fiber Optic Spurs along I-95 (1974)	8,410	Underway
60	Study Toll Facility Cost Allocation (2002)	299	Underway
61	Upgrade Authority Operation Center at FMT and BHT (1954)	9,003	Underway
62	Building Security Improvements - Phase II (1983)	7,920	Underway
63	On-Call Miscellaneous Structural Repairs at Various Facilities (1900)	8,988	Underway
64	Radio Rebroadcast Systems in Fort McHenry and Harbor Tunnels (1963)	913	Underway
65	Security Related Plans, Evaluations and Upgrades (1467)	400	Underway
66	Electronic Toll Collection Replacement and Operating System - 3rd Gen. Engineering only (2147)	12,184	Underway
67	Information Technology Strategic Plan (1942)	4,030	Underway
68	Install Highway Advisory Radio Transmitters and Signs - JFK and WPL (2008)	1,049	Underway
69	International Electrical Testing Association (NETA) Electrical Testing - BHT and FMT (2125)	207	Underway

SYSTEM PRESERVATION MINOR PROJECTS PROGRAM

MARYLAND TRANSPORTATION AUTHORITY - LINE 35 (cont'd)

ITEM NO.	DESCRIPTION AND IMPROVEMENT TYPE	TOTAL ESTIMATED COST (\$000's)	CONSTRUCTION START
	<u>FY 2011 and Prior (cont'd)</u>		
	<u>MULTI-AREA (cont'd)</u>		
70	Law Enforcement IT Systems Plan - Multi-Area (2060)	9,375	Underway
71	Misc. ITS and Electrical Engineering Studies (2129)	498	Underway
72	Miscellaneous Real Estate Services (1997)	4,439	Underway
73	Miscellaneous Traffic Studies (2131)	4,689	Underway
74	NPDES Environmental Compliance Inspection and Remediation (2007)	20,263	Underway
75	Planning Studies for Strategic Development - Second Generation (2001)	8,904	Underway
76	Study FMT/BHT Campus Master Plans (2044)	176	Underway
77	University of Maryland- Concept of Operations for Congestion Management (2133)	90	Underway
78	Annual Inspection of Authority Facilities (2084)	67,209	Underway
79	Cleaning and Painting, Bearing Repairs, Joint Modifications & Misc. Repairs at BHT and FSK Bridges (1940)	8,594	Underway
80	Comprehensive Building Inspection Program (Engineering only) (2177)	1,000	Underway
81	Conduct Authority Market Research (2170)	200	Underway
82	Furnish and Install Camera and Coding & Decoding Equipment - Codec and Related Equipment (2014)	4,287	Underway
83	Incident Detection System Maintenance Contract (in tunnels) (2127)	153	Underway
84	Miscellaneous Paving Repairs (2142)	4,697	Underway
85	Right-of-Way and General Fencing at Various Locations (2144)	836	Underway
86	Study to Evaluate Toll Booth Condition (2094)	90	Underway
87	Evaluate Condition of Deck, Superstructure & Substructures All Facilities (Engineering only) (2083)	1,332	Underway
88	Fatigue Retrofits at Multi Area Structures - Engineering only (Code 2 System Preservation) (2219)	802	Underway
89	On-Call Miscellaneous Shotcrete Repair (2149)	10,004	Underway
90	On-Call Structural Repairs and Miscellaneous Modifications (2124)	5,266	Underway
91	On-Call Structural Repairs and Miscellaneous Modifications (2168)	13,200	Underway
92	On-Call Structural Repairs and Miscellaneous Modifications (2171)	13,200	Underway
93	Open Road Tolling Authority-wide Feasibility Study (2183)	500	Underway
94	Replace Intercom Systems at Toll Collection Booths - Authority wide (2162)	260	Underway
95	Speed Camera Program (2223)	100	Underway
96	Study E-ZPass Disaster Recovery Needs (2225)	100	Underway
97	System Preservation Program Unallocated Fund - Code 2 Projects (1979)	148,647	Underway

ITEM NO.	DESCRIPTION AND IMPROVEMENT TYPE	TOTAL ESTIMATED COST (\$000's)	CONSTRUCTION START
	<u>FY 2011 and Prior (cont'd)</u>		
	<u>MULTI-AREA (cont'd)</u>		
98	Upgrade and Replace Metal Barriers and Attenuators (1922)	2,652	Underway
99	Energy Lease Program (2078)	10,253	Underway
100	Furnish and Install Radiac Cable within Tunnels (2156)	1,929	Underway
101	Furnish, Deliver, Commission, Warranty and Maintain DMS (Engineering only) (2229)	1,165	Underway
102	Maintenance Contract for Uninterruptible Power Supply Needs (2106)	323	Underway
103	Miscellaneous Roadway Lighting Repairs and Modifications (1913)	4,027	Underway
104	Mitigate Flood at Fairfield Ventilation and Service Buildings - FMT and BHT (0290)	600	Underway
105	Rehabilitation Evaluation Program (Code 1 System Preservation) (2196)	6,573	Underway
106	Replace Navigational Lighting Systems to Francis Scott Key, Nice Memorial Bridge and Bay Bridge (2074)	2,383	Underway
107	Structural On-Call Contract Reserve (Code 1 System Preservation) (2189)	41,351	Underway
108	Study Commercial Vehicle Inspection Facilities at the BHT, KB, FMT (2073)	255	Underway
109	Design & Construct Security Fencing at Shores of Major Bridges (TJH, FSK HWN & Tydings) (2130)	1,850	Spring, 2011
110	Miscellaneous Paving Repairs (Code 1 System Preservation) (2193)	17,425	Spring, 2011
111	On-Call Structural Repairs and Miscellaneous Modifications (2176)	15,700	Spring, 2011
112	Upgrade and Replace Metal Traffic Barriers and Attenuators (Code 1 System Preservation) (2195)	5,723	Spring, 2011
	<u>NICE BRIDGE</u>		
113	Fog Detection and Warning System (2154)	60	Underway
114	Renovate Administration Building (1025)	2,103	Underway
115	Deck Replacement/Overlay; Full & Partial Paint - Engineering only (Code 2 System Preservation) (2199)	2,429	Underway
	<u>POINT BREEZE</u>		
116	Replace Roof of Garage Building (2108)	659	Spring, 2011

131	Study Police Special Operations Facility & Garage (2117)	26	Summer, 2011
	<u>W. P. LANE BRIDGE</u>		
132	Fatigue Retrofits at Bay Bridge - Engineering only (Code 2 System Preservation) (2217)	2,573	Summer, 2011
133	Install 4 Isolation Points and Access Ladder - Eastbound Bay Bridge (2054)	852	Summer, 2011
134	Rehabilitation of Toll Collector Tunnel (2050)	700	Spring, 2012

GLOSSARY

CONSOLIDATED TRANSPORTATION PROGRAM GLOSSARY

State Report on Transportation (SRT)	Consists of the Maryland Transportation Plan (MTP) and the Consolidated Transportation Program (CTP).
Maryland Transportation Plan (MTP)	The MTP identifies the focus of the Department and its modal administration that defines program objectives and serves to guide program development. It includes a 20-year forecast of needs based on anticipated resources available to the Department.
CHART	Coordinated Highways Action Response Team – Maryland’s program to employ Intelligent Vehicle Highway System (IVHS) technology to better manage highway capacity.
Consolidated Transportation Program (CTP)	The CTP designates capital projects that will be undertaken during the six-year period, and a summary of operating programs. The CTP also identifies projects added to the Construction Program and Development and Evaluation Program, delayed in schedule, deleted from the Development and Evaluation Program and finally completions.
Construction Program	List within the CTP of major projects (descriptions, cost estimates and schedules) under construction and those anticipated to begin construction within the six-year period. An estimate of annual expenditure levels for system preservation projects is also included.
Development & Evaluation Program (D&E)	List within the CTP of projects for planning studies, preparation of environmental studies and preliminary design. These projects are candidates for future addition to the Construction Program.
Remaining Cost to Complete	Amount of funds required after the budget year to complete a project.
Balance to Complete	Amount of funds required after the six-year program period of the CTP to complete a project.
Major Capital Project	New, expanded or significantly improved facility or service that generally involves planning, environmental studies, design, right-of-way acquisition, construction or purchase of essential equipment related to the facility or service.
System Preservation Project	Project of limited scope for the preservation or rehabilitation of an existing facility or service which generally does not have a significant impact on the human or natural environment.

CONSOLIDATED TRANSPORTATION PROGRAM GLOSSARY (Cont'd.)

Reconstruction	Complete rebuilding of a facility/structure or system which is beyond the point where it may be economically repaired or renovated.
Rehabilitation	Restoration and/or modernization of a facility/structure or system in order that it may be effectively used for its designated functional purpose or comply with current requirements.
Highway System Preservation Program	Program of projects oriented toward preserving the existing highway system, including resurfacing, safety improvements, bridge rehabilitation, landscaping, traffic control and ridesharing lots and other miscellaneous improvements.
Reimbursables	State funds advanced for work performed for local jurisdictions, services performed for other agencies, recovery of damages to Department property, salaries and expenses of the Interstate Division for Baltimore City, fees for issuing commercial entrance permits, and other activities performed by the Department and are paid by various sources.
Capital Contributions Agreement	Agreement entered into by 8 local jurisdictions in Maryland, Virginia and the District of Columbia that provides a capital funding schedule for Metrorail construction in the Washington area.
(PP)	Project Planning: The state in the planning process where detailed studies and analysis are conducted to establish the scope and location of proposed transportation facilities.
(PE)	Preliminary Engineering: The state in project development when surveys, soil conditions, elevations, right-of-way plats, and detailed design plans and specifications are prepared.
(RW)	Right-of-Way: Acquisition of land for transportation projects.
(CO)	Construction.
(IN)	Inflated Cost.
(FA)	Federal-aid.
(STP)	Surface Transportation Program category of federal aid
(NHS)	National Highway System category of federal aid.

CONSOLIDATED TRANSPORTATION PROGRAM GLOSSARY (Cont'd.)

(IM)	Interstate Maintenance category of federal aid.
(BR)	Bridge Replacement/Rehabilitation category of federal aid.
(CMAQ)	Congestion Mitigation/Air Quality category of federal aid.
(DEMO)	Specific projects identified in federal legislation for demonstration purposes.
